1.

Could not measure mainline (polymeric) or sprinklers (Kand-keld psi gong) in any of 3 visits between 1987 & 1991.

No pump curve available.
No flow measurement requirement or permit.
Rely on pump tag and HP equation.

(1) Standard HP equation
if $HP = 325$
 $psi = 40$
 $ext = .7$
 $z = 3$ (source + pump)

$$Q = \frac{(8.8)(.7)(325)}{(2.31)(90) + 3} = \frac{1994.7}{84.9} = 23.5 \text{ cfs}$$

$$Q = \frac{(8.8)(.7)(128)}{(2.31)(90) + 3} = \frac{794.7}{84.9} = 9.36 \text{ cfs}$$

$$Q = \frac{(8.8)(.5)(128)}{(2.31)(90) + 3} = \frac{587.2}{84.9} = 6.92 \text{ cfs}$$

$$Q = \frac{(8.8)(.5)(325)}{(2.31)(90) + 3} = \frac{1494.7}{84.9} = 17.6 \text{ cfs}$$

(2) Modified HP equation
where Brake HP (BHP) = 128

(b) where BHP = 128 and $ext = .5$
conservatively not a very efficient system based on mainline problems

(c) if BHP not used but $ext = .5$

(3) Pump Tag and HP eq.
Tag = 1500 gpm max. (best available info) 1500 gpm = 3.34 cfs
Question: can 325 HP produce the 3.34 cfs max output?
REFERENCE: Hydraulic Handbook (11th ed.) as described to examine by DRT

$$HP \text{ eq. where: } Q = \frac{TOH}{(1.49)(8.8)(ext)}$$

where: $TOH = TOH_1 = H_B + H_C$

$$TOH = TOH_2 = H_A + H_C_{friction} + H_F$$

if: $A = 1.4$ ft from source to sprinkler

$= 2.3$ ft from top

$B = 1.4$ ft from source to pump

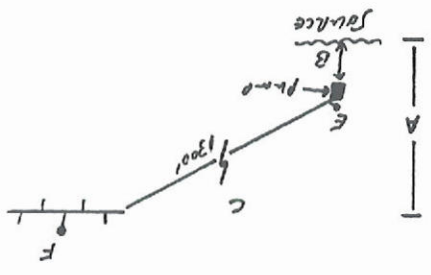

$= 3$ ft from main

$C =$ pipe from pump to beginning of sprinklers; use friction loss table where 10" steel pipe:

$C_{friction} = 1.07$ per 100' of pipe

$E =$ psi at pump
 $= 40$

$F =$ psi at field (sprinkler) into
 $= 47$

Could not measure mainline (polysemin) or sprinklers (hand-held psi gauge) in any of 3 visits between 1987 & 1991.

No pump curve available.

No flow measurement requirement or permit.

Rely on pump tag and HP equation.

① Standard HP equation

if $HP = 325$ $psi = 90$
 $eff = .7$ $Z = 3$ (source to pump)

$$Q = \frac{(8.8)(.7)(325)}{(2.31)(90) + 3} = \underline{\underline{9.49 \text{ cfs}}}$$

② Modified HP equations

② where Brake HP (BHP) = 128

$$Q = \frac{(8.8)(.7)(128)}{(2.31)(90) + 3} = \underline{\underline{3.74 \text{ cfs}}}$$

③ where BHP = 128 and $eff = .5$
 obviously not a very efficient system based on maint. problems

$$Q = \frac{(8.8)(.5)(128)}{(2.31)(90) + 3} = \underline{\underline{2.67 \text{ cfs}}}$$

④ if BHP not used but $eff = .5$

$$Q = \frac{(8.8)(.5)(325)}{(2.31)(90) + 3} = \underline{\underline{6.78 \text{ cfs}}}$$

③ Pump Tag and HP Eq.

Tag = 1500 gpm max. (best available info) $1500 \text{ gpm} = \underline{\underline{3.34 \text{ cfs}}}$

QUESTION: Can 325 HP produce the 3.34 cfs max output?

