KARL J. DREHER
Director

Dear Basin 65 water user:

This letter is to inform you that you may be eligible to file a stockwater claim with the Idaho Department of Water Resources (IDWR) in connection with the Snake River Basin Adjudication (SRBA). IDWR is sending this letter to water users in Basin 65 who might have relied upon the non-irrigation season stockwater provision in the Payette Adjudication. This provision states:

"When stockwater is not a specifically mentioned use for a right that includes irrigation, a reasonable flow is implied and included for the watering of livestock during the non-irrigation season."

In another basin, the Idaho Supreme Court struck down general provisions that contained similar language. The non-irrigation season stockwater language quoted above was not included in the General Provisions for Basin 65 because of the Idaho Supreme Court's ruling.

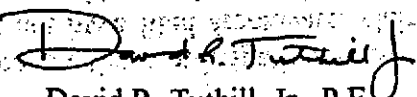

IDWR recognizes that in reliance on the non-irrigation season stockwater language in the Payette Adjudication, water users might not have filed stockwater claims in the SRBA to cover the non-irrigation season period. Individuals who historically watered livestock during the non-irrigation season without a separate stockwater claim might desire to file a new stockwater claim with IDWR.

To be eligible for a new non-irrigation season stockwater claim:

1. You must have actually and historically watered livestock during the non-irrigation season without a separate stockwater right.
2. You must have filed a surface water irrigation claim in both the Payette Adjudication and the SRBA.
3. You must not have filed a stockwater claim with the surface water irrigation claim.

If you meet these three requirements, you may file a Notice of Claim form for stockwater with IDWR. **To have a timely filing you must file this claim with IDWR by May 25, 2001.** IDWR will waive filing fees for these stockwater claims if filed before this deadline. Failure to file your claim in a timely manner may prevent you from claiming it in the future. Notice of Claim forms are available on IDWR's website at www.idwr.state.id.us/info/water/srba/forms.htm or from any IDWR office. Claimants can call IDWR, Western Region at (208) 334-2190 to make an appointment if they need assistance filling out a Notice of Claim form.

Sincerely,

David R. Tuthill, Jr., P.E.

RE: Water Rights in Reporting Area 15, Basin 65
Snake River Basin Adjudication (SRBA)

Dear Water Right Claimant(s):

Please find enclosed the Idaho Department of Water Resources recommendations for your water right(s) in part 1 of basin 65 (the North Fork of the Payette River drainage area). We have also enclosed instructions for reviewing (1) your recommended water right(s), and (2) other recommended right(s) in your area. Water rights for nearly all domestic and/or stockwater rights were recommended separately in an earlier report, and most of those now have been decreed by the SRBA Court.

Note you have 120 days in which to review the water rights of other claimants and to file any objection to our recommendations. Information on the other water rights can be found at the county courthouses in Cascade, Idaho City, Emmett, Payette, and Weiser, and at all of the Idaho Department of Water Resources offices (see addresses in enclosure).

If the SRBA Court does not receive an objection to our recommendation from you and no other party objects to your water right, your water right will be decreed early next year as recommended. You will receive your decree from the SRBA Court.

Completion of the SRBA is important for the future of water management in Idaho. We invite you to contact our regional offices with any questions you have about your water right(s) or this adjudication process.

Sincerely,

Karl J. Dreher
Director

KARL J. DREHER
DIRECTOR

September 29, 1999

Dear Water Right Claimant(s):

The Idaho Department of Water Resources (IDWR) has completed its initial investigation of your water right claim(s) in the Snake River Basin Adjudication (SRBA). We have enclosed a print-out showing our preliminary recommendation regarding how your water right should be reported to the SRBA District Court.

Please review the preliminary recommendation carefully. If there is any information on the print-out you believe is inaccurate, please fill out the enclosed reply indicating what changes you believe should be made. Further instructions to assist you with the review are enclosed. For water rights with an irrigation water use, a Geographic Information System (GIS) computerized image of the place of use for your water right is also enclosed.

