DIRK KEMPTHORNE
Governor

KARL J. DREHER
Director

Dear Basin 65 water user:

This letter is to inform you that you may be eligible to file a stockwater claim with the Idaho Department of Water Resources (IDWR) in connection with the Snake River Basin Adjudication (SRBA). IDWR is sending this letter to water users in Basin 65 who might have relied upon the non-irrigation season stockwater provision in the Payette Adjudication. This provision states:

"When stockwater is not a specifically mentioned use for a right that includes irrigation, a reasonable flow is implied and included for the watering of livestock during the non-irrigation season."

In another basin, the Idaho Supreme Court struck down general provisions that contained similar language. The non-irrigation season stockwater language quoted above was not included in the General Provisions for Basin 65 because of the Idaho Supreme Court's ruling.

IDWR recognizes that in reliance on the non-irrigation season stockwater language in the Payette Adjudication, water users might not have filed stockwater claims in the SRBA to cover the non-irrigation season period. Individuals who historically watered livestock during the non-irrigation season without a separate stockwater claim might desire to file a new stockwater claim with IDWR.

To be eligible for a new non-irrigation season stockwater claim:

1. You must have actually and historically watered livestock during the non-irrigation season without a separate stockwater right.
2. You must have filed a surface water irrigation claim in both the Payette Adjudication and the SRBA.
3. You must not have filed a stockwater claim with the surface water irrigation claim.

If you meet these three requirements, you may file a Notice of Claim form for stockwater with IDWR. **To have a timely filing you must file this claim with IDWR by May 25, 2001.** IDWR will waive filing fees for these stockwater claims if filed before this deadline. Failure to file your claim in a timely manner may prevent you from claiming it in the future. Notice of Claim forms are available on IDWR's website at www.idwr.state.id.us/info/water/srba/forms.htm or from any IDWR office. Claimants can call IDWR, Western Region at (208) 334-2190 to make an appointment if they need assistance filling out a Notice of Claim form.

Sincerely,

David R. Tuthill, Jr., P.E.

CONDITIONS / REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Use of water under this water right will be regulated by the watermaster of State Water District No. 65.
6. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.5 afa per acre for the lands above.

TO: CARTER FRITSCHLE^{af}/ADJUDICATION
FROM: PAM SKAGGS^{CP}/WATER ALLOCATION
SUBJECT: FIELD EXAM INFO/RIGHT NO. 65-02847
DATE: December 20, 1994

=====

On 09-20-94 I conducted a field exam on Permit No. 65-02847. I was accompanied by the current ranch operator, Tim Cooper, who described the current use of rights on the acres under this permit. The permit holder Clayne Cooper could not be contacted; he is divorced and a his former wife, Marjorie, appears to be the current owner of the property. Tim Cooper is their son who operates the ranch under the name CM Ranches.

Right Nos. 65-01854 and 65-01858 appear to overlap this right, but are no longer used according to Mr. Cooper. He noted that water from the old drain, point of diversion for wastewater under these rights, is no longer used on these acres. These rights are claimed in the SRBA by Clayne Cooper and should be modified or disallowed to reflect this change or non-use.

