THIS CLAIM HAS BEEN AMENDED TO REFLECT THE USE OF THE WATER FROM
THE CLAIMED WELL AT A SHOP BUILDING ON ONE OF THE LOTS WITHIN THE
ASSOCIATION. 12/21/1994 MM.

Date: 01/04/1995 User-ID: MMINICUC Subject: DIVERSION RATES AND VOLUMES
THE DIVERSION RATE CAPACITY FOR THE SYSTEM WAS DETERMINED BY
THEORETICAL CALCULATION, BASED ON IDWR'S FIELD EXAMINER'S
HANDBOOK. ALSO, HIDDLESTON DRILLING CO., WHO INSTALLED THE
LATEST PUMP, PROVIDED THE MANUFACTURER'S PUMP CURVE FOR THE PUMP,
WHICH MATCHED THE THEORETICAL CALCULATION. PUMP CURVE GRAPH IN
FILE.
THE DIVERSION VOLUME CALCULATIONS ARE IN THE CVR. TOTAL (YEAR-
ROUND) DIVERSION CAPACITY IS 28.96 ACRE-FEET; DIVERSION VOLUME
CAPACITY DURING THE IRRIGATION SEASON IS 16.95 ACRE-FEET (THIS
CALCULATION ASSUMES THAT .04 CFS IS DEDICATED TO IRRIGATION
DURING THE IRRIGATION SEASON). ALTHOUGH IT APPEARS THAT THE
SYSTEM IS INADEQUATE FOR THE CLAIMED USES, ALL USES WERE
CONFIRMED DURING THE FIELD EXAM. THE CLAIMANT INDICATED DURING
AN OFFICE VISIT THAT THE WATER USERS MAKE ADJUSTMENTS WHEN WATER
FLOWS BECOME A PROBLEM. AT THIS TIME, 14 PEOPLE LIVE IN THE

NOTES: 08/15/1994: Affidavit submitted by Tls. Tennant verifies 1955 date.
01/04/1995: Discussed language of affidavit w/claimant. He understands Tls. Tennant's intention is that the well has always been used in conjunction with houses and not as irrigation crop land. This is a logical explanation. The Anderson Ranch dam was built in 1950, & it probably took a few years to get the houses moved & set up. Tls.

SYSTEM DESCRIPTION:

Six inch well, 274 ft deep. On 08/28/1988 the static water level was measured by Hiddleston drilling at 152 ft, and the pump was set at 248 ft. On 01/20/1991 Hiddleston measured ^{the} static water level at 122 ft and set the pump at 266 ft. Pump is 2HP with electric motor (282 3018 103). 3 pressure tanks (80 gallons each), piped to 7 houses and 1 shop building. Pump is set @ 30-50 psi (on-off) in the winter, and 40-60 psi (on-off) in the summer.

01/04/1995: Calculations are based on IDWR standards (Field examiners handbook).

See next page for volume capacity calculations.

01/04/1995: Even though the rate of diversion (.04 CFS) is low for seven homes the field exam confirmed the claimed uses. The water users adjust during periods of low flow. Currently there are 14 people in the 7 homes - the shop is used for maintenance of trucks & is not in itself a business. The shop does not presently irrigate any grounds.

Substance of Communication Mr. Thomas came in to sign the amended claim and to discuss the delivery system. There are no additional wells or pumps. The pressure switch for the pressure tanks is set @ 30-50 psi (on-off) in the winter and 40-60 psi in the summer. Each of the 3 pressure tanks is 80 gallons. 14 people live in the houses served by the well. Users make adjustments during periods of low flows.

RE: Notice of Claim to a Water Right No. A61-10356

Dear Mr. Thomas:

This office is reviewing the above referenced claim to a water right. At this time there are two items that require a response from you.

The first item pertains to the enclosed computer generated claim form. This amended claim is based on the claim that you originally filed with this department on November 16, 1989. The commercial use for the shop building should have been listed as a separate use on the claim; this was an oversight by the department. The enclosed claim form does not change your claim in any way except to dissect out the commercial use and list it as a separate use of water (Item 6). This change brings the claim into conformance with department rules and regulations for the proper description of a water right.

Please review the enclosed claim carefully; if you agree with the water right as described please add your notarized signature to the claim and return it to this office. If the amended claim is not returned to this office IDWR will not be able to recommend the commercial use.

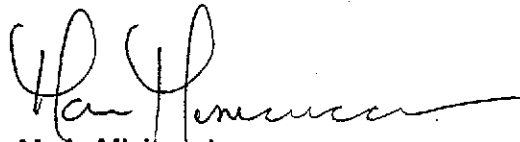

The second item pertains to your water delivery system. Hiddleston drilling has provided this office with information about your well and pump. They have indicated that you have a 2 horsepower pump set at 266 feet. Based on the pump manufacturers' statistics, your well is capable of producing a maximum of approximately 19 gallons per minute (gpm). This is equivalent of .04 cubic feet per second (cfs). You can compare this number with the cfs claimed in Item 6 of your claim. It appears that your system is not capable of serving all of the claimed uses, in particular the .12 cfs claimed for 7 homes.

The field exam conducted August 8, 1994 found that all the uses claimed appear to be valid. The most obvious conclusion is that IDWR does not have all the pertinent information about the delivery system. At this time we would like to request any additional information that you have about the water delivery system for Jerome Pump Addition. For instance, do the pressure tanks provide pressure in addition to that provided by the pump, and if so what is that amount of pressure? Do some of the homes have supplemental wells; is Jerome Pump Addition on Mountain Home city water?

Please submit any additional information about the water delivery system to this office within 30 days of this letter. If no additional information is submitted, IDWR may not be able to recommend your entire water right to the court for decree.

If you have any questions regarding this letter or your water right, please do not hesitate to contact this office.

Sincerely,

A handwritten signature in black ink, appearing to read 'Maria Minicucci', with a long horizontal flourish extending to the right.

Dear Claimant(s):

In the past, you submitted the above referenced claim(s) in the Snake River Basin Adjudication. Enclosed is a computer generated print-out of the claim(s) for your reference only; this print-out is **NOT** to be returned or re-filed. You have indicated when this claim was filed that the water right(s) was based on either a "Statutory Claim" or "Beneficial Use" of the water. Water rights of this type are established by the historical use of water for a beneficial purpose, dating back to the time the water was first used, this date being the "**Priority Date**" as shown on the enclosed print-out. Your claim(s) has not been confirmed by a previous filing with the Department of Water Resources since there is no decree, license, or permit on file to verify the use of this water. For this reason, the Department is under a legal requirement to gather evidence from claimants supporting the date of priority for claims based on historical beneficial use of water. Any other claims you may have filed, that are not listed above, do not require evidence of priority.

Enclosed is a pamphlet entitled "**Evidence of Priority**" which describes why evidence of the priority date is necessary along with examples of types of evidence that can be submitted to fulfill this requirement. If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, may not be recommended to the Court for decree. This could jeopardize your water use under this right(s), if water availability problems arise in the future. It is our goal to decree the historical water rights within the Snake River Basin as accurately as possible. Field exams to verify claims in this area should be conducted this summer by Department personnel. Prior to conducting the field exams, we will contact you to discuss details and schedule a time convenient for you.

Please submit the required evidence supporting the priority date(s) by March 15, 1993, referencing all documents with the corresponding claim number(s). If you have any questions not covered by this letter, or the enclosed pamphlet, please call the toll-free number listed on the back page of the pamphlet or the Western Region office shown above.