You may return this reply in person to us at a public meeting IDWR will be conducting in your area. **The meeting will be held on Wednesday, October 13, 1999, at 7:00 p.m. in the Senior Citizen Center, 409 School Road, Cascade.** Please come to the public meeting, where you will have an opportunity to find out more about the SRBA process and speak with a department staff member should you have questions regarding your water right. Please bring any and all information you have which will help the Department understand your water rights and describe them accurately.

This process is intended to ensure IDWR recommends your water right accurately to the SRBA District Court. This is the easiest and least costly means for you to identify corrections you believe should be made to our recommendation. Completion of this process is an important step toward the overall success of the adjudication in Idaho. Your participation is necessary so that accurate information is provided to the SRBA District Court.

We look forward to hearing from you.

Sincerely,

Karl J. Dreher
Director

SRBA CHAMBERS
P.O. BOX 2707
TWIN FALLS, IDAHO 83303-2707

Dear Water Right Claimant:

To help you with your water right claim(s) in the Snake River Basin Adjudication, this letter of explanation is being sent to you along with information sent by the Idaho Department of Water Resources (IDWR). Included are the following important documents which I ask you to please read carefully because they give you the opportunity to save a great deal of time and money:

1. **Preliminary Recommendation.** This is IDWR's *initial* finding and conclusion about your water right and how it should be reported to the SRBA Court. This preliminary recommendation is not filed with the court, but is provided to you to help correct errors or resolve any disagreement you may have over its content. This document has been prepared following IDWR's investigation and may be different than the claim(s) you actually filed.

Therefore, please review this preliminary recommendation carefully to find any errors or disagreements you have with IDWR's findings.

2. **Error Correction/Settlement Process.** This preliminary recommendation is a special service provided to you by IDWR to help you correct errors and resolve any other disagreement you have before the actual recommendations are ultimately filed with the court.

A description of how to work with IDWR is included. Our experience in the SRBA shows that by working in cooperation with IDWR most errors and differences can be addressed before coming into court. It's well worth your time to take full advantage of IDWR's helpful service. If your disagreement cannot be resolved, you will be able to file an objection to IDWR's actual recommendation when it is filed in court and have the final decision made by the Presiding Judge.

This error correction service is an important opportunity for you to work together with IDWR to make sure your water right claim(s) are decreed accurately. There is no cost to you other than your time reviewing the preliminary recommendation and talking to IDWR about any problem you see. Of course, you may always employ the services of an attorney if you wish.

The goal of the SRBA is to see that your water right(s) are decreed by the court as accurately and fairly as possible. It is important to me that this is done efficiently in order to reduce your costs and present you with your decree.

I strongly encourage you to take full advantage of this opportunity to use the fine and courteous service provided by IDWR.

Sincerely yours,

A handwritten signature in black ink that reads "B. Wood".

REPORT OF ENGINEER

Permit No. 14689

This project is for Beneficial Use

In Water District No.

1. Name of applicant Lake Reservoir Company
2. Source of water supply Big Payette Lake
3. Location of point of diversion: Is in the Big Lost of Section 8
T. 18 N. R. 3 E. County of Valley

4. Describe works as they exist, giving dimensions and capacities of same: A low concrete dam 125 ft long with a 12 ft face designed for "A" frame and flash plank control. These frame allowing of a 5 ft control of Lake water level.

5. Water is used for: Irrigation
6. State whether or not water has been turned into works of diversion: Yes

7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if for other than irrigation): Emmett Irrigation Dist. system; Farmers Co-Operative Irrigation Limited, system; Enterprise Ditch Co., system; Letha Irrigation Co. system; Noble Ditch Company system; Lower Payette Ditch Co., Ltd., system.

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach? Snake R.
Remarks: See Snake River Dam project on file in the State Engineer's office. A dam is being constructed on the Snake River at the mouth of the Snake River, and the water from this dam will be used for irrigation.

Beneficial use as stated by the Permittee:

Name of User	Quantity Consumed	Estimated Cost
Emmett Irrigation Dist.	22500	
Letha Co.	13500	
Enterprise Ditch Co.	2400	
Farmers Co-Op.	16500	
Lower Payette Ditch Co.	10000	
Payette Heights Water Dist.		

