REASONS SUPPORTING EACH BOX CHECKED

In the space following, you must state the reason(s) by number for each box checked. You may use additional pages if necessary.

The United States of America, acting through the Bureau of Land Management, objects to this water right recommendation because the claimant is a private individual claiming a water right on public domain lands. The BLM, on behalf of the United States, has managed and controlled this property for the beneficial use of the American public. The claimant has no property interest in the claimed water right or any other water right appurtenant to federally owned lands. The United States objects to all aspects of the right because of these facts, including the recommended name and address, source, quantity, priority date, points of diversion, purpose of use, period of use, place of use, and consumptive use. BLM also objects to the recommendation in its entirety because claimant has not been the exclusive beneficial user of this water given that other members of the public have had access to this land and water source.

CHANGES TO THE DIRECTOR'S REPORT

Specifically describe how you want the Director's Report to be changed. You may use additional pages if necessary.

The Directors report should be changed to recommend disallowance of this claim.

Please note: You should attach copies of documents which support your objection. Note on each document the "box number" it supports.

Dear Claimant(s):

On June 30, 1992, the Bureau of Land Management (BLM) submitted notices of claim to water rights located on BLM lands within the Department's administrative Basin 57 boundary located in Owyhee County. Your Notice of Claim(s) referenced above was filed for water uses on BLM lands for which BLM has filed a claim(s), on all or part of this right(s). Any rights you may have filed on BLM lands for which no claim was filed by BLM will remain in your name.

Based on information currently available to the Department, the water right(s) for these uses is held by the BLM. Therefore, your claim(s) is being partially or completely disallowed and the uses recommended under the BLM claim(s).

The report for Basin 57 is due to be filed with the court on October 1, 1992, therefore, if you have any questions concerning these recommendations, you may contact us for copies of these rights. In the Notice of Director's Report, you will receive information about filing an objection if you disagree with any water right or item within the Director's Report.

Sincerely,

for

FINDINGS OF FACT AND CONCLUSIONS OF LAW

A notice of claim was filed for this water right pursuant to I.C. § 42-1409(1990) by Chipmunk Grazing Association. The Director of the State of Idaho Department of Water Resources examined the water system for areas 1, 2, and 3 and investigated and abstracted the notices of claims for those Reporting Areas. SUBCASE CLAIMANT OBJECTOR

57-10916 Chipmunk BLM

DRAFT

This is a claim to a stream drainage containing several named and unnamed streams. There are several legals where there is no reach illustrated on the U.S.G.S. quad; are there actually streams there or are they erroneous (see map)?

The deletions involved are straight forward and does require redefinition of one beginning POD (B22); the addition of a beginning (B24) and ending (E22) POD due to the deletions; and a change in a remark to show 3 ending PODs instead of 2 (T03S R04W S07 NENW). However, I discovered other technical problems with the claim that don't involve BLM's objection.
