

AMENDED PLAT
OF A PORTION OF
JOE LEWIS SUBDIVISION
A PORTION OF H.E.S. 173 SECTION 26 & 27, T.9 N., R.0 E., E.M.
BOISE COUNTY, IDAHO.

TOOTHMAN & ASSOCIATES, INC. CONSULTING ENGINEERS

This map was made from a plan of the subdivision, registered in the
State of Idaho in the office of the State Engineer, and the same is
correct, the City Engineer has examined the same and is satisfied
that it is correct, and that it is a true and correct copy of the original.

Scale: 2 inches equal 1 mile

BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

John Weitzel
(Applicant)

included for reference only

9. Irrigation uses: describe the lands irrigated by giving the acreages irrigated within each 40 acre subdivision:

T	R	SEC.	NE 1/4				NW 1/4				SW 1/4				SE 1/4				TOTAL
			NEW	NW 1/4	SW 1/4	SE 1/4	NEW	NW 1/4	SW 1/4	SE 1/4	NEW	NW 1/4	SW 1/4	SE 1/4	NEW	NW 1/4	SW 1/4	SE 1/4	

Total number of acres irrigated:

10. Remarks: RIGHT IS TO BE USED IN LOTS 9, 10, 11, 12 - BLK 1
JOE LEWIS SUBD. SOURCE OF WATER IS UNNAMED STREAM FED
BY FENCE CREEK, THE STREAM A TRIBUTARY OF S. F. PAYETTE
RIVER

The above information is a true statement of the extent to which the above numbered permit has been developed.

Re: Fence Creek Water Rights

Dear Water User:

The Idaho Department of Water Resources (IDWR) received a complaint on June 27, 2001 regarding the distribution of Fence Creek water in and near the Joe Lewis Subdivision east of Lowman. I visited the site and investigated the situation on July 11, 2001. This letter summarizes the results of the investigation and the related water rights in addition to suggesting some alternatives to help resolve the problem.

The complaint alleged that insufficient water is available for some of the subdivision property owners due to excessive water use in part of the subdivision. The enclosed diagram depicts the situation I encountered during the field visit. Two Fence Creek diversions were observed in my visit. Note that all of the water rights serving property within the subdivision plus one water right serving an adjacent cabin are diverted from Fence Creek via a common pipeline system. The other Fence Creek diversion involves a pipeline for the Fence Creek Water Users Association. The association system serves four cabins immediately east of the subdivision. The Snake River Basin Adjudication Court recently decreed the Fence Creek water rights. The enclosed table defines these rights.

Flooding destroyed some or all of the Fence Creek diversions (more than two diversions before the flood?) some years ago. Additional information obtained after the field visit suggests the rebuilt subdivision pipeline has adequately served the water users for many years. Recent modification of the subdivision pipeline system might be the source of water distribution problems within the subdivision. Inadequate maintenance at the point of diversion could compound the problem.

Issues related to design, maintenance or ownership of a shared water system generally are not within IDWR jurisdiction. Assuming proper design and maintenance of a diversion system, disputes about distribution of water from a common system might involve water right issues within IDWR jurisdiction. What alternatives exist if legitimate water right disputes occur? Possible solutions to water right disputes are discussed below.

ALTERNATIVES

Real scenarios often do not readily fit solutions suggested by Idaho law when it comes to water distribution problems. Idaho statutes suggest three alternatives for Fence Creek water rights. None may appeal to you. Of course the best solution comes from a consensus of the water users solving the problem short of a formal regulatory scheme.

Fence Creek Water Rights

August 14, 2001

Page 2

One alternative involves the Payette River Watermaster. Fence Creek is tributary to the South Fork Payette River and remains subject to Watermaster regulation based on the availability of water to satisfy water rights according to the priority (seniority) system. The Watermaster can regulate diversions at the water source. The Fence Creek situation is not one of competing calls for water at the two points of diversion on the creek. Instead the problem involves distribution of water beyond the point of diversion in a common delivery system.

Watermaster control is neither suitable nor required for this situation. Even if Watermaster control were suitable, the likely result would be to shut off *all* diversions of water from the creek to satisfy senior downstream water rights in this difficult drought year.

The second alternative is the "lateral ditch association." Sections 42-1301 through 42-1309, *Idaho Code*, define a regulatory scheme for three or more water users sharing the same distribution system. The users elect a "ditch manager" to regulate the distribution of water from the common conveyance system. The association can implement controls necessary to properly distribute water rights through the shared system. The lateral association normally involves a ditch system. Perhaps this alternative can be applied to a pipeline system.

An option in the lateral ditch association alternative occurs under Section 42-1308, *Idaho Code*. This statute allows a water user to petition the IDWR Director to appoint a ditch manager if the water users have not activated an association through their own efforts and elected a manager. The Director can grant or deny the petition based on his findings. A manager appointed by the Director can only serve for the remainder of the year in which the appointment occurs. The water users would be expected to hold annual meetings after that to continue the regulatory system.

Due process requires considerable time to activate a lateral ditch association in either option of the second alternative. Based on the timing factors, it is probably not practical to use the lateral association alternative for a timely solution before the end of this irrigation season (October 15).

