- Transfer 5145 moved the P/D from S01, to its new location in S06, approved December 16, 1997. Since then, no-transfer has been filed to add this point of diversion to 61-07264A or B.
- Proof of the new well located in *NWNW, S06, T03S, R05E LT 04* is shown by well log permit 61-97-C-0055-000, well tag 00000272. Completed 1 June 98.

Dear DESERT SEA FARMS:

We have received and processed a Change of Ownership for a portion of your original Claim to a Water Right Number as referenced above. This change of ownership resulted in a split of your original claim.

When a portion of the original water right claim has been conveyed to another and the original right has been split, then the original claim number is renumbered by adding alpha suffixes to represent each split. Each split contains only the portion of the original right for each separate owner. The above referenced new claim number reflects your remaining portion of the original claim after the change of ownership. Enclosed is a copy of this new claim for your records. Please refer to your new claim number when corresponding with our office.

If you have any questions concerning this ownership change or the enclosed claim copy, please feel free to contact this office.

Sincerely,

Ron Howerton

MEMORANDUM

TO: FILE

FROM: STEVE LESTER 

DATE: NOVEMBER 6, 1997

RE: RECOMMENDATIONS FOR T.5145, DESERT SEA FARMS

This is a simple transfer to change a diversion point from Section 1 well to a new well to be drilled in adjacent site in Section 6. There does not appear to be any problems with approving the transfer. The incorrect flow rate for 61-07263 on page 1 and the incorrect well site in Section 1 on page 6 of the application do not need to be corrected by the applicant as explained in this memo.

The two licenses use Section 1 well plus another well located northeast in Section 31. Note that a third right also uses the Section 31 well (61-07264) but does not use the Section 1 well so that right is not involved in the transfer.

The two SRBA claims reflect the licenses except that the Section 1 well is claimed in Lot 5 (SENE) instead of licensed Lot 1 (NENE) plus A63-07263 claims 3.30 cfs instead of the licensed 2.40 cfs. I spoke with the applicant contact, Mr. Larry Esson, on his October 29 office visit. He does not have any information to support the claim differences and did not appear concerned about claim corrections to match any transfer approval to be issued.

The legal notice included the claimed differences to allow proper notification as required. No protests resulted.

Ownership records are in order for both rights via the completed change in ownership filed by the applicant in 1994. Transfer Attachments A and B authorize access to the proposed well site in Section 6, although that authorization does not appear to be needed per ownership records for the NW 1/4 S. 6 (A61-07263 in the applicant's name).

CORRECTION OF REMARKS IN 61-07263

Note that right 61-07263 includes a remark linking the right to 61-07262. That appears to be a typo error since the latter right has nothing to do with the rights in question. The remark should refer to right 61-07264 from the 1987 field exams, and it can be corrected in the transfer decision.

CLARIFICATION OF SECTION 1 WELL LOCATION

Some confusion occurs in the water right and SRBA records for the well in Section 1. The 1987 field exams showed that the well was in Lot 1 (NENE). The tract lines for the section are abnormal due to large government lots.

The water right P/D index lists ground water in Lot 1 (NENE) for 61-07247B and 61-07263. It also shows ground water in Lot 5 (SENE) for 61-07203B, a split that included a change in P/D and P/U for Mr. Hickey per T.4328 issued in 1994 after that right was licensed.

The SRBA P/D index includes ground water in Lot 5 (SENE) for claims A61-07203B (Hickey as above) and A61-07247B plus A61-07263 plus A61-07264 (all for Desert Sea Farms). No ground water is shown in Lot 1 (NENE). The latter three claims contradict the 1987 license reports.

All of this can be clarified very easily. The current well location in Lot 1 was reconfirmed by a site visit yesterday (see attached notes). The well is close to the tract line but is definitely in Lot 1. No well is found in Lot 5 as verified by the 1987 and 1997 field visits. Note that no well drilling activity has been indicated for NE 1/4 Section 1 per well drilling database check. It appears that a case of mistaken 1/4-1/4 has resulted from the abnormal shape of the tracts due to large government lots found in the section.

Transfer approval will correct claims A61-07247B and A61-07263. Claim A61-07264 can be corrected by the claimant to delete reference to a Section 1 P/D. License 61-07203B and claim A61-07203B can be amended by Mr. Hickey or his successor: transfer application that would not need to be advertised to simply correct an error that was easy to make per above explanation?

