RE: Application for Transfer No 4622

Dear Mr. and Mrs. Daniels:

On May 24, you visited my office to file the above-referenced application for transfer, which proposes to add a well under your share of water right number 61-07185. At the time of filing, you presented a copy of your property description which shows the parcel as containing approximately 11 acres. The transfer application was prepared and signed based on an 11-acre share of right no. 61-07185.

Further review of right no. 61-07185 shows that only about 8 acres of your parcel was actually irrigated under this right. The southeast corner of the property was not developed. The 2 1/2 inches of water which you indicated was sold with your parcel is approximately equal to an 8-acre share of the right. Your claim to right no. 61-07185 cannot exceed eight acres unless you can show that a greater share of the right was released to you.

Unless you can provide evidence to the contrary, the acreage and corresponding rate of flow and volume values on your application for transfer will be reduced to show the irrigation of only eight (8) acres under right no. 61-07185 within your 11 acre parcel.

Please feel free to call if you have questions.

Sincerely,

Cindy Hodges

INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Section 42-1409(7), Idaho Code. This statute provides that new property owners notify the Department of Water Resources (IDWR) of any change in ownership of a water right during an adjudication of water rights, and if a claim for the water right has not been filed to file the needed claim(s).

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. If you would like any of these brochures or if you have questions about completing this form please contact your nearest office of IDWR or you may call 1-800-451-4129 (toll-free).

The first line of the form asks for the date of closing so IDWR will have a record of the effective date of the property transfer.

The second line of information requires the legal description of the property being transferred. This information is **ESSENTIAL** and should be available from the documents that will be present at the time of closing. The first two lines of the legal description **MUST** be completed. IDWR's records are based upon legal descriptions using township, range, section and fractions of a section descriptions; and this information must be included on the form. If you also have available a legal description based upon a townsite or subdivision and lot and block number, please also include this additional information. A lot and block legal description is **NOT** a substitute for the township, range, section and fraction of a section description.

After completing the legal description, if all water is supplied by a public service water supply you may check the first box; complete the name, address and telephone information for yourself, the new owner; sign the form in the space provided and return the form to the IDWR office nearest you.

If there are water rights associated with the property, the seller should be able to provide you with the water right number(s). The water right number(s) for the property are to be put in the space provided at the second box on the form. If you or the seller believe there are water rights for the property but the numbers are unknown, then you may wish to call or come into an office of IDWR for assistance in identifying the water rights for the property involved. If claims for the property have not been filed you will be so advised by IDWR.

After the water right number(s) for the property has been entered on the form, complete the name and address information for **BOTH** the former owner/seller and for yourself, the new owner, in the spaces provided. Please also include your telephone number. If the property you have purchased is only part of the property owned by the former owner/seller, you may be purchasing only part of the total water right held by the seller. This means the water right held by the seller must be split so you get your proportionate share of the water right. Be sure to include a description of the portion of the water right you have purchased. The seller should be able to help you describe the portion of the water right for the property you have purchased.

If the former owner/seller will sign the form and the seller is shown as the claimant of the water right in IDWR's records, then you do not need to attach proof of ownership of the land or the water right. The seller should know if the original claim was filed by him, or if the seller has filed a change in ownership so the seller is shown as the claimant of the water right in IDWR's records. If the seller is not going to sign the form then you must attach some proof of ownership of the property described at the top of the form or proof of ownership referencing the specific water right(s) for the property.

The new owner must sign the form in the space provided. If the former owner/seller is available to sign the form please do so in the space provided.

When complete, the new owner and the former owner/seller should each retain one of the copies and return the original of the form to IDWR. You may return the form to the IDWR office nearest you or to: Idaho Department of Water Resources, Statehouse Mail, Boise, ID 83720-9000, Attention: Adjudication Bureau.

Conditions of Approval:

- 046 - Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
- R31 - This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.0 afa per acre for irrigation of the lands above.
- 01M - After specific notification by the department, the right holder shall install a suitable measuring device or shall enter into an agreement with the department to determine the amount of water diverted from power records and shall annually report the information to the department.
- T07 - The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
- T08 - Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
- T09 - Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

RE: Sales of Land Under Water Right License 61-07185

Dear Mr. and Mrs. Yekel:

On 5/24/95, Stanley and Mary Daniels visited our office and said that they had recently purchased some property from you. Mr. and Mrs. Daniels have drilled a well on that property and have filed an application for transfer to use the well for irrigation under that portion of water right no. 61-07185 which is appurtenant to the property. Information which the Daniels' submitted indicates that 2½ miner's inches of water were intended to be conveyed with the property. The same document also indicates that other lots in this area have been sold, each with a specified share of right no. 61-07185.

The purpose of this letter is to make you aware that a formal process exists for the division of appurtenant or developed water rights. Please be advised that informal or verbal apportionments of water rights between buyer and seller are not considered to be valid and are not recognized by this Department.

Under Idaho law, when an existing water right is split, a pro-rata portion or share of the right is automatically conveyed along with each developed acre sold. If the warranty deed is silent as to the distribution of the appurtenant rights, pro-rata disbursement is presumed. In order for any portion of an appurtenant right to be withheld by a seller, a disclaimer must be formally noted as a condition of sale on the warranty deed or other recorded document.

I anticipate that other transfers or claims to portions of right no. 61-07185 are forthcoming from new owners. If your intent was or is to reserve portions of this developed right for your own use, you must obtain and submit amended warranty deeds or other notarized documents, signed by both buyer and seller, acknowledging the release of specified portions back to you.

Transfer filings through this office will be required for new owners to add additional wells for irrigation. A transfer may also be required of you, if reserved portions will be moved from their original place of use.

Please contact me if you have any questions.

Sincerely,

Cindy Hodges
Sr. Water Resource Agent

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to reflect cropping patterns or acceptable standards of water delivery efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.

To provide additional time in which to submit
proof of beneficial use on a water right permit

Department of Water Resources

JOHNNY &/or CARYL F. YEKEI of Route 1, Box 679A, Mountain Home
(Name) (Address)

State of Idaho, deposes and says:

That he is the holder, or the duly authorized agent of the holder*, of Permit to appropriate the Public
Waters of the State of Idaho No. 61-7185.

That under the terms and conditions of said permit, work thereunder was required to be completed on or
before June 1, 1979.

That he has heretofore performed the following work described under said permit:
Permit holders have drilled the well, installed the pump and are using the water for
25 acres of irrigation, watering some stock, and using the water for domestic purposes.

Costing \$ 8,000

That he is unable to complete the remainder of the work within the required time for the following
reasons, to-wit: Permit holders need more power to generate a larger pump to pump more
water. This entails having Idaho Power run a powerline about 3/4 of a mile to the
pump site.

Wherefore, he asks that the Department of Water Resources extend the time for the completion of
obligations under said permit to June 1, 1984.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

IT IS HEREBY ORDERED that the above application for extension of time be APPROVED AND THE TIME
WITHIN WHICH TO SUBMIT PROOF OF BENEFICIAL USE OF WATER IS EXTENDED TO JUNE 1, 1984.
