6. If the change in ownership affects the entire water right for each water right or adjudication claim number listed in item 1, THEN SKIP THIS ITEM AND GO TO ITEM 7. If the change in ownership divides the water right(s) among multiple owners, you must describe, in detail, your portion of each water right after the change. Fill in the appropriate spaces in the box(es) below to describe your water right(s) after the change (one water right per box, you may copy this page as necessary). If your quantity of water is greater than a proportionate split, you must attach documentation to show justification for a larger amount. If you are not sure how to identify your portion of the original water right or adjudication claim records, please contact the nearest IDWR office for assistance.

The Grantor executes this instrument solely in its fiduciary capacity and covenants only that it is authorized to make this conveyance in such fiduciary capacity. The Grantor hereby disclaims any and all other warranties and covenants, whether express or implied. Any further recourse hereunder is to be only against the aforementioned trust.

The property conveyed to the Grantee by this deed shall be the Grantee's sole and separate property, and all the income, rents, issues, profits, gains, and appreciation of said property shall also be the separate property of the Grantee.

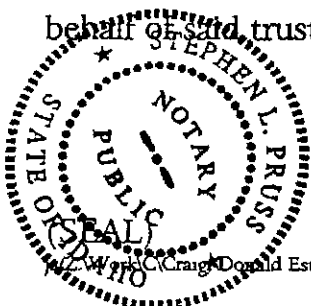

Dated this 29th day of November, 1999.

Identify water right(s) for which extension is requested

State why an extension of time is requested explaining how a diligent effort has been made to meet the deadline:

With continuing litigation over this water right and others located along the river, I
presumed filing a claim on this water right was unnecessary particularly when it was not
mailed to me like my domestic well was. The latter claim was filed 1/29/90. In my frequent
contacts with IDWR personnel on the litigation and other matters, no mention was made of the
filing requirement until Don Shaff called me about a copy of the soils map on 6/25/91.

Claimant requests an extension to July 12, 19 91

MEMORANDUM

April 6, 1995

TO: Any PRBA Claim with a Stipulation
FROM: RON HOWERTON

RE: RECOMMENDATIONS/STIPULATION

I. CONVERSATION WITH DON SHAFF:

1. Met with Don 4/5/95 at S.O. on how to proceed with "R" file recommendations.
2. Don re-confirmed that the stipulation amends the "A" claim, thus for the split ownership of this right both the "A" and "R" files can be completed.
3. He said that because of the stipulation no field exam is needed, nor do I need to print a CVR. In place of the CVR I'm to print out a profile report with comments pertaining to the stipulation.
4. I asked him if the copy of the stipulation he gave me had enough signatures on it to make the recommendation? He said yes.

II. CONVERSATION WITH JEFF PEPPERSACK

1. Met with Jeff 4/5/95 at S.O. asked if he had any paperwork pertaining to how much water was recommended for this right. He said that he thought Dan Steckel had all of it.

III. CONVERSATION WITH DAN STECKEL

1. Called Dan at S.O. 4/6/95 asked if he had the paperwork that showed how much water was to be recommended for this right. He said Don had it in his Boyd Jackson's file.

IV. CONVERSATION WITH DON SHAFF

1. Called Don at S.O. 4/6/95 asked him if he had the paperwork for the amount of water recommended? He said yes he did. He said that eventually that file would come over to Western. I asked if I needed to put the paperwork showing how much water was to be recommended in that file? He said yes, but it may be several months before he would send that file to us. So I asked was it necessary for me to have it to make the "R" file recommendation? He said no, proceed with the recommendations.

May 23, 1995

SPRING MEETING WITH DAVE SHAW & HIS ATTORNEYS:
Ref: OWNERSHIP CHANGES

1. Dan Steckel said that after an ownership change has been made, he needs a copy of the Ownership Change when completed. He doesn't need a copy of the claim.
2. During our conversation with Dave Shaw and Don Shaff, the Attorney's were in agreement that the stipulation's we have copies of now can be used to amend the "A" claim the same way as a Transfer would.
3. A recently licensed permit can also be used to amend the claim with an ownership change with an added requirement. A letter must accompany the ownership changed claim, stating that the claimed permit was licensed since this claim was filed, the claim has been revised to correspond to the licensing. If they have any difficulty with this clarification, they need to contact our office within 30 days of the letter. (The "A" claim is given a "T" status for the 30 day period.