REFERENCE: Hydraulic Handbook (11th ed.) as described to Examiner by DRT

HP Eq. where: $Q = \frac{(HP)(8.8)(eff)}{TDH}$

where: $TDH = TDH_1 = H_B + H_E$
 or

$TDH = TDH_2 = H_A + H_{C_{friction}} + H_F$

if: $A = \text{lift from source to sprinklers}$
 $= 23' \text{ from taps}$

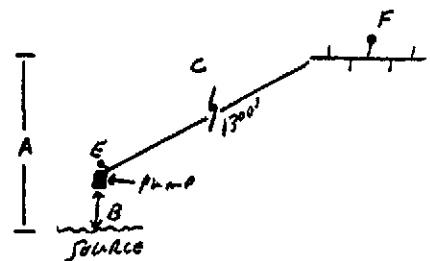

$B = \text{lift from source to pump}$
 $= 3' \text{ from Exam}$

$C = \text{pipe from pump to beginning of sprinklers; use friction loss table where 10" steel pipe:}$
 $C_{friction} = 1.07 \text{ per 100' of pipe}$

$E = \text{psi at pump}$
 $= 90$

$F = \text{psi at field (sprinklers)}$
 $= 47$

} per owner's info

continued

item 3 continued:

TDH_1 should $\pm$ equal TDH_2

$$TDH_1 = 3 + 2.31(90) = 210.9 \approx 211$$

$$TDH_2 = 23 + 13(1.07) + 2.31(47) = 145.48 \approx 145$$

$\uparrow$
 105 gpm 100' of pipe
 1300' of pipe

CAN SEE that $TDH_1 \neq TDH_2$ in above.

Would need high pressure heads to make them $\pm$ equal:
 if $F=75$

$$TDH_2 = 23 + 13(1.07) + 2.31(75) = 210.16 \approx 210$$

Since they are not equal, use TDH value that yields lowest flow estimate:

$$\text{then } Q = \frac{(325)(8.8)(.7)}{211} = \underline{9.49 \text{ cfs}}$$

$$(\text{if used } TDH_2, Q = 13.81 \text{ cfs})$$

IF used BHP = 128 instead of HP = 325:

$$Q = \frac{(128)(8.8)(.7)}{211} = \underline{3.74 \text{ cfs}}$$

In either case, it appears that pump with 325 hp (or 128 hp) engine
can produce the 1500 gpm max. output per pump tag.

FOR licensing, recommend lesser of:

$$\text{"measurement" } 1500 \text{ gpm} = 3.34 \text{ cfs}$$

$$\text{B.h. } 188 \text{ ac} \times .02 \text{ cfs/ac} = 3.76 \text{ cfs}$$

$$\text{excess fee } \$175 = 3.01 - 4.00 \text{ cfs}$$

$$\text{Permit} = 4.00 \text{ cfs}$$

ALLOW 3.34 cfs for 188 acres

NOTE OF INTEREST ALTHOUGH could not be verified: owner info

$$\text{1 line @ } 33 \text{ hds @ } 5 \text{ gpm/hd} = 33 \times 5 = 165 \text{ gpm}$$

