INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Sections 42-248 and 42-1409(6), Idaho Code. Section 42-248 requires certain property holders to notify the Department of Water Resources (IDWR) of any change in mailing address or ownership of all or part of a water right record on file with IDWR. Section 42-1409(6) provides that new property owners must notify IDWR of any change in ownership of a water right during an adjudication of water rights. Required claims may be filed by a new owner.

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. Please contact your nearest IDWR office, or call 1-800-451-4129, if you would like more information or need help completing this form. Please attach additional sheets to the form if you require additional space to describe or explain any of the items on the form.

1. If there are water rights associated with the property, the seller should be able to provide you with the water right or adjudication claim number(s). Please enter these number(s) at **Item 1**. If you or the seller believes there are water rights for the property but the numbers are unknown, you may wish to contact IDWR for assistance in identifying the water rights for the property in question. If claims for the rights are required, and have not been filed, IDWR will so advise you.
2. The information described at **Item 2** is required, since IDWR cannot process the requested change without documentation of ownership. The preferred types of documentation are shown; contact IDWR if you have difficulty obtaining this information. Do not obtain a new survey for purposes of this form before contacting IDWR.
3. Please provide the name and address of the former owner of the water right and/or adjudication claim at **Item 3**.
4. The name, mailing address, and telephone number of the new owner(s) is entered at **Item 4**. Please indicate the relationship between multiple owners by using the connector 'and', 'or', or 'and/or'. If an 'and' is used, all parties must sign this form. If an 'and/or' or 'or' is used, all parties may sign. However, only one of the named parties is required to sign.
5. At **Item 5**, please provide the date the property in question was acquired. This may be the date of "closing" in the case of a real estate transaction or the date of court order for other types of ownership changes.
6. You may be purchasing only a portion of the total water right held by the seller. This means the water right held by the seller may be "split" to provide your share of the right in question. Be sure to include a description of the portion of the water right you have purchased at **Item 6**.

Please provide as much detail as possible concerning your water right: include the number of homes, irrigated acreage if more than 1/2 acre is irrigated, type and number of stock if your right is for stockwater, etc. In the absence of information to the contrary, IDWR will assume the intent is to split the rights *proportionately*.

7. The new owner(s) must sign the form in the space(s) provided at **Item 7**. Corporations and other organizations must submit a list of directors or officers demonstrating the authority of the director or officer to sign the form.
8. There is no filing fee. When complete, you should retain a copy and return the original of the form to the IDWR office nearest you:

Dear Basin 65 water user:

This letter is to inform you that you may be eligible to file a stockwater claim with the Idaho Department of Water Resources (IDWR) in connection with the Snake River Basin Adjudication (SRBA). IDWR is sending this letter to water users in Basin 65 who might have relied upon the non-irrigation season stockwater provision in the Payette Adjudication. This provision states:

"When stockwater is not a specifically mentioned use for a right that includes irrigation, a reasonable flow is implied and included for the watering of livestock during the non-irrigation season."

In another basin, the Idaho Supreme Court struck down general provisions that contained similar language. The non-irrigation season stockwater language quoted above was not included in the General Provisions for Basin 65 because of the Idaho Supreme Court's ruling.

IDWR recognizes that in reliance on the non-irrigation season stockwater language in the Payette Adjudication, water users might not have filed stockwater claims in the SRBA to cover the non-irrigation season period. Individuals who historically watered livestock during the non-irrigation season without a separate stockwater claim might desire to file a new stockwater claim with IDWR.

To be eligible for a new non-irrigation season stockwater claim:

1. You must have actually and historically watered livestock during the non-irrigation season without a separate stockwater right.
2. You must have filed a surface water irrigation claim in both the Payette Adjudication and the SRBA.
3. You must not have filed a stockwater claim with the surface water irrigation claim.

