Change of Address

Dear Water Right Holder:

Thank you for notifying IDWR that the address presently in our records for the above listed water rights is incorrect. Although we have reached you at the address above we need your written confirmation this is your correct mailing address before we can change our records. Future notices related to your water right can be sent only to the address on your claim or as otherwise changed by you. The address in our records for water rights 61-00270B and 61-07069E is correct.

Please sign your name at the bottom of this letter and return it to our office. Make corrections to your name and address if necessary before returning this letter. Thank you for your help.

If your mail delivery address changes in any form, please contact us in writing so we can update our records.

If there has been a change in ownership of any of the properties connected with the water right referenced above, please call this office to obtain a form to make this required change to the water right records.

Sincerely,

Denise Buffington

NOTES: 09/15/1994: 61-07069 was split via transfee No. 3944. 61-07069(B) is left with 145 acres + 2.90 CFS. 30 acres + .60* CFS were split to other parties. 61-07069 & 61-07065 were limited to a combined CFS of 5.0 (system capacity). The limitation for A61-07069(B) should be 4.40 CFS combined CFS. NM

09/16/1994: other splits (via transfee) of [A61-07065] (A61-10841) 61-07069 should contain system limitation (w/61-07065) of 5.0 CFS (License condition) A61-07069C, which has been transferred off this well, is limited to .0135 CFS/acre. This is the only way to realistically limit the combined but now split rights to the licensed system limitation of 5.0 CFS. NM

NOTES: 09/15/1994: The claimed diversion rate is 6.92 cfs. When right No. 61-07065 was brought over from the WR data base to the AJ data base ~~the~~ item 6 was not changed although Item 7 was changed. Probably when the # was changed from A61-07065 to A6-10841 with the addition of license 61-07069 Item # 6 was overlooked. 6.92 cfs ~~is~~ is the # of acres claimed x .02. Claim does not mention licenses' limitation of 5.0 cfs for combined rights 61-07065 + 61-07069. mm

09/26/1994: This right may have been forfeited by Non-use. Claimant contact sent 09/26/1994 requesting info on last date well was used. mm

03/16/1995: Claimant returned power bill for 1991. Grass fire in 1994 previous to field exam obscured acres + burned down power line. Claimed diversion rate is combined rates from the face of the 2 licenses (pro-rated for acres). System capacity limitation not addressed.

A61-07069A: $23 \times .0135 \text{ cfs (system capacity per acre)} = .31 \text{ cfs}$

Trans. 3944 moved 7 acres of water to another location from another well. ~~Since~~ The only way to maintain the system capacity limitation is to limit that transferred right to the capacity per acre cfs.

This reduces the ~~#~~ amt diverted from the original pool to less than the actual system capacity, but to allow the full system capacity to be diverted by ~~only~~ only 2 of the 3 rights would constitute an expansion of the original right. mm

WATER RIGHT LICENSE

License of Water Right No. 01-7066 Priority Nov. 26, 1969 Amount 8.90 cfs

THIS IS TO CERTIFY, that JOHN GONLEY
of New York, New York, has complied with the terms and conditions of Permit
No. 01-7066 issued pursuant to Application for Permit dated November 26, 1969
and has submitted proof to the Department of Water Resources on November 29, 1974
that he has applied water to a beneficial use, an examination by the Department indicates that the works have a
capacity for the diversion of 8.0 cfs of water from a ground water source
tributary to _____ and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
Irrigation	from <u>April 1</u> to <u>Oct. 31</u>	at <u>8.90</u> cfs and	<u>877.5 acre feet or</u>
	from _____ to _____	<u>4.5</u> cfs and	<u>4.5</u> cfs per acre
	from _____ to _____	_____ cfs and	_____ cfs per acre

(Both dates inclusive)

Subject, however, to the condition that no more than 8.90 cfs of water be used at any one time, and
that the amount of water so diverted and to which such right is entitled and applied for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
877.5 acre feet per year, said waters to be diverted within the SW 1/4 SW 1/4 of Sec. 6
Twp. 3 S, Rge. 8 E, B. M. in the County of Elmore