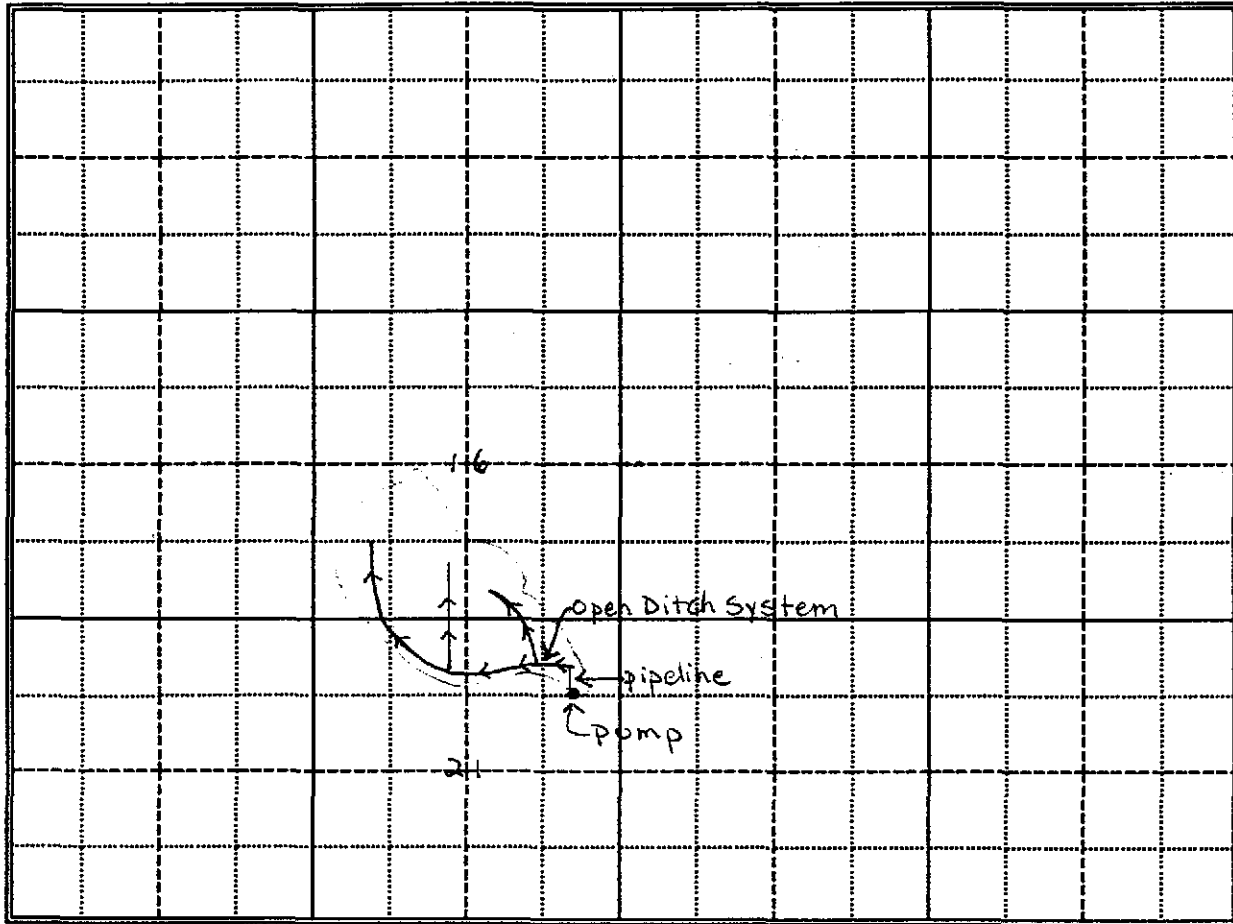

4-6-2000

During a meeting with Marjorie & Tim Cooper on 4-4-2000, they indicated the waste water rights were not used for several years because of disrepair the the ditch system but can still be used when the repairs are completed. Therefore, both rights will be recommended as decreed in the PRBA.

E. NARRATIVE/REMARKS/COMMENTS

A 5 HP pump set in natural channel of river lifts water to an 8-10" pipeline. Diversion pipeline runs approximately 20' to dump open discharge into a main ditch. The main ditch runs along the southerly edge of the property with 3 laterals to carry water through fields. Pastures are flood irrigated and all except one has been leveled to assist in uniform application to fields.

Right Nos. 65-01854 + 65-01858 appear to overlap this right, but are no longer used according to current user. He noted that water from the old drain, P/D for wastewater under these rights, is no longer used. This right is the sole source of water used on these acres. SRBA claims on these rights should be relinquished or disallowed due to non-use. (memo sent to AS section)

No Measurement possible during exam due to low water this time of year + continued drought conditions.

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 168.1 \times 4.5 = 756.5$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = 3.36 \times 245 \times 1.9835 = 1632.8$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 756.5 \text{ afa}$$

2. Volume Calculations for Other Uses: NA

_____)

ORDER MODIFYING REQUIREMENTS
FOR COMPLETION OF PERMIT TO
APPROPRIATE WATER

WHEREAS, the 39th Idaho Legislature made certain amendments to the Idaho Water Law; and,

WHEREAS, these changes raised questions as to the procedures to be followed by holders of permits issued prior to the effective date of the amendments, May 31, 1967; and,