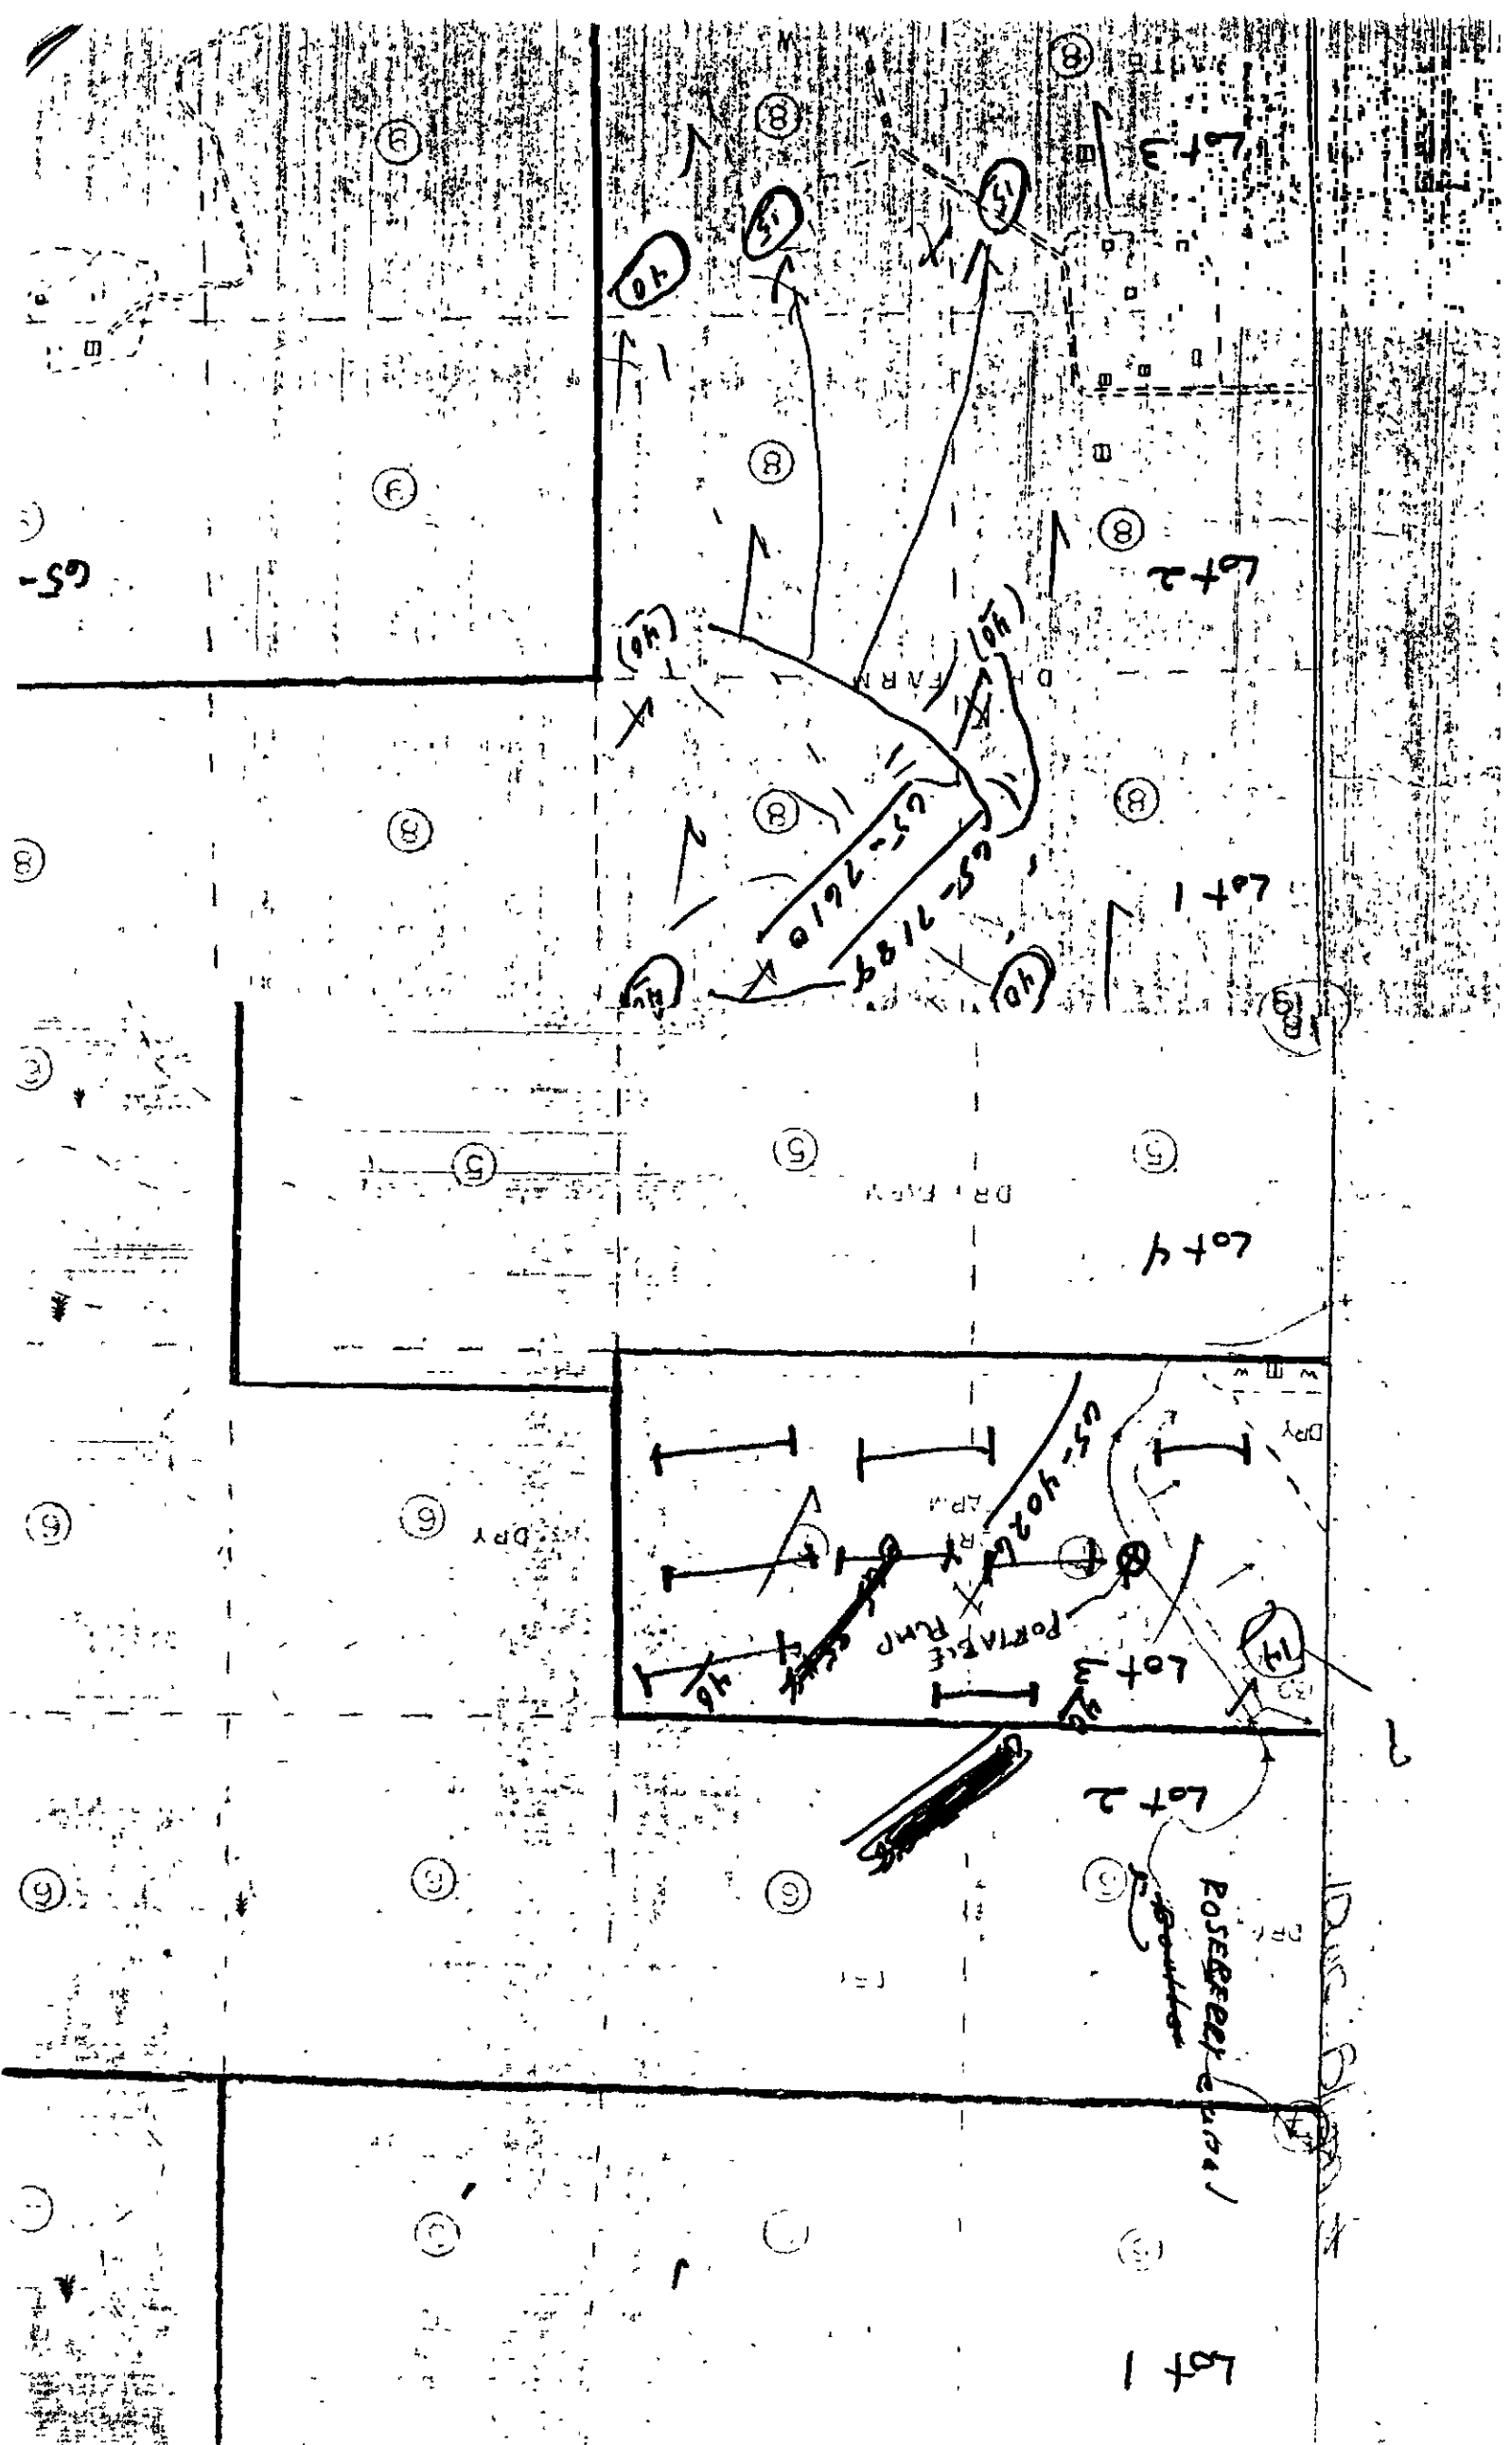

$$7 \text{ lines @ } 33 \text{ hds/line @ } 47 \text{ psi/hd} = (7)(33)(6.96) = 1608 \text{ gpm}$$

$$\frac{\text{psi}}{45} \quad \frac{\text{gpm}}{6.81}$$

$$\text{interpolate} \rightarrow 47 \quad 6.96$$

$$50 \quad 7.18$$

$$\text{TOTAL gpm} = 165 + 1608 = 1773 \text{ gpm} = 3.95 \text{ cfs}$$

HOW YOU WILL RECEIVE NOTICES IN THE SNAKE RIVER BASIN ADJUDICATION

All documents filed in the Snake River Basin Adjudication other than notices of claims are filed with the court. Notices of claims to water rights filed in the Snake River Basin Adjudication are filed with the Idaho Department of Water Resources. Copies of all documents filed in the Snake River Basin Adjudication will not be mailed to all parties (claimants) in the adjudication.

By order of the court, any document filed with the court will be mailed only to those parties who may be directly affected by it. A monthly docket sheet will be prepared by the department which contains a summary of all documents filed with the court in the previous month and the dates and locations of hearings scheduled for the following three months. The docket sheet will be filed with the district court clerk in each county within the Snake River Basin in Idaho. Copies of the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying. If you wish to receive a copy of the docket sheet each month, you should mark the appropriate place on your notice of claim form. You will be charged a small annual subscription fee to cover the cost of copying and mailing. Copies of any document listed on the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying.

Copies of all notices of claims filed with the department will be available for inspection from all offices of the department. Copies of the notices of claims may be obtained in person or by mail, but you will be charged for the cost of copying and mailing. (A claimant will not be charged for a copy of his or her own notice of claim, and a person who acquires property with water rights for which a notice of claim was filed will not be charged for a copy of the notice of claim filed by the previous owner.)