RECOMMENDATIONS

61-07247B for 1.20 cfs, wells in S.31 (existing) and S.6 (proposed);

61-07263 for 2.40 cfs, wells as above, clarify remark about linkage to other rights;

total flow is 3.60, not 4.50, cfs;

request for expedited drilling permit should be denied (?) -- see second memo also with today's date;

A61-07264 can be addressed by regional SRBA staff;

61-07203B and its claim can be addressed by regional allocation staff.

③ Hp equation where

$$H_p = 700 \text{ (max possible)}$$

efficiency = .6 (reduced from .8 to account for loss
in intricate plumbing)

$$\left. \begin{array}{l} \text{psi} = 80 \\ z = 258 \end{array} \right\} \text{ as stated by operator}$$

$$Q = \frac{(8.8)(.6)(700)}{(2.31 \times 80) + 258} = \frac{3696}{442.8} = 8.35 \text{ cfs}$$

Thus, in reviewing flow estimates:

$$\text{sprinkler} = 11.36 \text{ cfs}$$

$$\text{pump tests} = 8.91 \text{ cfs up to } 24.40 \text{ cfs (main pump, no boosters, up to } \\ \text{main pump, \& boosters)}$$

$$\text{hp equation} = 8.35 \text{ cfs}$$

Sprinkler estimate based on $\frac{5}{32}$ " nozzles, the majority used. However, some $\frac{9}{64}$ " are used. With $\frac{9}{64}$ " at 4.04 gpm/ft², flow is 9.22 cfs. An average value for both nozzles used is 10.29 cfs.

Hp equation variables cannot be more closely determined than as above. The 8.35 cfs is within a reasonable range of sprinkler and pump test figures.

REC'D
FLOW $\rightarrow$ The 537 acres may be licensed for an inch per acre:

$$537 \times .02 = 10.74 \text{ cfs}$$

10.74 cfs is supported by the various estimates.

System Description (continued)

3. Narrative: Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

A 522' deep well with 20" casing has a 400 hp. system with 4 boosters. Total hp is 700. 8", 10", 12" lines from pumps converge into a 16" mainline and a 10" mainline. 16" line runs NE and reduces to 12" and 8" branches. The 10" line runs NW and eventually hooks into common 10" line with well in NENE S. 1 (61-7247B & 7263). This permit covers 537 acres in S. 31 & 32. Normal operation consists of 4" risers using 3" handlines for 32 lines using 32 hds./line. Sprinklers include Rainbird 30 E, WS, or EWS and Nelson F33 with 5/32" or 9/64" nozzles (mostly 5/32"). This pumping station was used in 1987. Sprinkler lines were stacked by PLO during exam. Pivots have not been used for at least 3 years. Normal psi is 80 at pumps and 50 at ends of lines. ☐ See Remarks on page 4 for continuation

Although no overlap is recorded, this well is tied to well in NE NE S.1 (61-22478 & 7262) via a 10" mainline. Mr. Wood stated that well in S.1 has not been turned on for last 2 or 3 years. This well for 7264A has ^{also} been sealed as PUD for acres in S.1, T.3S., R.4E., and S.6, T.3S., R.5E.

Reel splitting WR into:

part A J. Wood et al.

part B Bryce & Wayne Hergert. Possibly would need parts B & C if the two Hergerts want separate WR's.

Hergert Farms filed ^{for} bankruptcy. Sheriff's certificates of sale # 8907, 9837, 9838 will serve as assignment documents as indicated (certificates etc. attached).

RE: Field Exam Scheduling Letter for the following Adjudication Claims:

A61-07247B, A61-07263 & A61-07264.

Dear Mr. Ballantyne,

The Adjudication Staff of the Department of Water Resources will be conducting Snake River Basin Adjudication Claim Examinations for Elmore County from July through November 1994.

Information on your claim that may need to be verified includes, source(s) of water, uses and amounts, legal descriptions of point(s) of diversion, place of use and in some cases documentation verifying the date of priority as claimed in the Snake River Basin Adjudication.

Although it is not mandatory that you accompany me, should questions arise during the exam, it would be most helpful for yourself or a knowledgeable representative to be available during the field exam. This will help in the accuracy of collecting specific information about your water right and speed up our findings.

I would appreciate your call ASAP to set-up a field exam date. I may also be calling to help speed up the scheduling due to the short field season this year.

If you have other questions prior to scheduling a date or about the field examination, feel free to call me on that too. Please call today to set-up your exam!

Sincerely,

Ron Howerton
