HOW YOU WILL RECEIVE NOTICES IN THE SNAKE RIVER BASIN ADJUDICATION

All documents filed in the Snake River Basin Adjudication other than notices of claims are filed with the court. Notices of claims to water rights filed in the Snake River Basin Adjudication are filed with the Idaho Department of Water Resources. Copies of all documents filed in the Snake River Basin Adjudication will not be mailed to all parties (claimants) in the adjudication.

By order of the court, any document filed with the court will be mailed only to those parties who may be directly affected by it. A monthly docket sheet will be prepared by the department which contains a summary of all documents filed with the court in the previous month and the dates and locations of hearings scheduled for the following three months. The docket sheet will be filed with the district court clerk in each county within the Snake River Basin in Idaho. Copies of the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying. If you wish to receive a copy of the docket sheet each month, you should mark the appropriate place on your notice of claim form. You will be charged a small annual subscription fee to cover the cost of copying and mailing. Copies of any document listed on the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying.

Copies of all notices of claims filed with the department will be available for inspection from all offices of the department. Copies of the notices of claims may be obtained in person or by mail, but you will be charged for the cost of copying and mailing. (A claimant will not be charged for a copy of his or her own notice of claim, and a person who acquires property with water rights for which a notice of claim was filed will not be charged for a copy of the notice of claim filed by the previous owner.)

After the notices of claims have been reviewed, the director will prepare and file a report with the court. Part 1 of the report will contain the director's recommendations as to each water right claimed under state law. Part 2 of the report will list each federal reserved water right claimed. A number of reports will be prepared, one or more for each sub-basin in the Snake River Basin. When the report for your sub-basin is filed with the court, you will be mailed a notice informing you that the report for your sub-basin has been filed. The notice will be sent to the most recent address shown by the department's files. Attached to the notice will be a copy of those portions of the report describing the water rights you have claimed. If you do not agree with the way your water right is described, you may file an objection to the report with the court. You can also file an objection if you disagree with the way other claimant's water rights are described, and the notice will tell you where a copy of the full report is available for inspection. The notice will tell you when and where to file your objection. The notice of filing for each sub-basin report will also be published state-wide in local newspapers.

It is very important that you inform the department in writing of any change in your address. This is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

If you are acquiring property with water rights in the Snake River Basin water system in Idaho (either by purchase, gift, inheritance, or other means), it is very important that you inquire of the department whether a notice of claim has been filed. If not, you must file a notice of claim or the water right may be declared by the court to no longer exist. If a notice of claim has been filed, it is very important that you file a written notice of change in ownership with the department. The notice of change in ownership must be accompanied by some evidence of the change in ownership, such as a copy of the deed or a property tax statement showing the name of the new owner. Again, this is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

The cost of the subscription to the docket sheet is $7.50 for calendar year 1988. The cost of the subscription may increase a small amount for calendar year 1989 if the cost of copying and/or mailing should increase.