The third alternative considers regulation of water right no. 65-7781. This right allows .10 cubic feet per second (cfs) or about 45 gpm from an unnamed stream for fire protection at the Frisbie property in the subdivision. The unnamed stream receives water from the subdivision pipeline and delivers water to a small pond on Frisbie's land. Water right 65-7781 is the most junior right in this picture and should not be used if senior Fence Creek rights remain unfilled under this alternative.

Natural flow was not found in the unnamed stream during my visit nor is it likely most of the year. About .10 cfs was delivered from Fence Creek to Frisbie's pond on July 11. It appeared Frisbie could also receive water from the buried distribution network for the subdivision (valve for above ground sprinklers at east end of the Frisbie lots).

Frisbie is entitled to a prorated share of the senior irrigation right serving the subdivision (65-2431X). It could be argued that water from the pipeline to the unnamed stream and then to Frisbie's land is part of 65-2431X. Frisbie would remain within proper water right limits provided the prorated share of the senior irrigation right was honored, regardless of how Fence Creek water was delivered to the site. Water right 65-7781 would not be in use under those circumstances.

Fence Creek Water Rights
August 14, 2001
Page 3

Boise County Assessor records show the Frisbie land as 2.06 acres (Lots 9-12, Block 1). Frisbie's share of 65-2431X is about .04 cfs (18 gpm). Use in excess of this amount would fall under junior right 65-7781 but should only occur under the assumptions of the third alternative if remaining Fence Creek water rights delivered through the subdivision pipeline were fully satisfied.

The third alternative to resolving the distribution problem in the subdivision would be to regulate the use of water right 65-7781 to provide available water to senior water rights using the same pipeline system. The authority for such a step is based on Section 42-351, *Idaho Code*, which discusses use of water not in conformance with a valid water right. IDWR does not have sufficient information to invoke this step at this time. Questions of design, maintenance and ownership of the subdivision pipeline might mitigate against the third alternative.

SUMMARY

Water distribution problems at the Joe Lewis Subdivision might or might not reflect legitimate water right issues. If legitimate water right issues are involved, none of the above alternatives can quickly solve the water distribution problems. IDWR involvement in any solution most likely cannot resolve design, maintenance or ownership problems regarding the shared conveyance system. The best and quickest solution is one mutually agreed upon by the water users without including IDWR oversight or regulation.

Perhaps a more informal arrangement would be better than the alternatives presented here. I will be glad to discuss this by meeting with the property owners upon a request by three or more property owners. A request should include a suggested time and place to meet and information to verify that all the owners identified in the attached distribution list have been contacted about a meeting and are available to attend if interested. The IDWR office is available if you want to meet in Boise. Meeting in the Lowman area is acceptable if you prefer. I prefer normal business hours but could meet on a weekday evening if necessary.

Please contact me at 208-334-2190 if you need more information.

Sincerely,

Steve Lester
Water Rights Supervisor

Enclosures

CC: Mark Limbaugh, Payette River Watermaster

***FENCE CREEK WATER RIGHTS -- Recently decreed by the
Snake River Basin Adjudication Court***

NUMBER	NAME	PRIORITY	CFS	COMMENTS
65-2431A	Conway	1939	0.04	Irrigate 2 acres, Lot 18-19 Bl. 1
65-2431X	Balance of J. Lewis Subdivision	1939	0.51	Irrigate 23 acres & minor domestic use in balance of subdivision
65-6625	Arkoosh, Bieker & Brown	1945	0.04	Domestic 1 cabin next to subdivision
65-10477	Fence Creek Water Users Assn.	1950	0.16	Domestic 4 cabins next to subdivision. <i>Separate pipeline</i> from all others.
65-10559	Conway	1962	0.06	Irrigate 1 acre & domestic 1 cabin next to subdivision
65-7781	Frisbie	1976	0.10	Fire protection, Lots 9-12 Bl. 1. Source is <i>unnamed stream fed by Fence Creek.</i>

Notes:

All rights are diverted or delivered through the subdivision pipeline except 65-10477 for the association's separate pipeline. Association cabins include Carey (2 cabins), Hawkins and Arkoosh et al. The latter is same cabin also served by 65-6625 from subdivision pipeline.

One cfs equals about 450 gpm or 50 miner's inches.

0.02 cfs equals about 9 gpm or 1 miner's inch.

WATER RIGHT LICENSE

License of Water Right No. 65-7781 Priority December 7, 1976 Amount 0.10 cfs

THIS IS TO CERTIFY, that LOREN &/or SYLVIA WEYZEL

of Boise, Idaho, has complied with the terms and conditions of Permit No. 65-7781 issued pursuant to Application for Permit dated December 7, 1976, and has submitted proof to the Department of Water Resources on February 23, 1977, that he has applied water to a beneficial use, an examination by the Department indicates that the works have a capacity for the diversion of 0.10 cfs of water from unnamed stream, tributary to South Fork Payette River, and that the permit holder has applied to a beneficial use and established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
Fire Protection	from <u>January 1</u> to <u>December 31</u>	at <u>0.10</u> cfs and <u>N/A</u>	
	from _____ to _____	at _____ cfs and _____	
	from _____ to _____	at _____ cfs and _____	

(both dates inclusive)

Subject, however, to the condition that no more than 0.10 cfs of water be diverted at any one time, and that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed N/A acre feet per year, said waters to be diverted within the NW 1/4, Sec. 26, Twp. 9N, Rge. 8E, B.M. in the County of Boise

Description and location of place of use:

Twp.	Range	Sec.	NE 1/4				NW 1/4				SW 1/4				SE 1/4				Totals

MEMORANDUM

RE: Joe Lewis Subdivision and associated rights from Fence Creek (or unnamed stream trib. to Payette River, S.F.)

