AMENDED

WATER RIGHT NO(S). 35-02603/35-04127/35-12670

1. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
2. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

TRANSFER NO. 5068
WATER RIGHT NO(S). 35-02603/35-04127/35-12670

CONDITIONS OF APPROVAL AND REMARKS

3. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
4. The right holder shall measure and annually report diversions of water and/or other pertinent hydrologic and system information as required by Section 42-701, Idaho Code.
- * 5. The total instantaneous diversion of water from all points of diversion under Transfer 5068 shall not exceed 10.03 cfs, nor a total combined annual volume of 4408.0 af.
- * 6. Rights 35-02603, 35-04127 and 35-12670 when combined shall not exceed a total annual diversion volume of 4408.0 af.
7. Approval of Transfer 5068 does not confirm claimed Rights 35-04127 and 35-12670.
8. The water used for industrial use under this transfer approval is applied to and irrigates land listed in the place of use to satisfy water quality requirements. Water shall not irrigate growing plants unless the water is first beneficially used for industrial use as authorized by these water rights.
9. Industrial use includes a potato processing plant located in the W1/2SE, S35, T07S, R30E.
10. Two points of diversion are located within NWSE, S35, T07S, R30E.

Dated this 15th day of June, 1998.

Chief, Water Allocation Bureau

MEMORANDUM

TO: Files 35-02603, 35-04127 & 35-12670

FROM: Pam Skaggs^{ES}/State Office

SUBJECT: Transfer 5068

DATE: May 26, 1998

Transfer 5068 adds points of diversion and changes the place of use under Rights 35-02603, 35-04127 and 35-12670. The applicant is identifying the place of use for the land application area needed to comply with water quality requirements and the use of the three wells and rights as a single combined system.

The priority of A3⁵12670, fire protection use on 35-04127, diversion rates under 35-04127 and 35-12670, and diversion volume were adjusted according to SRBA recommendations, the transfer application and current standards. The additional place of use described for land application is not considered an enlargement of the use of these rights when water is first used for industrial use in the potato processing plant.

Recommended conditions include multiple points of diversion limits, measuring & reporting, land application limits and standard transfer conditions.

Dear Sir:

I am enclosing a copy of the well drilling log and information on Evidence of Priority #A35-04127.

I, Wally Buffi, have been employed at the Lamb Weston facility since July 1, 1962, and I have observed the Facility using water from the Number 1 Well (Priority No. A35-04127) for the past 29 years.

RE: **Evidence of Priority**
NO. A35-04127

Dear Claimant:

The Notice of Claim identified with the number shown at the end of this letter has been filed in the Snake River Basin Adjudication (SRBA). The Notice indicates the water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed, at or on the place of use identified on the Notice. The date the water was first put to use, known as the priority date, has not been confirmed by a License, Decree, or Permit. For this reason, proof must be provided supporting the priority date.

For your reference I have provided a printout of your Notice and the pamphlet entitled "**Evidence of Priority**". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. While I encourage you to read all of the pamphlet, I direct your attention to the two sections entitled "**What Kind of Evidence is Required**" and "**Some Examples of Documents Which May Be Evidence of the Priority Date**".

It is our goal to recommend this historical water rights within the Snake River Basin as accurately as possible. Field exams to verify other items of the Notice have been or soon will be conducted by Department personnel. But, the Department will not recommend the Notice be decreed by the court if no evidence of a priority date is submitted.

Please submit the required evidence supporting the priority date by JULY 15, 1991, referencing all documents with the corresponding Notice number. If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Attention: Mr. A. R. Davidson

Gentlemen:

Enclosed is copy of Well Driller's log of the well drilled for you last summer at your American Falls plant. Our report on the test has been delayed because we were unable to get the log until a few days ago.

The well was tested by pumping on August 30, 1960. During the first 15 minutes of pumping the water was dark color from the lava cinders. After that time the water remained clear. Discharge was measured by an 8" orifice at the end of 10" discharge pipe.

The static water level was ^{74'} 2 1/2 feet below ground surface. At discharge of 1500 gpm draw-down was 3 feet.

At 2150 gpm draw-down was 6 feet.

This rate of discharge was maintained for 6 hours with draw-down remaining steady.

The discharge was then increased to 2700 gpm with draw-down of 10 feet. This rate of pumping was continued two hours with draw-down remaining steady at 10 feet.

Very truly yours,

HAMILTON AND VOELLER