Re: Civil Case No. 3667 - Frasier, et al Objection 65-04028

Dear Payette River Water User,

In July 1982, Richard Frasier, William Conrad, Don Craig, Jay Sisler and Stan Brown on behalf of themselves and others in the same class filed an Objection to the Findings with the Third Judicial District Court in the Payette River Basin Adjudication. The parties maintained the diversion rate recommended for their water rights and others from the Payette River were not correct for the "bottom lands" irrigated by those water rights.

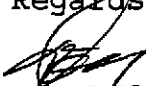

This group of water rights are among the last water rights remaining for decree in the Payette River Basin Adjudication. Most of the water rights were decreed on January 21, 1986 and in subsequent partial decrees.

Your water right referenced above was listed in the Proposed Finding with a diversion rate of 2.00 cubic feet per second (cfs). Having reviewed the data submitted by the parties and data and evidence obtained by the Department, the Department recommends a diversion rate of 2.00 cfs. If the amount of water is not proposed to change, data and/or evidence indicated a change was not justified.

The Department has made an effort to determine a fair and accurate diversion rate for each of the parties. If you disagree with the proposal above, please contact us by May 15, 1992. We hope to resolve any disputes that may exist before going to the court asking for a decree of your water right through a Motion for Summary Judgment.

A summary judgment allows the judge to make a decision without the time or expense of a trial when the facts are not disputed. Notice of this motion and the accompanying hearing will be provided to you 28 days before the hearing.

Regards,

Donald V. Shaff
Manager, Adjudication Section

AN ANALYSIS OF
IRRIGATION REQUIREMENTS
ON RIVER BOTTOM SOILS
ALONG THE PAYETTE RIVER

The Soil Conservation Service was requested by Richard Frazier to study his irrigation system to determine possible efficiency improvements and to suggest as amount of water that would be needed to adequately irrigate his farm. Mr. Frazier's farm is located NW of Emmett along the Payette River - $S\frac{1}{2}$ and $NE\frac{1}{4}$ of the $NE\frac{1}{4}$, Sec. 5, T6N, R2W.

The soils in the fields evaluated are Moulton fine sandy loam. This soil is underlain by gravel at a depth of 20-55 inches. A seasonal water table occurs in this gravel layer if drainage has not been applied. This is the dominant soil of the Payette River flood plain.

Our irrigation trials on corn showed an in-field irrigation efficiency of 27%. The field had 1200 foot lengths of runs with a furrow intake rate of 1.1 gallons per minute per 100 feet. This data though not official correlates well with other studies done in Payette and Canyon County on similar soils, showing an efficiency range of 25-30% on better managed systems.

Mr. Frazier has 81 acres of this soil type with a cropping rotation of corn, grain and pasture. An evaluation of this rotation's weighted consumptive use requirements (.25"/day) and the water holding capacity of the fine sandy loam soil (1.5@ 50% field capacity) shows an irrigation return time of 6 days is necessary during July. The net water to be replaced during each irrigation would be about 1.5 inches. Figuring an overall system requirement for the 81 acres using the in-field efficiency factor of 27% calculates out to 170 miner's inches or 2.1 miner's inches per acre. (See attached ID-ENG-40) Though

delivery system losses were not measured, I would estimate a 35% loss is incurred where open ditch systems are used.

There are some management practices that can be done both in-field and in the delivery system to minimize water losses. Concrete ditches, pipelines and gated pipes will cut delivery losses. Cutting irrigation lengths of runs, closer adjustment of water and length of time per irrigation set can cut field loss. Installation of sprinkler systems improve irrigation efficiencies dramatically. These are all realistic possibilities and any one of these could possibly be used to gain some water use efficiency. Of course, the limiting factor is capital investment and/or additional labor time. The in-field efficiencies we found on Mr. Frazier's and Mr. Jay Sisler's places were probably above average for these soil conditions.

