sbock	1/26/01	TRANSFER	Transfer No. 2662 was filed on this right and never entered in the w.r. data base. Mr. Harold Williams sought to transfer .3 cfs and 15 acres from last chance to Farmers Co-op. The pou did not change. It appears that the transfer should have been filed on 54X, as 54B, did not cover these lands. However, in an effort to reduce further confusion, I am showing the transfer as it was approved. This will be reduced to 41.2 cfs and reduced to 1,744 acres. This right was decreed in the Payette for 1,759 acres and the boundary that was created by IDWR and claimant came to 8,254 acres.

Hi, SueBeel! I looked at file 65-00054B trying to find out about Transfer No. 2662 for you and came up with nothing that will help. The transfer was approved on May 26, 1982 but was never data entered. It appears to me that Mr. Williams transferred 15 acres of water to the Farmers Coop canal with no change in place of use. However, when I search the place of use he transferred his 15 acres to it only shows Right 65-00054X as being used in those 40's. By the time I spend hours trying to figure this transfer out and update the data base you could probably have contacted the canal companies and have it all straightened out. I am sorry but this one is not going to get updated in the data base. I can send you a copy of the approved transfer if you don't already have one.

Our file shows Right 65-00054B was split into C & D per the approved transfer. I wonder why they split "B" when it appears that it should have been "X" but I have no answer for that... The canal companies agreed to this transfer way back when so maybe they have an idea how the transfer worked. Let me know if you need a copy of the approved transfer. Kay

D. REMARKS

This change in point of diversion from the Last Chance Canal Co. to the Farmers Cooperative Irrigation Co., Ltd., if approved, will record the change in operation within the two companies and document the change in rate of diversion and in the place of use for the respective companies. Proposed Finding showing 7 acres of Emmett Irrigation District right in the NENE, S. 26, is incorrect.

I hereby assert that no one will be injured by such change and that the change does not constitute an enlargement in use of the original right. The information contained in this application is true to the best of my knowledge.

I understand that any willfull misrepresentations made in this application may result in voiding its approval.

RE: update

Called to tell me:

Purchased land from father-in-law D. Vaughn a few years ago. Then put in # of drain ditches & no problems after that, as far as he knows.

Said recent problem was result of something else: blow-out on water delivery ditch & then his land & highway. Said ditch rider John Mason has fixed that & problem is correcting itself. So his info is that neighbors were mis-informed & what caused recent problem.

Said I'd be staff welcome to drop by anytime & inspect situation. His drain ditches work well & improve the irrigation of his field & don't cause problems as far as he can tell.

RE: Alleged Mis-use of Water Rights

Dear Sirs:

This letter is in response to two complaints received today regarding your irrigation and/or stock water uses on land in SE 1/4 NE 1/4, Section 13, T6N, R2W. The complaints essentially reiterate complaints received by this office in 1989. Then, and now, the allegations stated that your land is excessively flooded with water provided through Last Chance Ditch Company. The complaints state the result of your water use practices is to raise the water table on property on the north side of Hwy 52, thereby causing damage to neighboring land.

Enclosed are copies of my 1989 letters addressing this situation. By way of this letter and previous ones, I am not indicating that I know all of the facts of the situation. However, if the complaintants are correct in their conclusions, you may be liable for such damages in a civil action initiated by some party other than this agency.

You should be aware that the rights serving your property provide .87 cfs (about 390 gpm) to irrigate 37 acres and provide incidental stock use. As with any water right, the user must remain within the limits of the right and must apply the water to a beneficial use. Waste of water is not sanctioned by water rights, nor is damage to other property. It is difficult to imagine that standing water in a field for a significant period is a beneficial use of water.

If conditions at your property and the neighboring land are those indicated by the complaintants, I recommend that you take steps to correct the problems to prevent further complications that could occur under Idaho statutes. A field visit will be made by Department staff within the next two weeks to check on the situation. It is particularly important to be aware of good water use practices during drought years such as this year.

Dear Sir:

Your letter is a formal complaint in regard to the irrigation practices of Mrs. Dave Sawyer & Robert Sawyer - Bonanza, Idaho.

The property owners on Highway 52, are are expending all kinds of gallons from a wasteful and wasteful use by the above mentioned gentlemen.

At present, we have 1 1/2 ft. of clayton water sitting in the farrow set in front of our home, water running down a trench to our back yard - water beneath our home, and most importantly, water standing in and around our well ring - Most of the water is full of algae & algae - The mosquito abatement department have stopped and sprayed insecticide on our "pond" and we are very afraid of contaminants seeping

We have watched ducks banking in the fields where these improper irrigation practices are being conducted... wondering if it will soon become a wetlands foul preserve.

