I believe I am the bottleneck to having the procedure spelled out in a memo for making a change to a D&S recommendation. Fortunately, the word of mouth and MAIL has filled the gap as your message demonstrates. Ya dun gud.

In this case, however, the contractor has finished with the 35's and all but a handful have been returned to your region in the "books." (I'm not sure we have a received an update on the contractor progress since mid-August.) If you will denote your changes in the file (You may have to pull the contractor's proof report from the book.) the job will be done. I'll toss your MAIL here.
Thanx
