RE: CHARTER MOUNTAIN RANCH

Dear Bruce:

Enclosed for your review are the stockwater claims we prepared using the information you provided in draft claim form. Four of the claims represent groundwater as a source and two utilize Cold Springs Creek water. All of the claims describe de minimus use which is limited to 1000 head of stock, 13000 gallons per day and no more than .24 cfs diversion rate.

We prepared four groundwater and two surface water claims because the priority dates and places of use are different for each source as it relates to the respective points of diversion. As an example, the hot water wells and the cold water wells are two different sources and the places of use and priority dates are quite different for these two sources.

The places of use are based on the maps you submitted and describe land privately owned by Charter Mountain Ranch, Inc. If you or John Mc Callum want to include public land in the places of use we need your specific direction.

We can recognize the de minimus characteristics of each claim without any additional information. However, if John Mc Callum insists that the claims reflect more than 1000 head we will need evidence to substantiate that the larger number was in place as of the priority dates claimed.

The aesthetic and wildlife uses were not included because we do not recognize them as historical uses in beneficial use claims. The ponds described on your maps were constructed for other purposes, such as, cooling, commingling of sources, etc.. Rights for these two uses should be developed in the Application for Permit process rather than SRBA claims.

We received Notices of Error signed by John Mc Callum for the Charter Mountain Ranch, Inc and ARK, Inc. claims. In general, the notices disagree with the majority of the components we recommended and they all indicate our recommendations do not reflect historical use. It is our intention to not change any of our recommendations based on the Notices of Error filings. The elements in our recommendations reflect many hours of review, discussion, negotiation and field work and we believe are an accurate representation of the historical water usage for both ranches.

When you are ready to file the stockwater claims, the filing fee is \$25 each. They will have to

January 6, 1999

be properly executed and filed by January 29, 1999 to be included in the director's report with the irrigation and other Basin 61 recommendations.

We still need a signed and notarized claim form for the groundwater expansion claim for irrigation, A61-11887. We will have to disallow this claim if we have not received a properly executed claim by January 29, 1999.

After your review of the enclosed claim forms, it would be beneficial to meet with you in person to discuss them. Call either of us at the 334-2190 to set an appointment time.

Sincerely,

Mel Schulte
