CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.

NORSTEBON

SUBJECT: A61-07435

1. Stan and Mildred Norstebon came in today to file claim A 61-07435.
2. I asked why he hadn't filed on it earlier and the explanation I got was that he didn't think he would use it anymore.
3. Dan Tomich our part time Allocation Agent had verified the POD and POU for another permit an this License was found in the same area. Thus, this claim could also be written up if a transfer was filed to show the correct POD tract.
4. Dan and I both met with the Norstebon's, we questioned Stan's explanation of irrigating acres in another tract other than what was licensed and it didn't seem clear to me what really occured at the POU. However, the licensed POU matched what he was claiming and the only hang-up here was that the POD wasn't correct. It seems like two wells were involved here and the well irigating the licensed POU seemed to be correct because it was licensed in the same tract as the POU. On our Ortho maps the POD was just to the West of the licensed POD.
5. I advised Mr. Norstebon to file an application for transfer to show the correct location of his P/D.
6. Later, Cindy Hodges thought she could save Mr. Norsetebon some money by seeing if our State Office would forgo the Transfer fees, since this seemed to be the Departments mistake.

An 8" well drilled to over 300 ft supplies water for 8 acres of irrigation. A two inch mainline carries water from the well to the place of use. A sprinkler system is used to apply water. Rows have 16 ^{OR 35} sprinklers. Nozzles are 5/32" size. 6 sprinklers were measured to have 55 PSI pressure. 12 w/20 PSI JS
