Dear Claimant(s):

Enclosed are copies of the above referenced water rights which reflect the change in ownership of the land and appurtenant water rights covered under the original filings. Also enclosed is a copy of the Notice of Completed Administrative Proceedings which has been sent to the Snake River Basin Court as notification of the change.

The Department or the Court will contact you in the future concerning any requirements that may be needed in order to process these water rights for final decree.

If you have any questions concerning the enclosed water rights, please feel free to contact this office.

Sincerely,

Lori Harris

CONDITIONS/REMARKS:

4. A measuring device and lockable controlling works of a type acceptable to the Department shall be permanently installed and maintained as part of the diverting works.
5. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 5.0 afa per acre for the lands above.
6. The combined rate of diversion under this right and Right Nos. 57-2212/7052/7128/7157 shall not exceed 10.35 cfs nor shall the annual volume exceed 4770.0 afa.
7. This right is limited to the irrigation of 320 acres within the place of used described above in a single irrigation season.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code.
Witness the seal and signature of the Director, affixed at Boise, this 1st
day of February, 1992.

Received by Abilaw Date 1/23/92 #C023030

ACTION OF THE DEPARTMENT OF WATER RESOURCES

I, R. Keith Higginson, of the Department of Water Resources hereby approve the above Application for Amendment for Permit No. 57-07083 with the following;

CONDITIONS/REMARKS:

1. This water right is appurtenant to the described place of use.
2. This right is subject to all prior water rights and may be forfeited by five years of non-use.
3. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
4. A measuring device and lockable controlling works of a type acceptable to the Department shall be permanently installed and maintained as part of the diverting works.
5. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 5.0 afa per acre for the lands above.
5. The combined rate of diversion under this right and Right Nos. 57-2212/7052/7128/7157 shall not exceed 10.35 cfs nor shall the annual volume exceed 4770.0 afa.
6. This right represents irrigation of 320 acres within the land base described above.

Witness my hand this 1st day of February, 1992

MEMORANDUM

TO: JIM JOHNSON
FROM: STEVE LESTER
DATE: SEPT. 18, 1991
SUBJECT: FIELD EXAMS 57-07052 -07083 -07128 -07157 -07172 -07179
AND LICENSE 57-02212, ALL FOR DELBERT MOORE

The b.u. exams were conducted by Kelly Christensen on 8/11/88 with follow-up visits by Gene Gibson and Linda Werner on 6/14/90 related to the SRBA. Kelly prepared the attached report and used the overlap analysis techniques to recommend licensing details. His report is quite thorough and has been left unaltered except for a few minor footnotes that I added.

The only changes that are recommended involve the flow and volume calculations and acres per permit to be licensed. By comparing the examiner's report to the reviewer's recommendations, you can select the appropriate information for licensing.

Flow calculations and volume capacity

Four wells are involved. Well #3 was measured via a flowmeter, and the measurement details are on page 14 of the report. The other well measurements (HP equations) are shown on page 13 of the report. For wells 2 and 4, an assumption of 60 psi does not appear reasonable. 100 psi at well #1 was measured at the wellhead. 75 psi was measured at well #3 at or very near the wellhead. Although our standards suggest using 60 psi for irrigation when unknown pressures are involved, it seems more reasonable to use either the average of the two measured values (87.5 psi) or the lower observed value (75). I selected the lower value of 75 psi to use in HP equations for wells #2 and 4. Using 75 instead of 87.5 gives the benefit of any doubt to the irrigator.

Although a HP equation is not vital for measured well #3, an equation can be used to check the flowmeter reading. If so, hp should be $350 + 20$, not $250 + 20$ as shown in the report. Consult the examiner's field notes to verify this. Also, the z value should not be 371' since that is the static level on the 1975-76 well log. Z values for other wells indicate a greater dynamic pumping level than 371'. For these two reasons, I selected a z value of 400' for well #3. Increasing hp to 370, psi to 75, and z to 400 do not adversely affect the flow calculation for this well.

Table 1 outlines information leading to estimated values of z for each well.

Pg. 1 of 7

copy for A57-02212
MICROFILMED
OCT 07 1992

Table 1. Estimating Z Values for 4 Wells.

<u>location of well</u>	<u>well number</u>	<u>static level</u>	<u>year of log</u>	<u>drawdown from log</u>	<u>Z</u>	<u>source of information</u>
S36 NENW	1	165-69'	1970	270'	435	log
S36 SWSW	2	437'	1983	?	493	log & owner's est.
S35 SWNE	3	371'	1976	?	400	log & reviewer's est.
S35 NWNE	4	?	no log	?	375	owner's est.