If you meet these three requirements, you may file a Notice of Claim form for stockwater with IDWR. **To have a timely filing you must file this claim with IDWR by May 25, 2001.** IDWR will waive filing fees for these stockwater claims if filed before this deadline. Failure to file your claim in a timely manner may prevent you from claiming it in the future. Notice of Claim forms are available on IDWR's website at www.idwr.state.id.us/info/water/srba/forms.htm or from any IDWR office. Claimants can call IDWR, Western Region at (208) 334-2190 to make an appointment if they need assistance filling out a Notice of Claim form.

Sincerely,

David R. Tuthill, Jr., P.E.

E. NARRATIVE/REMARKS/COMMENTS

Five acres of grass hay are irrigated with water from the unnamed stream via ditch and gravity irrigation.

A flow measurement was made in a 12" long culvert used in a section of the upper ditch.

Bogus Creek water can also be diverted from a storage pond into the unnamed stream and rediverted into a lower ditch along with water from the unnamed stream to irrigate two of the five acres. This rt when used with 65-07452 (Bogus Creek) is limited to 1"/acre.

The source for this rt is locally known as Corral Creek.

NOTE: Attached are Mr + Mrs Dobson's comments regarding applicant's development. They have earlier priority to Shaper Creek, which the unnamed stream (Corral Creek) is eventually tributary to.

Re: 65-7450, 65-7451, 65-7452

Dear Mr. Hood:

You are quite correct in pointing out that the amendments made at the end of last year did correct the descriptions for the above referenced permits. However, our proposed findings reflected the condition of the water rights as of December 1, 1978. The subsequent approval of those amendments did not occur until December 15, 1978 and January 10, 1979, and as a consequence were not shown in the proposed findings.

The changes that occurred to permits as well as any other recommended water rights after December 1, 1978 will in no way affect those water rights as they are recommended. The process of amending permits and transferring water rights can continue. As a result, we will not ask the court to make any changes to these permits as you have requested.

Thank you for your careful review of our findings; I hope it has not caused you a great deal of inconvenience.

Sincerely,

DONALD V. SHAFF
Adjudication Section Supervisor

Gentlemen:

After receiving and reviewing the computer printout of the proposed findings of water rights, I found several errors which I thought were eliminated earlier by my filing of the attached Amendments.

Please review the three attached Amendments and notify the court of these changes. If you have any questions, please give me a call at 376-6700. Thank you.

Very truly yours,

Permit No. 65-7450

J. A. Terteling & Sons, Inc. of P. O. Box 1428, Boise, Idaho 83701
(name) (address)

State of Idaho, being first duly sworn, upon his oath deposes and says:

That he is the holder, or the duly authorized agent of the holder*, of Permit to Appropriate the Public Waters of the State of Idaho No. 65-7450.

That under the terms and conditions of said permit, work thereunder was required to be completed by April 1, 19 78.

That he has heretofore performed the following work described under said permit:
Constructed Header Ditch w/16" Headgate, and 6 (8") Dropgates.
Installed Culvert and necessary diversion requirements.
System is completed and will be used this Summer.

Costing \$524.00

That he is unable to complete the remainder of the work within the required time for the following reasons, to-wit: All work has been completed, but
due to short water year in 1977 and revised farming schedule,
will not be able to initiate irrigation until after permit
expiration: therefore request extension.

WHEREFORE, he asks that the State Reclamation Engineer extend the time for the completion of obligations under said permit to April 1, 19 79.

10 Remarks Since we are dependent upon the use of Corral Creek for stock water, approval of this permit would depend upon prior approval of our Bogus Creek Diversion, which would carry Bogus Creek water in a short ditch to the Corral Creek Channel. (See Application No. 85-7452.)

Use of Corral Creek would be limited to its available run-off. We estimate its economic use, for improvement of a horse pasture, to be confined to the period 15 April to 25 June.

Water requested in excess of 5 miners inches is to allow transportation of water from the point of diversion by ditch through granitic soils.

Point of Corral Creek diversion would be upstream from entry point of Bogus Creek Diversion.