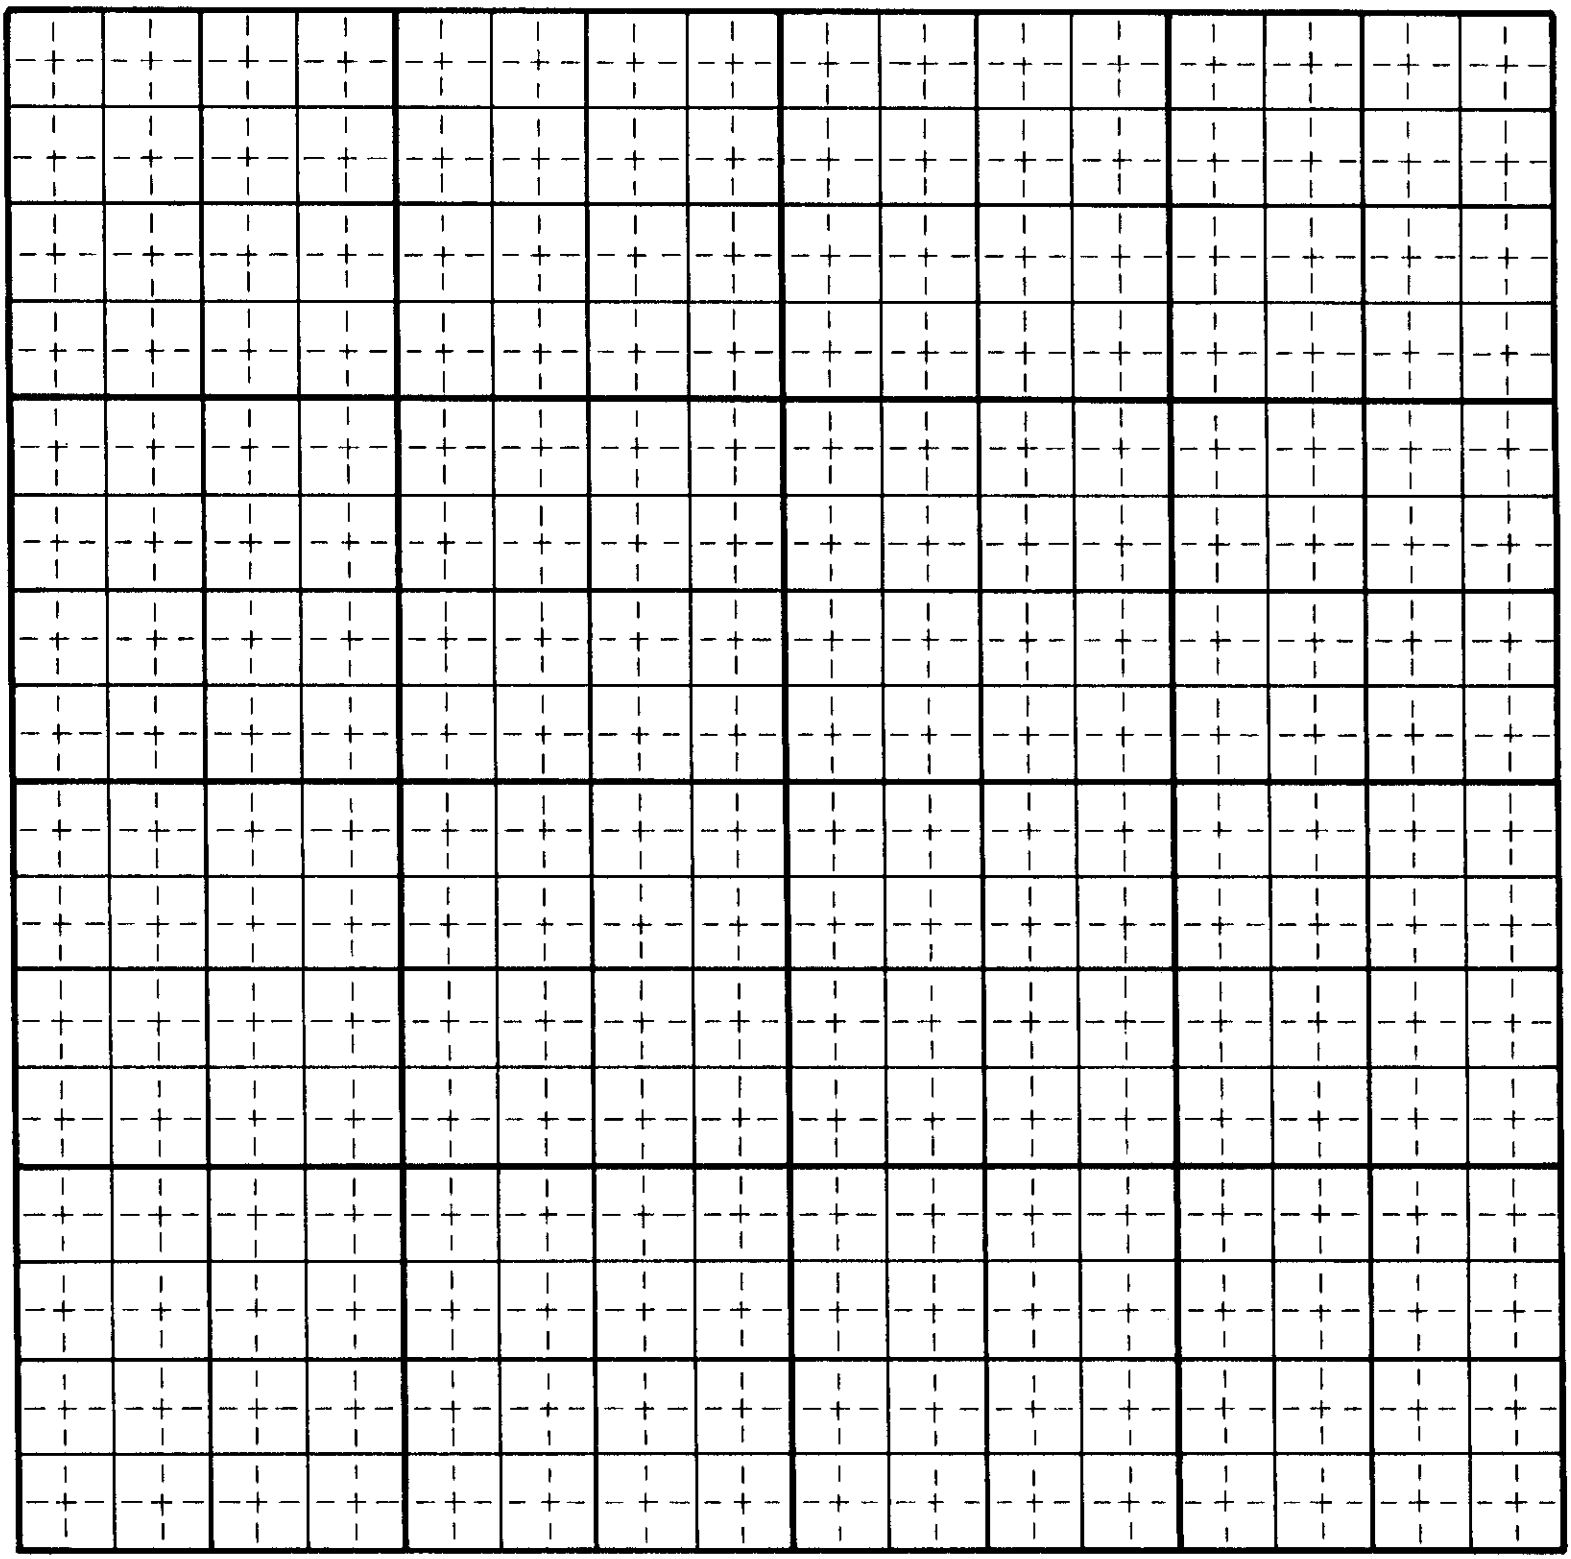

If you are planning to file a motion or other pleading (not a notice of claim) with the court (not IDWR), the court has issued an order setting a special procedure that is different from the usual civil rules. A copy of the order may be obtained from any office of IDWR; you may be charged for the cost of mailing and/or copying.

IN THE HOUSE OF REPRESENTATIVES

HOUSE BILL NO. 285

BY RESOURCES AND CONSERVATION COMMITTEE

AN ACT

RELATING TO WATER RIGHTS; AMENDING CHAPTER 14, TITLE 42, IDAHO CODE, BY THE ADDITION OF A NEW SECTION 42-1416B, IDAHO CODE, TO PROVIDE THAT AN ADJUDICATION CLAIM FOR THE RIGHT TO AN EXPANDED USE OF A GROUND WATER RIGHT WITHIN A CRITICAL GROUND WATER AREA MAY BE DECREED IN A GENERAL ADJUDICATION; PROVIDING A PROCEDURE THROUGH WHICH WATER MAY BE DETERMINED AVAILABLE FOR DIVERSION UNDER THE RIGHTS TO EXPANDED USE; AND DECLARING AN EMERGENCY.

Be It Enacted by the Legislature of the State of Idaho:

SECTION 1. That Chapter 14, Title 42, Idaho Code, be, and the same is hereby amended by the addition thereto of a NEW SECTION, to be known and designated as Section 42-1416B, Idaho Code, and to read as follows:

42-1416B. CLAIM FOR EXPANDED USE IN CRITICAL GROUND WATER AREA -- DETERMINATION OF WATER AVAILABILITY. (1) Within any critical ground water area designated pursuant to section 42-233a, Idaho Code, a claim to the expanded use of a ground water right, which use was expanded in violation of the mandatory permit requirements, may be decreed in a general water rights adjudication if the expansion occurred after the designation of the critical ground water area, before the commencement of the adjudication, and before the date of enactment of this section. The priority date for the right decreed shall be June 30, 1985.