(notes: well #1 substantially deepened in 1970; well #2 deepened & static level fell from 345' to 437' 1974-1983; well #3 shows no drawdown in 1976 but does not seem reasonable to expect no change in this well when others declined).

The use of z values of 400' in well #3 and 375' in well #4 either do not adversely affect flow calculations (#3) or give benefit of doubt to user (#4).

Reviewer's flow calculations

Well #1 $Q = \frac{8.8 \times 200 \times .7}{(2.31 \times 100) + 435} = 1.85 \text{ cfs}$

Well #2 $Q = \frac{8.8 \times 350 \times .7}{(2.31 \times 75) + 493} = 3.24 \text{ cfs}$

Well #3 $Q = 2.45 \text{ cfs}$ flowmeter measurement

$Q = \frac{8.8 \times (350 + 20) \times .5}{(2.31 \times 75) + 400} = 2.84 \text{ cfs}$ where efficiency assumed lower with more complexity

Well #4 $Q = \frac{8.8 \times 250 \times .7}{(2.31 \times 75) + 375} = 2.81 \text{ cfs}$

Total flow estimate = 1.85 + 3.24 + 2.45 + 2.81 = 10.35 cfs = system capacity.

Therefore, total volume diversion capacity is as follows:

season 57-07052 4/1-10/15=198 days, recommend 160 acres (acre recommendations in next part of memo)

season other permits 3/15-11/15=246 days, recommend 794 acres

weighted days in season based on number of acres:

$$\frac{[(160 \times 198) + (794 \times 246)]}{954 \text{ total acres}} = 237.9 = 238$$

$$\text{total volume capacity} = 10.35 \times 238 \times 1.9835 = 4885.96 = 4886 \text{ afa.}$$

Acres recommended per permit

SRBA claims were filed for license 57-02212 and for all of the permits. Kelly noted the rearrangement of acres within the licensed QQ's. See page 4 of the report for the acres to be recommended for A57-02212. Based on this foundation, permits can be considered for licensing by recommending the oldest permit first and continuing until all of the acres are covered. Old rate and current rate comparisons are made by "advancing" through the permits in this manner.

I did not find any basis in the report for the examiner's recommendations to license less acres than found in permits 07052, 07083, or 07128. In my interpretation, reduced acres are first encountered in the recommendation for 07157. Attachments A, B, and C serve as visual aids for the following summary of recommendations. Attachment A charts the total acres irrigated per QQ and acres recommended per QQ per right. 954 unique acres are irrigated. Attachment B outlines the examiner's recommendations. Attachment C shows my conclusions.

I attempted to recommend acres for a permit to fit the permit QQ's as closely as possible. Additional acres within a permit were then moved to other tracts within the section where possible. After that, acres were moved to adjoining areas or to the next tract requiring additional coverage starting with section 25 and proceeding through Section 36. Attachments B and C show some non-adjacent acres within a particular right, and it does not seem possible to avoid this. Note that all four wells serve each right.

Recommendations- All permit exam fees were adequate for cfs rates

57-02212

- * 1.70 cfs for 147 acres, .0116 cfs/ac
- * old license with no volume or season shown
- * assume 3/15-11/15 and use i.r. of 5 afa/ac
- * V i.r. = $147 \times 5 = 735 \text{ afa}$
- * V d.r. = $1.7 \times 246 \times 1.9835 = 829.5$
- * full volume of 735 afa implied in license

57-07052

- * old rate = .0116 cfs/ac
- * current rate: 02212 @ 147 ac & 07052 @ 160 ac = 307 ac ; 10.35 cfs
- * $10.35/307 = .0337 \text{ cfs/ac}$; 160 ac x .02 = 3.20 cfs ; 160 ac x .0337 = 5.39 cfs ; permit limit = 2.06 cfs ; allow 2.06 cfs
- * V i.r. = $160 \times 5 = 800$; V d.r. = $2.06 \times 198 \times 1.9835 = 809$
- * recommend 2.06 cfs - 800 afa - 160 acres - 4/1 to 10/15 - amend p/d

