RE: Water Rights in Reporting Area 15, Basin 65
Snake River Basin Adjudication (SRBA)

Dear Water Right Claimant(s):

Please find enclosed the Idaho Department of Water Resources recommendations for your water right(s) in part 1 of basin 65 (the North Fork of the Payette River drainage area). We have also enclosed instructions for reviewing (1) your recommended water right(s), and (2) other recommended right(s) in your area. Water rights for nearly all domestic and/or stockwater rights were recommended separately in an earlier report, and most of those now have been decreed by the SRBA Court.

Note you have 120 days in which to review the water rights of other claimants and to file any objection to our recommendations. Information on the other water rights can be found at the county courthouses in Cascade, Idaho City, Emmett, Payette, and Weiser, and at all of the Idaho Department of Water Resources offices (see addresses in enclosure).

If the SRBA Court does not receive an objection to our recommendation from you and no other party objects to your water right, your water right will be decreed early next year as recommended. You will receive your decree from the SRBA Court.

Completion of the SRBA is important for the future of water management in Idaho. We invite you to contact our regional offices with any questions you have about your water right(s) or this adjudication process.

Sincerely,

Karl J. Dreher
Director

KARL J. DREHER
DIRECTOR

September 29, 1999

Dear Water Right Claimant(s):

The Idaho Department of Water Resources (IDWR) has completed its initial investigation of your water right claim(s) in the Snake River Basin Adjudication (SRBA). We have enclosed a print-out showing our preliminary recommendation regarding how your water right should be reported to the SRBA District Court.

Please review the preliminary recommendation carefully. If there is any information on the print-out you believe is inaccurate, please fill out the enclosed reply indicating what changes you believe should be made. Further instructions to assist you with the review are enclosed. For water rights with an irrigation water use, a Geographic Information System (GIS) computerized image of the place of use for your water right is also enclosed.

You may return this reply in person to us at a public meeting IDWR will be conducting in your area. **The meeting will be held on Wednesday, October 13, 1999, at 7:00 p.m. in the Senior Citizen Center, 409 School Road, Cascade.** Please come to the public meeting, where you will have an opportunity to find out more about the SRBA process and speak with a department staff member should you have questions regarding your water right. Please bring any and all information you have which will help the Department understand your water rights and describe them accurately.

This process is intended to ensure IDWR recommends your water right accurately to the SRBA District Court. This is the easiest and least costly means for you to identify corrections you believe should be made to our recommendation. Completion of this process is an important step toward the overall success of the adjudication in Idaho. Your participation is necessary so that accurate information is provided to the SRBA District Court.

We look forward to hearing from you.

Sincerely,

Karl J. Dreher
Director

MEMORANDUM

To: Susan Hamlin

From: Kay Walker

Date: May 11, 1999

RE: Basin 65 Claims

.....
.....
Hi, Susan!! I have been assigned review of a couple of claims in B65 that I am unsure how to proceed with.

The first one is claim A65-01887. This right was decreed as abandoned in the PRBA (Payette River Basin Adjudication). The claimants have claimed an 1899 priority date along with affidavits showing a pond was developed in 1960's. Field investigation by Don Shaff in 1978 stated right was forfeited/abandoned. Can I just disallow since not previously decreed? The claimants also had a permit to cover their use of this water but let the permit lapse. They had submitted the application for permit because of a water right complaint (see notes of 12/12/94 by Steve Lester attached).

The second is another claim by same claimants (No. A65-01889). It was decreed for stockwater from storage in the PRBA under number 65-01889 for 4.10 afa. The claimants have submitted a claim in the SRBA for the stockwater from storage, stockwater storage, stockwater and live flow irrigation at 6.4 cfs on 320 acres. This claim also has accompanying affidavits of use.

How should I proceed in my review of these claims? I believe I should recommend them as previously decreed but want to run it past you first... Maybe a pow-wow with Don Shaff would be in line since it appears he did initial field investigation. I am unsure if we can make recommendations differently than what was done in the Payette when they are this major – it appears to me they need to take their cause up with the judge rather than IDWR?

Please let me know how to proceed. Thanks again..... Kay

I, Kirk Darnell, would like to verify that a reservoir was built in 1960 and used for the purpose of irrigation on ground in Round Valley owned by Paul Darnell. Ranching and farming in Partnership with Owen Darnell, they raised hay and sprinkled pasture ground totaling around 300 acres. I helped hay and change pipes during this period up until around 1968.

Signed  Kirk Darnell

I went to work for a logger, Pat Carlock, in 1968 and my brothers Lon and Greg helped with the haying and pipe moving -

I have gathered the information you requested for the purpose of establishing our "Grandfather Rights" with regards to the irrigation and stock water on our ranch in Round Valley.