On farm delivery system losses could be reduced to 15%. In-field irrigation efficiencies in this case do not appear possible to improve upon without conversion to a sprinkler system or by drastic reorganization of irrigation methods which would require a high labor input, (i.e., 400 foot runs and 4 hours set time). An on-farm delivery of 2.5 miner's inches per acre would appear adequate to irrigate this type of soil, and still leave the burden of improvement of on-farm delivery systems to the landowners.

This analysis does not consider the economics of making these suggested improvements on any operator's farm. These figures are based upon the SCS's Idaho Irrigation Guide, our field office staff's experience and

knowledge of local soils, crops, current farm operation and management methods.

This soil and closely associated soil types occur on about 4500 acres adjacent to the Payette River in Gem County. This analysis could reasonably be extended to include them.

RE: Visit of Don Craig

Mr. Craig met with me this morning to obtain data from measurements made at his farm in 1986. The data will be used to assist him in completing the Additional Water Requirement information sheet. The memo and map compiled in 1986 and placed in the Seitz Ditch file was copied and made a part of this file as well.

In the course of the discussion Mr. Craig revealed the storage situation that existed in 1986 is no longer utilized. At that time the crop in the vicinity of the pond was pasture hay. Since then less water tolerant crops have been planted and requires a furrow/corrugate water management practice. Additionally, he said he is no different that many farmers who have used extensive land leveling. The field in the northwest corner of his place was once seven fields where now there is one. Another field that is now about 22 acres was once only eight acres. He asserted the soils are two foot silt-loams with gravel underneath that he will support with the soil map he had today. He also showed me SCS figures calculated for one or two fields that had field efficiencies of about 10 per cent.

Re: Civil Case No. 3667
Frasier, et al Objection 65-04028

Dear Payette River Water User,

In July 1982, Richard Frasier, William Conrad, Don Craig, Jay Sisler and Stan Brown on behalf of themselves and others in the same class filed an Objection to the Proposed Findings with the Third Judicial District Court in the Payette River Basin Adjudication. The parties maintained the diversion rate recommended for their water rights and others from the Payette River were not correct for the "bottom lands" irrigated by those water rights.

This group of water rights are among the last water rights remaining for decree in the Payette River Basin Adjudication, most of which were decreed on January 21, 1986. The water rights decreed in the Payette adjudication will be incorporated into the eventual decree in the larger Snake River Basin Adjudication (SRBA) now proceeding in the Fifth Judicial District, provided new claims have been filed in the SRBA. Otherwise the achievement of a decree in the Payette adjudication could be voided.

Your water right referenced above was listed in the Proposed Finding with a diversion rate of 2.0 cubic feet per second (cfs). You will find enclosed a two-page form that when completed by you will describe your water delivery system and irrigation methods. The information you supply is essential in order for the staff of the Department to evaluate your irrigation water requirements. Much of the information required is technical, and you may wish to contact the Soil Conservation Service or other professionals for assistance with the form.

To expedite the process to resolve the Frasier objection, please return the enclosed form within 45 days. Without the completed form, the Department will assume you agree with the water right described in the Proposed Finding with the diversion rate shown above.

Please contact me if you have questions about the matters set out above.
Thank you for your patience in this process.

Regards,

Donald V. Shaff
Manager, Adjudication Section

Enclosed is a copy of a protest(s) filed against the issuance of a permit pursuant to your Application No. _____. The Department suggests you contact the protestant(s) directly in an effort to determine the nature of the protest(s) and to attempt to resolve the protest(s).

If this office has not been advised within twenty (20) days that the protest(s) has been resolved, the matter will be scheduled for conference and/or hearing. At such a conference and/or hearing, the following are the principle items the Department can consider in either approving or denying the application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

If this office can be of further assistance, please contact us.