57-07083

* old rate = .0337 cfs/ac
* current rate: existing 307 ac & 07083 @ 320 ac = 627 ac ; 10.35 cfs
* $10.35/627 = .0165$ cfs/ac ; $320 \text{ ac} \times .02 = 6.40$ cfs ; $320 \text{ ac} \times .0165 = 5.28$ cfs ; permit limit = 4.00 cfs ; allow 4.00 cfs
* V i.r. = $320 \times 5 = 1600$; V d.r. = $4.00 \times 246 \times 1.9835 = 1951.8$
* recommend 4.00 cfs - 1600 afa - 320 acres - 3/15 to 11/15 - amend p/d & p/u

57-07128

* old rate = .0165 cfs/ac
* current rate: existing 627 ac & 07128 @ 280 ac = 907 ac ; 10.35 cfs
* $10.35/907 = .0114$ cfs/ac ; $280 \text{ ac} \times .02 = 5.60$ cfs ; $280 \text{ ac} \times .0114 = 3.19$ cfs ; permit limit = 4.85 cfs ; allow 3.19 cfs
* V i.r. = $280 \times 5 = 1400$; V d.r. = $3.19 \times 246 \times 1.9835 = 1556.5$
* recommend 3.19 cfs - 1400 afa - 280 acres - 3/15 to 11/15 - amend p/d & p/u

57-07157

* old rate = .0114 cfs/ac
* current rate: existing 907 ac & 07157 @ 47 ac = 954 ac (with this permit will cover remainder of existing acres) ; 10.35 cfs
* $10.35/954 = .0108$ cfs/ac ; $47 \text{ ac} \times .02 = .94$ cfs ; $47 \text{ ac} \times .0108 = .51$ cfs ; permit limit = 4.00 cfs ; allow .51 cfs
* V i.r. = $47 \times 5 = 235$; V d.r. = $.51 \times 246 \times 1.9835 = 248.8$
* recommend .51 cfs - 235 afa - 47 acres - 3/15 to 11/15 - amend p/u

57-07172 and 57-07179

* cancel permits since all of acres in system are covered with earlier priority dates from the 4 wells
* since system produces 10.35 cfs for 954 acres or approx. .5 inch/acre, additional water is not available in system to go back to oldest right and start adding rate of flow to bring acres up to 1 inch/acre

Conditions

* for all rights, use system capacity limiter of 10.35 cfs
* for all rights, use volume limiter of 5 afa/ac and not to exceed 4770 afa when combined (total V i.r. = $954 \times 5 = 4770$ and V d.r. = 4886 from calculations shown earlier in this memo)

As you can see, I followed the same procedure that examiner did in his report. I'll be glad to clarify anything that is not clear in this memo or in the field report.

D. SYSTEM DESCRIPTION (General system description)

1. Diagram found on;

a. Aerial Photo	--	--	--	--	--	--	--	x
b. Hand Sketch	--	--	--	--	--	--	--	x

2. Narrative

This is an analysis of seven rights, one license and six permits, and how they interact. The permits slowly expanded the system by adding wells and/or acres but field exams were not conducted identifying the actual use as each permit was added.

This field report will start with the permit with the oldest priority and progress through all six permits, tying in the overlap as it occurs.

The first three permits 57-7052, 57-7083, and 57-7128 list one well per right, each one for a different well. As all the wells are now tied into one mainline capable of delivering water to any of the found acres, an amendment to include all wells on each permit is recommended. This approach results in the recommendation to lapse permits 57-7172 and 57-7179.

The licensing recommendations are based upon an AFA limitation only. No CFS rate has been recommended.

THE SYSTEM

The existing system is four wells tied into a buried 10" mainline which supplies water to center pivots, handlines, and/or wheel lines. Any well or combination of wells can supply water to any portion of ground covered by these permits.

THE RIGHTS

RIGHT NO.	PRIORITY	DATE	P/D	IDENTIFICATION	OVERLAP STATUS
57-2212	02-15-55		P/D	# 1 only	no previous right
57-7052	08-17-71		P/D	# 1 only	no P/U overlap
57-7083	10-03-72		P/D	# 2 only	some OL with 57-7083
57-7128	12-25-74		P/D	# 4 only	no P/U overlap
57-7157	04-06-76		P/D	# 1 thru 4	P/U overlap found
57-7172	08-31-76		P/D	# 1 thru 4	P/U overlap found
57-7179	02-02-77		P/D	# 1 thru 4	P/U overlap found

MICROFILMED

OCT 07 1992

3. Overlap Analysis

This analysis layout always starts with the found acres in each section. If a permit does not include acres in a particular section, that section will not be included in the layout. The permit acres under analysis are listed twice. The first entry (identified by permit #) lists the acres as listed on the permit. The second entry (identified by RECOMMENDATION FOR LICENSING IN SEC __) identifies the acres that are recommended for licensing. These acres will be carried forward to the next permit analysis. The permit acres are NOT carried forward. As permits are added, the recommended acres within each Q/Q are to be added and compared to the found acres to determine if there are additional acres available for licensing.