In addition to letters and verifications with regards to the irrigation system, I would like to add my own personal account.

From 1957 to 1970 we owned and operated a ranch on Clear Creek in Valley County. We sold the property to James Bingman in 1970. From 1957 to the present date we have owned land in Valley County.

We not only observed, but was directly connected with the irrigation development on my father's ranch in Round Valley (now mine). Several summers my father had me check on the sprinkler pipe moving as it was very difficult to hire reliable help to move sprinklers without someone being there. My children swam in the irrigation pond from the time they were very small.

This is to further inform you that all of the people who verified the beneficial use of irrigation water for the purpose of agriculture are all people in their 70's and people who were close neighbors and most of whom had done work for my father. Most of them are persons who passed the property several times a week.

My mother did all of the book work for their ranch operations and in the early 1960's she had a very serious heart attack. Eventually she had to have surgery which could not even be performed in Boise. This affected her memory and things did not get taken care of as they should have been.

In 1980 mother divided her properties and gifted them to her children. My part was the Round Valley ranch. She removed the sprinkler system and my then husband and I were in the process of installing a new system when he was killed in a car accident. In 1986-87 I remarried. My husband and I have installed an expensive irrigation system and it is now in operation.

Other people who lived in the valley at that time have also offered testimony, however, I felt what I had should be sufficient evidence of the past history of the ranch,

Our names are Kyle and Fern Ellis and we have resided in Round Valley, Valley County, Idaho for over 30 years. Our ranch is located down the road approximately one-fourth mile from the ranch owned by Cleota (Newell) Patterson. We are well acquainted with the land as we pass it nearly every day of the year.

We were also well acquainted with Cleota Patterson's father Paul Darnell. Paul excavated a water storage pond for the purpose of irrigation in approximately 1960. I hauled sand and gravel from the area when they were digging. After the pond was excavated Paul irrigated from the pond onto his farm ground. He raised hay, grain and pasture for his cattle from that time.

There are many other people in the Valley that can vouch for what we have said.

I was contacted by Cleota (Newell) Patterson to recount my knowledge of the farming-ranching operations done on her place when her father owned the property, located in Round Valley, Valley County, Idaho.

I was well acquainted with Cleota Patterson's father, Paul Darnell. I was born and raised in Valley County and own property in Round Valley. Paul excavated a pond with a drag line for the purpose of irrigating the property in approximately 1960. He installed a sprinkler irrigation system and irrigated the property in the years after that. As I own property in Round Valley I have had opportunity to observe the irrigation.

Paul raised hay, grain and pasture. He also ran cattle on the place.

The above statements are true and can be verified by many other people in the valley.

TO WHOM IT MAY CONCERN:

My name is Glenn Redmon. I was born and raised in Valley County, Cascade, Idaho. I am well acquainted with the property owned by Cleota Patterson in Round Valley as my father once owned and farmed the ranch.

I was well acquainted with Cleota Patterson's father, Paul Darnell, now deceased, who owned the ranch before her. Paul had a large pond excavated in approximately 1960 for the purpose of irrigating the land. He installed a sprinkler system and irrigated the land in subsequent years raising hay, grain and pasture and running stock cattle.

Jim Frye, another life-long resident of Round Valley, and myself, leveled, plowed, worked up and seeded the ground for Paul. We also hauled fertilizer from Donnelly for the place.

The statements made are true statements and can be substantiated by other residents living in the Valley.

October 11, 1989

To Whom It May Concern,

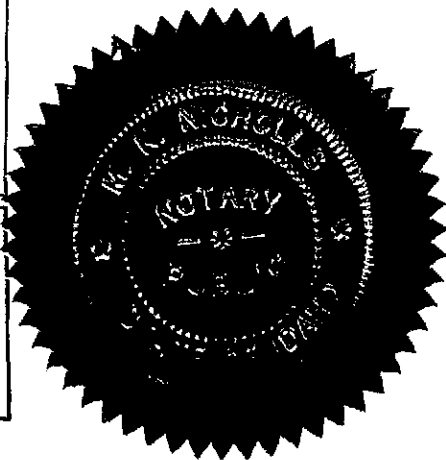

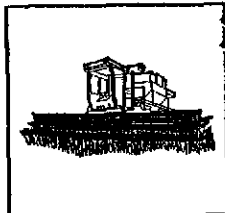

On March 10, 1960 Paul Darnell purchased from Valley Pump & Equipment 4 1/4 mile sprinkler lines and 1/2 mile of main line for his ranch in Round Valley, Idaho. These lines covered 160 acres.