WATER RIGHT LICENSE

License of Water Right No. 61-7069 Priority March 24, 1970 Amount 3.50 cfs

THIS IS TO CERTIFY, that JOHN GOELET
of New York, New York has complied with the terms and conditions of Permit
No. 61-7069 issued pursuant to Application for Permit dated March 24, 1970
and has submitted proof to the Department of Water Resources on April 4, 1975
that he has applied water to a beneficial use, an examination by the Department indicates that the works have a
capacity for the diversion of 5.0 cfs of water from a ground water source
tributary to _____ and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
<u>Irrigation</u>	from <u>April 1</u> to <u>Oct. 31</u>	at <u>3.50</u> cfs and	<u>787.5 acre feet or</u>
	from _____ to _____	_____ cfs and	<u>4.5 af per acre</u>
	from _____ to _____	_____ cfs and	
(both dates inclusive)			

Subject, however, to the condition that no more than 3.50 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and nonexclusive for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
787.5 acre feet per year, said waters to be diverted within the SW 1/4 of Sec. 6

RE: Notices of claim to a water right nos. A61-00269, A61-00275, A61-10841

Dear Mrs. and Mr. Percy:

This letter is to notify you of the progress of the review of your Snake River Basin Adjudication (SRBA) claims, and to explain the current status of the review.

There is a very important issue for your review with your surface water rights. Since a common irrigation system delivers both the surface ground water to your lands, each water right can be recommended for your entire farm. However, the right is limited to the cubic feet per second (cfs) rate of flow and acres recommended for the specific water right within the total acres of the farm. In other words, you can use the water right anywhere on the farm, but will be limited to the decreed amount of water to irrigate the decreed number of acres within the larger number of acres of the farm. The consequence of this flexibility is that should you sell a portion of the farm, a proportionate amount of each water right will go with the land, whether the water right was originally licensed or decreed on that land or not.

If you do not want your water rights recommended to the court this way, please contact this office by April 30, 1995.

A61-00269

This claim was originally filed in combination with another decreed right (61-00270) from Rattlesnake Creek as claim no. A61-10581. As we discussed on the day of the field exam, the decree is very specific regarding which right went with which lands. Right no. 61-00269 is appurtenant to your lands and right no. 61-00270 is appurtenant to the lands to the east. I believe I left a map with you, but if not, enclosed is a computer drawn map which shows the lands for each decreed water right. Your claim was split out to the two decreed rights, and A61-00269 will be recommended for the decreed amount of water (1.533 cfs) for 153.3 acres.

A61-00275

This claim was originally filed in combination with right no. 61-02037 for water from Rattlesnake Creek. Right no. 61-02037 is a license issued in 1913, and was superseded by the Rattlesnake Creek decree, which was issued in 1917. The

Percy

license and the decree describe the same water right, but since the decreed right overrides the licensed right, the claim will be recommended as decreed (1.21 cfs for 100 acres).

A61-10841

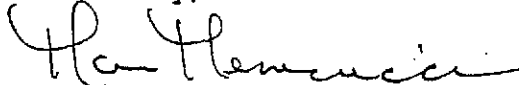

This is your claim on the large well. The claim is a combination of license no. 61-07065 and a portion of license no. 61-07069. Both licenses were issued on water from the well, but when used in combination, the rate of diversion is limited to the system capacity of the well. License no. 61-07069 has been split between yourselves and another property owner; the rate of diversion for all rights from the well is still limited to the system capacity of the well. Consequently your water right is less than the system capacity of the well.

Enclosed is a copy of the 1988 ASCS map. This is the map I used to determine the irrigated acres for your farm. If you have additional information (other maps, pictures, etc) which may indicate other irrigated acres, please submit them to this office to my attention. Please indicate the date of the information, and where you obtained it. I would be happy to review any other information that you can provide.

One final note: the claims on Rattlesnake Creek indicate instream stockwater use. Stockwater was not decreed in the Rattlesnake Creek decree, and if you want to claim that use a separate claim is required. You are not required to file a claim on instream stockwater. Enclosed is a claim form with instructions. The claim fee is \$25, and the fee must be included with the claim when it is returned to IDWR.

