Boise, ID 83702

Dear Mr. Jackson:

In an effort to standardize water rights in the Payette River Drainage Basin for presentation to the court, we have reviewed your claim 65-2427 (copy enclosed). We note that this water right has been claimed by your association as well as the U. S. Forest Service.

You will recall that I advised the owners of the Long Creek summer homes to form the association and to make a joint filing. The claim that you filed has been properly recorded and represents the water use of your entire system. In the absence of a federal government claim, it would properly protect your water right.

However, since the U. S. Forest Service also claimed the right, we must examine our standard procedures to determine which claim we will recommend to the court. Since your cabins are located on federally owned lands, your situation is analogous to the state leased lots around Big Payette Lake. In many cases the state land lessee owns both the cabin on the land and the system that provides water. However, all water rights on state leased land are recommended in the name of the state due to two factors: 1) continuity of ownership, and 2) the commonly held principle that the water right is attached to the land.

By these standards water right 65-2427 must be recommended in the name of the U. S. Forest Service. Therefore, we will consider their claim to have amended yours. However, we will include a remark on the recommended rights which states "Use by Long Creek Water Users Association". Please realize that this recommendation in no way changes your water right: the name on the right is merely a vehicle of information conveyance. We will continue to send you information regarding this water right throughout the adjudication procedure.
