FINDINGS OF FACT AND CONCLUSIONS OF LAW

A notice of claim was filed for this water right pursuant to I.C. § 42-1409 (1990) by United States (BLM). The director of the State of Idaho Department of Water Resources examined the water system for areas 1, 2, and 3 and investigated and abstracted the notices of claims for those Reporting Areas. The Director of the Idaho Department of Water Resources then filed a *Director's Report* which asserted how the elements of this water right should be decreed by the court.

An objection to the *Director's Report* for water right 57-07291 was filed by Ted Gammett. Subsequently, the objection was withdrawn by stipulation of the parties; now therefore,

IT IS THEREFORE RECOMMENDED that subcase 57-07291 be decreed as recommended in the attached *Preliminary Special Master's Report and Recommendation*.

DATED June 20, 1997.

II. STATEMENT OF THE RESPONSE

1. ☒ Name and Address: I respond to the objection concerning the name and/or address of the owner of the water right.

REASONS SUPPORTING EACH BOX CHECKED

In response to Statement of the Objection item 1 and all allegations of the objection regarding this item IDWR responds as follows: This is a dispute over the ownership of a water right between the owner of the place of use (the United States) and the holder of a federal grazing permit to these lands (the objector). Generally, in landlord/tenant type disputes over the ownership of a water right based on appropriation, the water right is presumed to be owned by the owner of the place of use unless a mutual intent to the contrary is clearly shown. As to this water right, the objector did not submit evidence to IDWR sufficient to overcome the presumption. IDWR therefore denies the objection and all allegations of the objection not expressly admitted herein.

CHANGES TO THE DIRECTOR'S REPORT

The director proposes no changes to the description of this claim in the Director's Report.

REASONS SUPPORTING EACH BOX CHECKED

(BOX 1) This water right was developed by historic use for stockwater by private individuals on unappropriated open range. Our current Federal grazing permit is based on that historic use and was awarded through an adjudication process in 1935. Our privately owned grazing permit can be bought, sold, traded, inherited and taxed and is totally dependent upon our continued ability to use this water right. Therefore the name on this water right should be ours.

REASONS SUPPORTING EACH BOX CHECKED

(BOX 1) This water right was developed by historic use for stockwater by private individuals on unappropriated open range. Our current Federal grazing permit is based on that historic use and was awarded through an adjudication process in 1935. Our privately owned grazing permit can be bought, sold, traded, inherited and taxed and is totally dependent upon our continued ability to use this water right. Therefore the name on this water right should be ours.

DIRECTOR

December 28, 1992

US Department of Interior
Bureau of Land Management
Attn: Jeff Runkle
3380 Americana Terrace
Boise, ID 83706

Dear Jeff:

Enclosed are several documents which were a result of the Notice of Error procedure for the Bureau of Land Management proposed recommended rights in Basin 57. I will attempt to explain each different grouping along with any action still required.

Group A consists of a copy of the proposed recommended rights for BLM showing the changes requested and our actions taken. These were prepared during the Notice of Error procedure and are the State rights only (Federal right changes are in Group B). No further action needs to be taken on these rights as far as the Department is concerned.

Group B consists of a copy of the proposed recommended Federal rights for BLM again showing the changes or deletions requested and our actions taken. Profile reports of the rights that were changed are also enclosed per your previous request. In this group there were two claims that you requested be deleted which were not one of the "A" suffix claims we created in error. (Note: There were several "A" suffix claims generated for the federal portion on the BLM claims that were each filed as a state and federal right. The federal portions could only be for spring sources and some "A" suffix claims were generated in error on stream sources-these have been deleted as indicated). The two claims not in this category were claims filed as federal rights which you requested be deleted. In order to delete originally claimed rights, the claims need to be documented as filed and then withdrawn. Therefore, please sign the enclosed withdrawal forms for these two claims and return them to our office.

