61-07274, 61-07298 and 61-07306B - Connecticut General Life Insurance Company/
Herbert Montierth et al**

Dear Ms. Bock:

For reference purposes, please find enclosed herewith copies of the following documents and/or correspondence:

1. Mortgage dated August 31, 1988 granted by Herb R. Montierth et al to Connecticut General Life Insurance Company secured by certain real property located in Elmore and Ada County, Idaho.
2. Assignment of Mortgage in connection therewith from Connecticut General Life Insurance Company to Western Mortgage & Realty Company dated October 28, 1996.
3. Satisfaction of Mortgage documents (2) executed by Western Mortgage & Realty Company.
4. Copy of correspondence from Connecticut General Life Insurance Company dated February 25, 1999 advising that they no longer have any security interest in the above described Water Rights.
5. Special Warranty Deed from Connecticut General Life Insurance Company to Herbert R. Montierth et al.

The above water rights were originally pledged to Connecticut General for security purposes in connection with a mortgage loan granted by Connecticut General to the Montierth's when the Montierth's repurchased the real property from Connecticut General. The beneficial interest in connection therewith was subsequently assigned to Western Mortgage. Said mortgage and the related promissory note have been fully satisfied and therefore, Connecticut General and Western Mortgage claim no further interest in and to these water rights.

Please transfer the above water rights to Mr. Herbert R. Montierth and Golda Darlene Montierth, husband and wife, Edward Ray Montierth and Susan Montierth, husband and wife, and Rodney K. Montierth, a single man. If you should have any questions with this request, please advise at your earliest convenience.

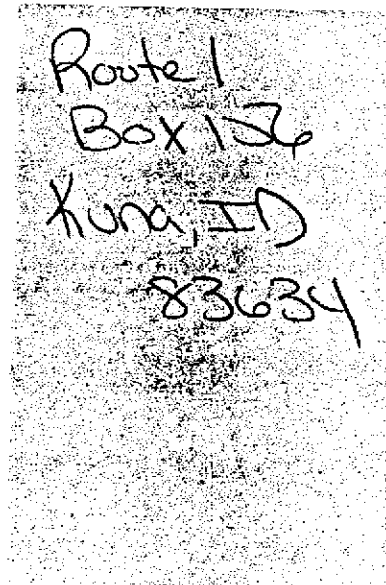

Sincerely,

Tim M. Tippet

CONDITIONS OF APPROVAL AND REMARKS

1. This water right is appurtenant to the described place of use.
2. This right is subject to all prior water rights and may be forfeited by five years of non-use.
3. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
4. A measuring device of a type approved by this Department shall be maintained as a part of the diverting works.
5. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.0 afa per acre for the lands above.
6. Rights 61-07196, 61-07206C, 61-07240, 61-07265, and 61-07298 when combined shall not exceed a total diversion rate of 9.63 cfs from the well identified above, a total annual diversion volume of 3288.0 af and the irrigation of a total of 822 acres in a single irrigation season.
7. Rights 61-07196, 61-07206C, 61-07240, 61-07298 are also diverted through the point of diversion described above.

FROM: Cindy Hodges

RE: B/U Examinations, Montierth System #3 (South Cinder Cone Butte)

NOTE: These files were previously forwarded to S.O. for licensing but recalled by me for modifications to original recommendations.

The well used to develop the above rights is one of two interconnected wells licensed for a system common to right nos. 61-07196, 07205, 07206, and 07240 (Wing rights). Steve Lester conducted examinations of the four Wing rights in 1987 and identified the shared well as well #2. Steve's exams corroborate my information that well #1 was used exclusively for the Wing rights and well #2 was used on an alternating basis between Wing and Montierth. A valve in the interconnecting line may be used to isolate well #2 (see diagrams in 61-07240 and 61-07265).

In 1987, the system capacity of the two wells was assessed at about 19.26 cfs, or 9.63 cfs per well (each well fitted with identical equipment - see 61-07240). A total of 923 acres were licensed under the Wing rights with a combined rate of flow of 18.46 cfs. No restrictive conditions appeared on the licenses. 0.8 cfs was available from the system as strictly unappropriated flow.

Total found acres served by the diversion system at the time of my exam are 1222 (923 Wing, 299 Montierth). All found acres entered CRP beginning in 1989. Prior to CRP, these lands, like most other operations in the Cinder Cone area, were farmed in rotation. Consistent with other recent licensing, an accounting of cropping patterns and land rotation for the five years prior to CRP is required to verify the actual extent of development.