(2) Water shall be deemed unavailable to fill the rights for expanded use, even if decreed in the adjudication, unless the director finds that a management program exists which will, within a time period acceptable to the director, limit the average annual water withdrawals from the aquifer designated in the critical ground water area to no more than the average annual recharge to the aquifer.

(3) Within two (2) years after a decree determining the water rights within a critical ground water area becomes final, but not sooner than four (4) years from the date of enactment of this section, the director of the department of water resources shall make a finding as to whether an adequate management program exists to bring withdrawals into balance with recharge.

(4) If the director finds that an adequate management program to bring withdrawals into balance with recharge does not exist, the director shall order all holders of rights to expanded use of ground water within the area to cease or reduce withdrawal of water until such time as the director determines that withdrawals have been brought into balance with recharge and sufficient ground water is available to resume or increase withdrawals. The director's order shall be issued before September 1 and shall be effective beginning with the following growing season.

(5) For purposes of this section, the following definitions shall apply:

(a) "Expanded use" means an increase in the number of acres irrigated, or other additional use, under a valid ground water right without any

increase in the rate of diversion or volume of water diverted.

(b) "Management program" means a program to recharge the aquifer, limit withdrawals from the aquifer or provide surface water supplies for all, or a portion, of the land irrigated with water withdrawn from the aquifer, including any actions designed to bring withdrawals into balance with the average annual recharge to the aquifer.

(c) "Recharge" refers to all processes, natural or artificial, which add water to the aquifer.

(d) "Withdrawal" refers to all processes, natural or artificial, which take water from the aquifer.

(6) The hearing and judicial review provisions of section 42-1701A, Idaho Code, shall apply to any findings and orders issued by the director pursuant to this section.

(7) Nothing contained in this section shall be construed to limit the authority of the director of the department of water resources to administer and enforce any other ground water laws of the state.

SECTION 2. An emergency existing therefor, which emergency is hereby declared to exist, this act shall be in full force and effect on and after its passage and approval.

RE: **Evidence of Priority**

RESPONSE DEADLINE
APRIL 1, 1993
****

Dear Claimant:

The Notice of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice indicates your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date**, has **not** been confirmed by a License, Decree or Permit. The Department will at a later date conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, **proof must be provided supporting the priority date you have claimed.**

Please find enclosed a computer printout of your Notice and the pamphlet entitled **"Evidence of Priority".** The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement.

SPECIAL NOTE: The Department will not recommend the Notice be decreed by the court as claimed if no evidence of a priority date is submitted. It will be to your advantage to provide clear and convincing evidence. If you choose to submit statements from individuals as evidence, the statement must be in the form of a notarized affidavit.

Please submit the required evidence supporting the priority date by **April 1, 1993**, referencing all documents with the corresponding Notice number. If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

1. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

Remarks:

1.	Place of Use - Irrigation	USE OF THIS RIGHT WITH RIGHT NO. 45-2254B IS LIMITED TO THE IRRIGATION OF A COMBINED TOTAL OF 1068 ACRES IN A SINGLE IRRIGATION SEASON.
2.	Quantity	USE OF THIS RIGHT WITH RIGHT NO. 45-2254B IS LIMITED TO A TOTAL COMBINED DIVERSION RATE OF 1.71 CFS AND TO A TOTAL COMBINED ANNUAL DIVERSION VOLUME OF 600 AF.
3.	General	THIS RIGHT IS AN EXPANSION OF RIGHT NO. 45-2254B PURSUANT TO SECTION 42-1416B, IDAHO CODE.
4.	Place of Use - Irrigation	THIS RIGHT IS LIMITED TO THE IRRIGATION OF 918 ACRES WITHIN THE PLACE OF USE DESCRIBED ABOVE IN A SINGLE IRRIGATION SEASON.

Comments:

1. jroberts 2/3/2003 Basis of Recommendation
Comment: This right was claimed as an expansion of license 45-2254B. None of the claimed acres looked particularly irrigated, even those that were licensed, but there was an approved transfer in 1991 which added a point of diversion to that license. I will recommend the much larger pou, which I changed slightly based on Cassia County ownership records, because they paid for the extra acres but the small diversion rate and no volume makes this right fairly worthless.

Dear Water Right Holder:

IDWR has been notified the address presently on our records is incorrect. Although we have reached you at the address above we need your written confirmation this is your correct mailing address before we can change our records. Future notices related to your water right can be sent only to the address on your claim or as otherwise changed by you.