Neighbors have told us that Vaughn-Sichler has had water on their fields for over 30 days. They water their livestock with it.

This is extreme use of irrigation privileges. Also extreme abuse to us property owners.

With the statement on television, that southern Idaho is experiencing a draught condition - this is really a disgusting and completely brazen situation. We all feel that severe reprimand should result. (I wonder what the media would think of this one!)

Please throw out a life preserver - we're sinking!

RE: Complaint Regarding Irrigation Practices of Robert Siebler

Dear Interested Party:

On Friday, July 8, 1994, Cindy Hodges of our office conducted a field check of the situation you have described in your June 10, 1994, correspondences to the Department. She verified and documented your accounts of water damage in and around your homes. She also verified that irrigation was occurring in the Siebler pasture and that water was standing in the west end of the field.

Because the Siebler irrigation diversion is occurring under a valid water right which is held and delivered by Last Chance Ditch Co. (65-00054X), the Department of Water Resources has little to no jurisdiction over this unfortunate misuse of water. Rather, delivery of flows to Mr. Siebler is under the authority of the Ditch Company and/or their appointed ditch rider. I would strongly recommend that you make your concerns regarding wasteful irrigation practices known to the Board of Directors of the Last Chance Ditch Company. Ms. Hodges was informed during her visit that water users under Last Chance are limited to 12-hour irrigation sets. If a violation of this policy is occurring, the ditch rider should be the policing authority and should be informed immediately.

As I expressed in my June 10 letter to Mr. Siebler, (copied previously to Mrs. Ranstrom and Mr. Fellom), the damage caused to your properties because of the raised water table is a civil matter, with remedies available under civil law. If you choose to pursue a civil action, all documentation on file which has resulted from our investigations is considered public information, and we will gladly release copies to you or your counsel upon request.

Further action will not be taken by this Department regarding this matter unless actual illegal diversion by Mr. Siebler may be substantiated. If you have additional questions, please feel free to contact me or the Regional Manager at this office.

Sincerely,

Steve Lester

Dear Mr. Pulley:

You have inquired why the Last Chance Canal Company's water rights exceed the statutory limitation of 0.02 cfs per acre irrigated. The combined rights authorize diversion of 132.61 cfs for the irrigation of 5624 acres.

The Department records show that, when the Last Chance rights were decreed, an additional flow rate was added to each of the rights to account for delivery ditch loss. I have enclosed copies of the calculation sheets for your reference. I cannot, however, trace exact calculations of the 132.61 cfs, nor can I trace how the Court determined that 5624 acres were irrigated.

Dear Basin 65 water user:

This letter is to inform you that you may be eligible to file a stockwater claim with the Idaho Department of Water Resources (IDWR) in connection with the Snake River Basin Adjudication (SRBA). IDWR is sending this letter to water users in Basin 65 who might have relied upon the non-irrigation season stockwater provision in the Payette Adjudication. This provision states:

"When stockwater is not a specifically mentioned use for a right that includes irrigation, a reasonable flow is implied and included for the watering of livestock during the non-irrigation season."

In another basin, the Idaho Supreme Court struck down general provisions that contained similar language. The non-irrigation season stockwater language quoted above was not included in the General Provisions for Basin 65 because of the Idaho Supreme Court's ruling.

IDWR recognizes that in reliance on the non-irrigation season stockwater language in the Payette Adjudication, water users might not have filed stockwater claims in the SRBA to cover the non-irrigation season period. Individuals who historically watered livestock during the non-irrigation season without a separate stockwater claim might desire to file a new stockwater claim with IDWR.

To be eligible for a new non-irrigation season stockwater claim:

1. You must have actually and historically watered livestock during the non-irrigation season without a separate stockwater right.
2. You must have filed a surface water irrigation claim in both the Payette Adjudication and the SRBA.
3. You must not have filed a stockwater claim with the surface water irrigation claim.

If you meet these three requirements, you may file a Notice of Claim form for stockwater with IDWR. **To have a timely filing you must file this claim with IDWR by May 25, 2001.** IDWR will waive filing fees for these stockwater claims if filed before this deadline. Failure to file your claim in a timely manner may prevent you from claiming it in the future. Notice of Claim forms are available on IDWR's website at www.idwr.state.id.us/info/water/srba/forms.htm or from any IDWR office. Claimants can call IDWR, Western Region at (208) 334-2190 to make an appointment if they need assistance filling out a Notice of Claim form.

Sincerely,

David R. Tuthill, Jr., P.E.
Adjudication Bureau Chief