This examination was made on the 27th day of July, 1932

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE, IDAHO
REPORT OF ENGINEER

Permit No. **14689**

This project is for **SOAP. JONES**

In Water District No. **70**

1. Name of applicant **Lake Reservoir Company**
2. Source of water supply **Big Payette Lake Reservoir**
3. Location of point of diversion: Is in ~~xxx~~ **lot 3** of Section **8**
T. **18 N.**, R. **S. E. B. E.**, County of **Valley**

4. Describe works as they exist, giving dimensions and capacities of same: *Flank beam dam, 25 ft long x 12 ft base, concrete abutments, wing walls 25 ft long, 16 in minimum thickness x 6 ft high a low deck dam. Water controlled by plank plank & A frames, latter being 5 ft in effective planking height. This structure is located 300 ft below outlet of Payette Lake.*

5. Water is used for: **storage, irrigation and domestic**

6. State whether or not water has been turned into works of diversion: **yes**

List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if for other than irrigation): **All lands lying under and being irrigated by Emmett Irrigation District,**

Letha Irrigation Company, Enterprise Ditch Company, Farmers Co-operative Irrigation Company, Lower Payette Ditch Co., and Payette Height's Irrigation District.

(Submit map on attached plat, showing location and details of above description.)

8. What large stream will the water here pass on and finally reach? **Payette River**

Remarks: *See map on attached plat for details of water control structure, including the 5 ft high and 16 in thick plank & A frames.*

This examination was made on the **15th** day of **July**, 19**24**

(Signed)

Frederick H. Jones

Examiner.

MEMORANDUM

May 23, 1979

TO: Jo Beeman

FROM: Don Shaff

SUBJECT: Big Payette Water Rights

The question arose of whether the Big Payette Lake maintenance elevations to which two parties agreed was a part of a water right when those elevations were further defined by a court decree.

The documents that pertain to the question are attached. In the Proposed Finding the two rights appear in Volume II, page 33. License 65-2333 was authorized by Section 67-4301, Idaho Code. Would you please review them and respond to the following concerns:

- 1) Would the water right 65-2278 be based on a license or decree, the former was recommended in the Proposed Finding?
- 2) Is a remark necessary for 65-2278 stating, "This right shall raise the elevation of Big Payette Lake no more than 4989.29 feet above mean sea level, nor less than 4983.75 feet above mean sea level."
- 3) With such a remark, is the volume 27,750 acre-feet as described in the Proposed Finding a part of the water right. This figure was calculated from capacity curves using the gauge heights as a parameter.

Department policy has been, I understand, to consider agreement between water right holders not part of their water rights. My questions came about because the decree refers to the water rights and defines one of those water rights in relation to the other. If there are areas I may have overlooked, please comment on those.

not in elevation

TO FILE:

On June 4 this office received the attached rating curve of Big Payette Lake. The attached decree indicates that Lake Reservoir Company can store from Gage Height 1.51' to 7.05'. From the rating curve this amounts to 26,300 AF storage, which is a substantial amount (2200 AF) less than the storage amount claimed.

In an effort to find the source of the 28,500 figure I contacted Ed Finson (Vice Pres) and Arthur Koskella (Pres). They did not know the source but ^{Mr Koskella} indicated ^{they} would check with the board at their meeting on July 9. He will contact us if they have any leads.

Mr Koskella also suggested that we contact the USGS to see if they came up with the original figure. This day I contacted R. Luther Kelstrom of the USGS, who will contact us if he finds any such records. If not, we will go with 26,300 AF. / Kelstrom found no records of such measurement

DRT 6-13-77

DET 6-13-77

We received from Alan Robertson a map of Big Payette Lake on which the original estimate of 28,500 ASA was originally made. This map was drawn in 1920 and averages the area at high water and at low water to arrive at this figure. It is ^{probably} not as accurate as the attached rating chart. DRT 8-77