Please sign your name at the bottom of this letter and return it to this office postmarked by December 17, 1997. Make corrections to your name and address if necessary before returning this letter. Thank you for your help.

If your mail delivery address changes in any form, please contact us in writing so we can update our records.

If there has been a change in ownership of any of the properties connected with the water right referenced above, please call this office toll-free at 1-800-451-4129 to obtain a form to make this required change to the water right records.

Yours truly,

Danni M. Smith

SUBJECT: App. for Transfer, Cory King

Earlier this year I visited the point of diversion, accompanied by Mr. King. The well appeared to be in the SE/NW/SE Sec. 26 based on the ASCS photo. Only one well has served this property for some time.

With regard to the place of use, the 1990-1992 ASCS slides showed no irrigation on the 1070 acres. The 1993 slide was not available. In 1994, there were growing crops under a pivot in the SE 1/4 Sec. 22. In 1995, a pivot in the NE 1/4 Sec. 27 was in use. In 1996, both pivots were in place, but no plant growth was shown. Therefore, the most land that has been irrigated since 1990 is what is under one pivot, about 132 acres. The groundwater and surface water co-mingle in a common pipeline that serves this system, so it is hard to tell how much the well has actually been used. I will request power records on this well from the applicant.

If this transfer is approved, and Mr. King does get a well that pumps longer into the season, this will constitute an additional diversion of groundwater in this area. By the applicant's own admission, the existing well runs out of water early in the season. If the transfer is approved, it should be limited to the irrigation of 132 acres per year within the permissable place of use. This will probably make it economically unfeasible to install sprinklers on additional portions of the property, so it seems likely that only the two existing pivots would ever be used. Since Mr. King is apparently entitled to 4 acre feet of water per acre per annum, even though this amount has probably never been used, we should at least limit to transfer to 528 AFA/annum for all rights combined on this property.

Mr. King was supposed to call me to arrange for a measurement of this well, and I have holding the application for this. But I have not heard from him, so am passing the file to Mary for advertising.

SUBJECT: App. for Transfer #5094, Corey King

Today I met with the applicant. Using the Peek flow meter, I measured the output of the existing well. The measurement was made well down the mainline from the well due to problems with trying to get a measurement between the well and where it discharges into a pond. There were still a couple inches of creek water entering the pipeline, so about 0.04 cfs should be deducted from the measurement to compensate for this. Although the water can be used anywhere on the property, according to the applicant, it was run into 2 oversized pivots during the test. Pressure in the mainline was 55-60 psi. Although the well pumps a little higher when first turned on in the spring, Corey felt that the measurement is close to early-season flows. Due to a wet summer and lots of creek water, the well was used very little this year. So the excessive drawdown that often plagues this well, and the reason for the transfer, did not occur this year. The measured flow is about 700 gpm more than the existing licenses, however, so the water source is probably a very localized aquifer that can fill up just as quickly as it can be emptied. Measuring conditions were good from all aspects, so I have no reason to doubt the accuracy of the data. Signal strength was 24%, and flow variation was less than 4%. Flows averaged around 2450 gpm (5.46 cfs), and were printed out on the data sheet every 5 seconds. Although the data sheet showed a scale factor of 0.947, the view screen showed 1.0. Either way, the flow exceeds the licensed pumping rate. The application only proposes to move the licensed rate, so this should not be a problem with standard approval conditions. My previous memo deals with the proposed place of use, which is another matter entirely.

Re: VANCO, INC. Notice of Claim A45-11239

Dear Sirs:

Enclosed please find copies of the following documents which are hereby submitted as "Evidence of Priority" as explained in your letter of January 25, 1993 and accompanying guide:

1. Well Drillers Report from Chesley Drilling dated 3-30-86.
2. Statements from Bill Chesley dated 3-31-86 and 4-10-86 totaling $16,145.00 for drilling the well.
3. Sales Order and Invoice from Layne Pumps dated 3-6-86 in the amount of $1,237.00 for testing the well.
4. Invoice from Hansen Irrigation Service Inc. in the amount of $9,850.00 for the pump on the well.

We were not able to locate all of these documents in time to meet the April 1, 1993 response deadline, but were advised by legal counsel to submit them, even though late.

Please advise as whether the above documents are sufficient. Thank you for your assistance in this matter.

Sinceley,