If you have any questions, or need clarification of any issues, please do not hesitate to contact this office.

Sincerely,

Maria Minicucci

This is in response to your letter of
Sept 26, 1994 regarding water right N^o
A61-10841.

The last time I used the well was
in August, 1991 (See enclosed copy
of statement).

The reason there is no power to the well
at the present time is because on July
9, 1994 a strong wind storm broke a
power pole and started a fire. The damaged
power lines, burnt pole & grass should
indicate that this is a recent and
temporary condition. I have contacted
Idaho Power concerning restoring
power to the well as I plan to use
it next spring.

Linda from Farm Credit returned my call. She was researching the property transfer between Grave & Percy to try to determine how where rights were split or not split.

There is no mention of Mr. Percy keeping all the water rights, as possibly implied by the warranty deed. Rod (Office Manager) remembers the transfer as including only the water rights which are appurtenant to the land.

The notes taken for the appraisal indicate that in Feb 1989 the pump was a 250 HP. No mention was made of the power being cut off, which Linda interprets to mean that there were no irregularities with the pump at the time of the appraisal (Feb 1989).
Goulet, the original license holder, was a partner in Danksin Cattle Co.
Clark Zastrow owned the ranch for a short time before the Graves.

CLAIMANT'S NAME: Percy

DATE: 09/21/1994

CITY: Elmore

EMPLOYEE: MM Minicucci

During a field exam on Mr. Percy's Ranch we discussed the following items:

- ① Claim A61-10581 should be split back out into 61-00269 + 61-00270. The decree clearly delineates the lands & there is no overlap. I showed the map to Mr. Percy, & he agreed to the split.
- ② POD on Rattlesnake Creek is different from the decree. Mr. Percy will pursue the date of change.
- ③ Expanded acres have been claimed. It was Mr. Percy's opinion that the current distribution of water began when the well (big one) was dug.

Ditches are no longer used on Mr. Percy's property. All irrigation w/ Rattlesnake Creek water is diverted by the pump behind the Percy's home. Not all of the acres are irrigated in any one season. The Ranch was in disrepair when Mr. Percy bought it in 1989 & a large grass fire made reseeding a requirement for a large tract of acres on the southern portion of the claimed irrigation. ^{big well}
I did not know ~~about~~ the power to the well was cut when I spoke to Mr. Percy & he did not mention it.

Kief Reservoir no longer used.

RE: Notice of Claim to a Water Right No. A61-10841

Dear Mr. and Mrs. Percy:

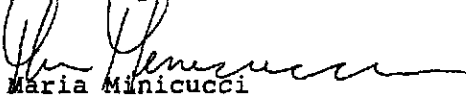

This letter is a request for information about your groundwater well located in Twp. 03S, Rge. 08E, Section 6, SWSW.

While conducting a field exam on September 21, 1994, I noticed that the power to this well had been cut. In order to continue with the investigation of this claim IDWR requires documentation of when the well was last used. This documentation may be in the form of power records, or may be an affidavit from a person with personal knowledge of when the well was last used.

A response to this letter must be received by the response date at the top of this letter. If no response is received, your water right may not be recommended to the court for decree.

If you have any questions or need additional information please do not hesitate to contact this office.

Sincerely,

Maria Minicucci
Water Agent, Adjudication Bureau

Mr. Percy returned my call. He indicated that Rattlesnake Creek is the primary water used on the farm - the well is used only as a back up (expensive to run - 300⁺⁺). Mr. Percy has a pump in the creek and the water goes immediately into pipes to sprinklers. This is the same irrigation system used with the GW source.

Percy + Greene share the well & the irrigation system. It is Mr. Percy's knowledge that the GW has not been used by Mr. Greene since 1989, as the pipe ~~th~~ to Greene's property has been stubbed off since that time (Percy moved onto the property in 1989).

Mr. Bob Banker is a previous owner/operator of the property. Mr. Percy will contact Mr. Banker for information on when the vob's on Rattlesnake Cr were changed, (acres expanded?).

Appt for field exam set for Weds Sept 21 7:30 am.