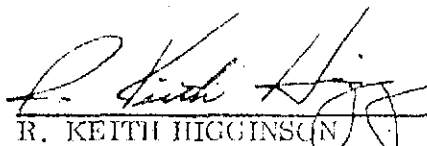

WHEREAS, on August 1, 1968, the Department of Water Administration adopted Rules of Practice and Procedure for the processing of such permits issued prior to May 31, 1967; and,

WHEREAS, Permit No. 32947 was issued previous to that date;

NOW THEREFORE, the requirements for completion of the above numbered permit are hereby modified to conform to the adopted Rules of Practice and Procedure as follows:

1. The above numbered permit will be completed under the terms of Title 42, Chapter 2, Idaho Code, as amended by the 39th Idaho Legislature.
2. The conditions of the above numbered permit are modified as follows:
 - a. Notice of the issuance of the permit will be published at the permit holders expense for two weekly issues in the official newspaper of the county in which the point of diversion lies.
 - b. The permittee will be required to submit proof of completion of works as originally specified, but will be required to submit proof to the Department of Water Administration of the application of the water to beneficial use on or before June 24, 1977. The permit holder should be aware that failure to complete one-fifth (1/5) of the works within one-half (1/2) of the time originally set for completion of works may be grounds for cancellation at the instance of the department.

WATER RIGHT LICENSE

Maximum Diversion Rate: 3.36 CFS
Maximum Diversion Volume: 756.5 AF

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water conferred by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Use of water under this water right will be regulated by the watermaster of State Water District No. 65.
6. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.5 afa per acre for the lands above.

RE: Snake River Basin Adjudication (SRBA)
Gem County - A65-02847

Dear Mrs. Cooper:

The staff of this agency is coming to the end of investigating "bottom land" claims in the Payette River Adjudication. A matter possibly overlooked when you filed other claims in the Snake River Basin Adjudication was a claim for the enclosed claim unsettled from the Payette action.

Before proceeding to the Gem County court with a revised recommendation, the claim in the SRBA should be filed to give affirmative notice you have not stopped using the water right. By filing the SRBA claim, your contested claim in the Payette adjudication will not be dismissed. Although the contest in the Payette adjudication is the amount of water, and this enclosed form shows the disputed amount of water, this agency will consider the amount of water eventually decreed as the amount of water on this claim. Please have a notary public verify your signature before returning the completed claim form to this office with a \$50.00 filing fee.

If you have any questions or concerns, please contact me.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Donald V. Shaif'.

Re: Civil Case No. 3667
Frasier, et al Objection 65-02847

Dear Payette River Water User,

In July 1982, Richard Frasier, William Conrad, Don Craig, Jay Sisler and Stan Brown on behalf of themselves and others in the same class filed an Objection to the Proposed Findings with the Third Judicial District Court in the Payette River Basin Adjudication. The parties maintained the diversion rate recommended for their water rights and others from the Payette River were not correct for the "bottom lands" irrigated by those water rights.

This group of water rights are among the last water rights remaining for decree in the Payette River Basin Adjudication, most of which were decreed on January 21, 1986. The water rights decreed in the Payette adjudication will be incorporated into the eventual decree in the larger Snake River Basin Adjudication (SRBA) now proceeding in the Fifth Judicial District, provided new claims have been filed in the SRBA. Otherwise the achievement of a decree in the Payette adjudication could be voided.

Your water right referenced above was listed in the Proposed Finding with a diversion rate of 5.0 cubic feet per second (cfs). You will find enclosed a two-page form that when completed by you will describe your water delivery system and irrigation methods. The information you supply is essential in order for the staff of the Department to evaluate your irrigation water requirements. Much of the information required is technical, and you may wish to contact the Soil Conservation Service or other professionals for assistance with the form.

To expedite the process to resolve the Frasier objection, please return the enclosed form within 45 days. Without the completed form, the Department will assume you agree with the water right described in the Proposed Finding with the diversion rate shown above.

Please contact me if you have questions about the matters set out above. Thank you for your patience in this process.

Regards,

Donald V. Shaff
Manager, Adjudication Section

Dear Mr. Cooper:

After looking over claims to water rights that you have filed for the appropriation of water in Sec. 16 and 21, T. 7N., R. 3W., I am confused about the points of diversion of each claim and how each claim interrelates to the irrigated land.

At your convenience, would you please contact this office so we may make arrangements to clarify the ambiguities in each claim? Your cooperation will assist us in expediently making recommendations of your water rights.