Each permit will be analyzed and then there will be a summary page identifying the licensing recommendations.

In section 25 the found acres in NE/SW are 2 acres short and of the licensed acres under license 57-02212.

An adjudication recommendation for 57-02212 will include changing the number of acres found in three different Q/Qs of section 25. The recommended changes are,

TWP	RGE	SEC	NE				NW				SW				SE				TOTAL
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
FOUND ACRES IN		25							32	8	18	39	36	32					165
LICENSED ACRES		25							10	4	20	35	20	35					124
RECOMMENDED CHANGES (marked by a following *)																			
57-2212	2S	2W	25						10	4	18	39*	21*	32*					124

The adjusted acres are used in this analysis and the recommendations are based upon those acres.

PERMIT 57-7083 ACRE RECOMMENDATION FOR LICENSING IS -- -- -- -- 200

Permit 57-7083 is a permit for new acres from a new P/D (Well # 2) no overlap found. This right also requires an amendment to add the additional P/Ds. The wells not originally included on this permit are, well # 1, 3, and 4.

I recommend the matching Q/Qs for licensing and no others. The 80 acres applied for in the SE quarter were never developed and the found acres not covered by this permit are better represented in future filings and will be then recommended for licensing. No transfer of those 80 acres is recommended.

$$\text{LICENSING RECOMMENDATION for Found Acres} = \frac{200}{\text{Acres}} * 5.0 = 1000 \text{ AFA}$$

PERMIT 57-7128 ACRE RECOMMENDATION FOR LICENSING IS -- -- -- -- 120

This permit is from a new P/D (Well # 4.) An amendment is required to add the additional P/Ds, Well # 1, 2, and 3. P/U overlap was found in the SW 1/4 of Sec 36 (permit 57-7083). These acres were recommended for licensing for the full AFA legal limit under permit 57-7083, therefore these acres are to be excluded in the licensing recommendation for this permit.

LICENSING RECOMMENDATION for Found acres = $\frac{120}{\text{Acres}} * 5.0 = 600\text{AFA}$

Amendment required to change acres to new Q-Qs -- -- -- |*|
 (an asterisk indicates the Q/Q requiring an amendment)

PERMIT 57-7157 ACRE RECOMMENDATION FOR LICENSING IS -- -- -- -- 367

This permit is the first right that includes all four P/Ds. No amendment to add P/Ds is required for this permit. P/U overlap occurs in all sections and the overlapping acres are already licensed or recommended to receive the AFA legal limit. These acres will be excluded from the acre recommendation on this permit. Ten acres in the SW/SE of sec 26 and forty acres in the NE/SE of sec 36 are not covered under any permit. The sixty five acres in the SE 1/4 of sec 35 were included in the filing of 57-7179 as acres identified irrigated but not covered by any permit. These acres are recommended for licensing under this permit. No other acres were found needing to be licensed.

LICENSING RECOMMENDATION for Found acres = 367 * 5.0 = 1,835 AFA
 Acres * Af.

PERMIT 57-7172 ACRE RECOMMENDATION FOR LICENSING IS -- -- LAPSE PERMIT

This permit was filed with all P/Ds included. The intent for this permit was to allow water use on all acres from any P/D and to increase the diversion rate. By amending the previous permits to include all P/Ds on those rights and licensing by AFA limitations only, this permit becomes superfluous.

All acres listed under this permit have been licensed or recommended for licensing under the previous licenses or permits. Therefore I recommend that this permit be lapsed.

PERMIT 57-7172 ACRE RECOMMENDATION FOR LICENSING IS -- -- LAPSE PERMIT

This permit was filed with all P/Ds included. The intent for this permit was to allow water use on all acres from any P/D and to add the additional sixty five acres found in sec. 35. Because those acres are recommended for licensing under permit 57-7157 and by amending the previous permits to include all P/Ds on those rights and licensing by AFA limitations only, this permit also becomes superfluous.

All acres listed under this permit have been licensed or recommended for licensing under the previous licenses or permits. Therefore I recommend that this permit be lapsed.