Group C is a statement of acknowledgement and approval along with the listing of instream stockwater rights that we amended by adding quarter-quarters to the points of diversion and places of use. These were the BLM claims filed with the location of the beginning and ending points on the streams shown in the place of use and only one point of diversion listed. Quarter-quarters were added based on Departmental requirements for filing instream stockwatering claims which require that the beginning and ending points be shown in the point of diversion and all the quarter-quarters in between those two points shown as the place of use. Therefore, based on the information claimed by BLM, a quarter-quarter was added to the point of diversion, usually as an ending point, and the quarter-quarters between the two beginning and ending points added to the place of use. This approach was agreed upon at our first meeting at the State

office with IDWR personnel, Gary Madenford, Jack Hockberger and yourself. It was also verbally agreed that the BLM would supply some type of documentation at a later date to substantiate the increases since an amended claim is usually required for any increase, however, due to the time constraint for the Basin 57 Director's Report a verbal agreement was made at that time. Therefore, please sign and notarize the enclosed statement and return it to this office.

Group D is a statement of acknowledgement and approval along with the listing of rights that we amended by either increasing or adding items to the claim to match what had been decreed or licensed previously for that right. These claims were originally filed for less than what was licensed, and after pointing a few out to you it was decided and verbally agreed upon to increase the claims in question to what had actually been decreed or licensed. Due to our limited time we could not review all of BLM's decreed or licensed rights to see if an increase was needed, therefore, this list shows only those rights we could locate easily within the time we had left. I'm sure there are still BLM claims in the Basin 57 report that were claimed and recommended for less than what was on the existing right. In normal review of claims the Department is not required to locate and increase claims that are filed for less than what was decreed or licensed and only does so upon request from the claimant on a specific claim number and upon receipt of an amended claim. As with the other increases mentioned above we also need documentation in our files that these increases were agreed upon and the enclosed statement needs to be signed and notarized and returned for our files. Please note that it is to the BLM's advantage to sign and submit both of these approval forms since the claims were increased and would now have to be decreased if no documentation is submitted.

Hopefully this is all of the catch-up items needed and I am sorry for the delay in getting these back to you after the Basin 57 deadline, however, due to family illness, I have been in and out of the office quite a bit these last two months. All of us in the Adjudication Section at Western Region enjoyed working with you and appreciate your cooperative and patient attitude during a very busy and stressful time. If you think of anything else or have any questions, please feel free to contact me.

ACKNOWLEDGEMENT AND APPROVAL BY THE BUREAU OF LAND MANAGEMENT TO IDWR
FOR AMENDMENTS MADE ON THOSE BASIN 57 BLM CLAIMS AS LISTED AND
EXPLAINED ON THE ATTACHED SHEET

The attached listing of Snake River Basin Adjudication claim numbers were changed either by adding items or increasing items on these claims to match what had previously been decreed or licensed, with one increase on a beneficial use claim to correct the total amount of water claimed. The attached list explains what was increased or added for each claim per a verbal agreement with the Bureau of Land Management. This verbal agreement, in place of amended claims, was made due to the limited time period remaining during the Notice of Error procedure prior to submittal of the Basin 57 Report to the Court on October 13, 1992. By signing below, the Bureau of Land Management acknowledges the verbal agreement for these changes and approval of the changes made to these claims, as shown on the attached listing.

ACKNOWLEDGEMENT AND APPROVAL BY THE BUREAU OF LAND MANAGEMENT TO IDWR
FOR AMENDMENTS MADE TO THE POINT OF DIVERSION AND/OR PLACE OF USE FOR
BLM'S BASIN 57 INSTREAM STOCK CLAIMS LISTED ON THE ATTACHED SHEET

The attached listing of the Bureau of Land Management's Snake River Basin Adjudication claim numbers were amended by adding the beginning and/or ending points of instream stockwater use to the point of diversion. These points were originally claimed by the Bureau of Land Management under the place of use, with one point, usually the beginning point, in the point of diversion. The claims were also amended by changing and/or adding, to the place of use, the 1/41/4's on the stream between the beginning and ending points. These were amended by IDWR per a verbal agreement with the Bureau of Land Management. This verbal agreement, in place of amended claims, was made due to the limited time period remaining prior to submittal of the Basin 57 Report to the Court on October 13, 1992. By signing below the Bureau of Land Management acknowledges this verbal agreement and approval of these changes.