ASCS crop records were used to license the Wing rights; copies may be found in 61-07205. Compliance photography from Elmore County ASCS (Farm Services) for the years 1983-1988 was used for verification of the Montierth acres for the above permits (see attachment A). Photography evidences the irrigation of all 299 Montierth acres during the 1985 irrigation season.

The single well used for development of Montierth permits 61-07265 and 07298 has a potential of 9+ cfs and may easily provide one inch per acre for 299 acres, or 5.98 cfs. The configuration of the diversion works makes it exempt from POD overlap analysis per the draft guidelines, which describe acres irrigated separately. System volume capacity is not a limiter. Thus, it is appropriate to recommend all 299 acres under the Montierth permits at 5.98 cfs and limit diversion rates back to the total system capacity when combined with the Wing rights.

However, overlap analysis with regard to consumptive development is not complete without investigating the combined rotation patterns on the two farms, especially for 1985. The comparative cropping histories for the two farms are shown on Attachment A. In 1985, three years prior to CRP entry, a combined maximum of 1107 acres were irrigated from the common system. (system rate = 0.017 cfs/ac)

Primary cash crops for both Wing and Montierth have been beets or potatoes. In the Cinder Cone area, irrigation application rates of one full inch per acre or better are required to meet rotation schedulings for potatoes during peak demand periods¹. In order to provide for peak application rates for more than about 960 acres under this system (19.26 capacity/0.02), it would be necessary to fallow some acres or plant a calculated ratio of lower demand or earlier maturing crops.

In 1985, approximately 425 of the 808 Wing acres were in beets or potatoes, another 75 were in beans, and the balance of 300 were in grain crops. Crops are unknown for the 299 Montierth acres. Considering that at least 300 acres were in grain for that year, the balance of the irrigated acres (800 or so) could have had one full inch per acre application rate available by mid-season, if irrigation was discontinued on the grain. However, I suspect that the crop ratio found for 1985 still required certain irrigation schedulings which crowded the logistical delivery limits of this system. Because of this demonstrated limitation, a restrictive condition on yearly diverted and consumptive volumes is necessary.

Please note that the above analysis was based on the presence of the overlapping Wing rights as they existed at the time of my exam. However, all of the irrigation (160 acres) from 61-07205 and 240 acres from 61-07206 have now been transferred away from the Cinder Cone area and are no longer diverted from these wells. Recommendation is based on the original overlapping rights; conditioning references only the remaining splits of those rights. Otherwise, the limitations imposed would not be meaningful. Because 400 acres were removed from the system, 400 acres and 8.0 cfs will be subtracted from conditioning amounts.

The following restrictive condition (or its likeness) is recommended for this right:

Use of this right with right nos. 61-07206C, 61-07196, 61-07240 and 61-(7265/7298) is limited to a total diversion rate of 11.26 cfs, a total yearly diversion volume of 2828 AFA and the irrigation of 707 acres within a single irrigation season.

¹ From articles by Dorrell Larsen in Energy-Efficient Irrigation Practices Handbook (IDWR and U of I), and Soil Survey of Elmore County Area, Idaho (USDA, 1985 survey).

Re: Snake River Basin Adjudication (SRBA)
AR #C000037

Dear Mr. Montierth:

By your failure to pay the late fees as requested in my January 17, 1992, letter to you, the adjudication staff will continue processing only four of the claims (A63-07427A, A63-07427B, A63-07753, A63-07982). All the others listed below will go in a rejected status until such time as the late fees are paid.

A61-07210	A61-07265	A61-07274

A63-03196B	A63-03198	A63-03311
A63-07425		

The staff is beginning the early phases of investigating claims in Basin 61 where a bulk of your claims subject to the late fees are located. Of course, no recommendation of the rejected claims can be made in the reports for Basin 61 that are scheduled for release later this year and early next year. Such timing requires investigating claims for irrigation use in Basin 61 during the coming growing season.

I believe you can appreciate the urgency to complete the filing process. Upon receipt of your payment of \$942.00, the subject claims can be investigated. Thank you for attending to this matter as quickly as possible.

If your payment is in the mail, we apologize for this letter.

Regards,

Donald V. Shaff