After the notices of claims have been reviewed, the director will prepare and file a report with the court. Part 1 of the report will contain the director's recommendations as to each water right claimed under state law. Part 2 of the report will list each federal reserved water right claimed. A number of reports will be prepared, one or more for each sub-basin in the Snake River Basin. When the report for your sub-basin is filed with the court, you will be mailed a notice informing you that the report for your sub-basin has been filed. The notice will be sent to the most recent address shown by the department's files. Attached to the notice will be a copy of those portions of the report describing the water rights you have claimed. If you do not agree with the way your water right is described, you may file an objection to the report with the court. You can also file an objection if you disagree with the way other claimant's water rights are described, and the notice will tell you where a copy of the full report is available for inspection. The notice will tell you when and where to file your objection. The notice of filing for each sub-basin report will also be published state-wide in local newspapers.

It is very important that you inform the department in writing of any change in your address. This is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

If you are acquiring property with water rights in the Snake River Basin water system in Idaho (either by purchase, gift, inheritance, or other means), it is very important that you inquire of the department whether a notice of claim has been filed. If not, you must file a notice of claim or the water right may be declared by the court to no longer exist. If a notice of claim has been filed, it is very important that you file a written notice of change in ownership with the department. The notice of change in ownership must be accompanied by some evidence of the change in ownership, such as a copy of the deed or a property tax statement showing the name of the new owner. Again, this is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

The cost of the subscription to the docket sheet is \$7.50 for calendar year 1988. The cost of the subscription may increase a small amount for calendar year 1989 if the cost of copying and/or mailing should increase.

If you are planning to file a motion or other pleading (not a notice of claim) with the court (not IDWR), the court has issued an order setting a special procedure that is different from the usual civil rules. A copy of the order may be obtained from any office of IDWR; you may be charged for the cost of mailing and/or copying.

KARL J. DREHER
Director

Dear Basin 65 water user

This letter is to inform you that you may be eligible to file a stockwater claim with the Idaho Department of Water Resources (IDWR) in connection with the Snake River Basin Adjudication (SRBA). IDWR is sending this letter to water users in Basin 65 who might have relied upon the non-irrigation season stockwater provision in the Payette Adjudication. This provision states:

"When stockwater is not a specifically mentioned use for a right that includes irrigation, a reasonable flow is implied and included for the watering of livestock during the non-irrigation season."

In another basin, the Idaho Supreme Court struck down general provisions that contained similar language. The non-irrigation season stockwater language quoted above was not included in the General Provisions for Basin 65 because of the Idaho Supreme Court's ruling.

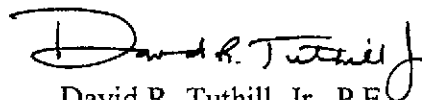

IDWR recognizes that in reliance on the non-irrigation season stockwater language in the Payette Adjudication, water users might not have filed stockwater claims in the SRBA to cover the non-irrigation season period. Individuals who historically watered livestock during the non-irrigation season without a separate stockwater claim might desire to file a new stockwater claim with IDWR.

To be eligible for a new non-irrigation season stockwater claim:

- 1 You must have actually and historically watered livestock during the non-irrigation season without a separate stockwater right.
- 2 You must have filed a surface water irrigation claim in both the Payette Adjudication and the SRBA.
- 3 You must not have filed a stockwater claim with the surface water irrigation claim.

If you meet these three requirements, you may file a Notice of Claim form for stockwater with IDWR. **To have a timely filing you must file this claim with IDWR by May 25, 2001.** IDWR will waive filing fees for these stockwater claims if filed before this deadline. Failure to file your claim in a timely manner may prevent you from claiming it in the future. Notice of Claim forms are available on IDWR's website at www.idwr.state.id.us/info/water/srba/forms.htm or from any IDWR office. Claimants can call IDWR, Western Region at (208) 334-2190 to make an appointment if they need assistance filling out a Notice of Claim form.

Sincerely,

David R. Tuthill, Jr., P.E.
Adjudication Bureau Chief