DATE: August 27, 1998

FROM: Maria Minicuci, Sr. Water Agent ⁷⁷

Joe Lewis Subdivision has one water delivery system. The system consists of a headgate on Fence Creek to a buried pipeline which is stubbed to all lots. Use is external only (irrigation).

There is a second diversion from Fence Creek for 65-10477, for lots not included within Joe Lewis.

License 65-02431 covers the land of the subdivision plus adjoining lots between Highway 21 on the north, Fence Creek on the East, and the Payette River on the south. See b/u field exam for exact boundaries.

65-02431 was licensed for 25 total acres: S26 SWNW 8 NWSW 8
S27 NESE 9

For some reason the acres were "amended" in the Payette Adjudication to:

S26 SWNW 16
S27 NESE 9

This action eliminated the southeast portion of the current subdivision from the water right. This may have been done because the original (date unknown) subdivision plat included lots only in S26 SWNW and S27 NESE. The subdivision now covers PA amended QQs plus S26 NESE.

OVERLAPPING RIGHTS

65-02431A + 65-02431X

These rights should be recombined in the SRBA, since the transfer was never completed (add'l POD). The right could be recommended on the originally licensed acres, since the original license accurately reflects the current reality (resumption of use in SRBA). The SRBA could split the license based on claims/other decreed rights owned by various property owners (see below).

These rights appear to cover all of the irrigation currently occurring at both Joe Lewis Subdivision and adjacent lots. Not all lots are irrigated, although they are all stubbed into the main system. All lots represented in 65-10477 (see below) are irrigated).

65-10477

This right is for four cabins not in Joe Lewis Subd., and served by a separate diversion from Fence Creek. The upper Coughlin (now Conway, previously Spencer/Hawkins/Jenkins, located north of lot 19 block 1) does not appear to be included in this decreed right. Stan Erskine, current occupant of Conway property, indicated that his information was that the upper Coughlin lot had always been supplied by 65-10477. This information has not been verified and is contradictory to IDWR records. Contact person is Dan Hawkins 345-7872.

This right may more properly be described as a split of 65-02431, with add'l POD previous to commencement of SRBA.

65-06625

Filed in the Payette Adjudication for a cabin not included in Joe Lewis, but served by the Joe Lewis system (65-02431). If 65-02431 is split up among the current owners of licensed acres (including subd.), 65-06625 is unnecessary and can be recommended as a portion of 65-02431.

65-10559

Filed in the Payette Adjudication for a cabin not included in Joe Lewis, but served by the Joe Lewis system (65-02431). Cabin is located on lot north of lot 19 block 1. If 65-02431 is split up among the current owners of licensed acres (including subd.), then 65-10559 is unnecessary and can be recommended as a portion of 65-02431.

A note to the PA file indicates that this lot was originally served by a separate system, but that system destroyed when Joe Lewis Sub. put in its system. This may have been the same time the system changed from the original ditch system to buried pipe. The change occurred some time before June 17, 1977, the date the PA claim was filed.

PA owners listed as Jenkins/Spencer. During field exam 06/12/1998, S. Erskine indicated the owners previous to Coughlin (as noted on older plats) were Jenkins/Hawkins. Lot is now owned by Conway (bought from Coughlin). Mr. Erskine lives on the Conway property year-round but does not live in the Spencer/Hawkins/Jenkins cabin.

This lot is not included in PA decreed right 65-10477. Duplicate delivery systems to this lot could be solved by recommending all irrigation under 65-02431, with accomplished transfer which added POD.

65-07781

This right is for a small pond located on lot 10, block 1, property now owned by Frisbie. The source appears to be Fence Creek, which is piped via the Joe Lewis system to lot 19, block 2, where an overflow valve releases water to a natural drainage which runs through the middle of the subdivision. This natural drainage is the source of the Frisbie pond. It is unknown if there is water in the drainage without the contribution from Fence Creek.

Field notes

65-10373

Irrigation from same unnamed stream via Joe Lewis as described in 65-07781. This right lists Fence Creek as the source and may more properly be described as a split of 65-02431.

It may be in the best interest of accurate and clear record keeping to hold off licensing of 65-07504 until the SRBA has determined the recommendations for the Court for the SRBA claims on the above rights. It appears that all irrigation is covered by license 65-02431 and no additional capacity was developed under 65-07504.

I could have misinterpreted intention along
the way, but for the reviewer's sake, I
hope not.

7777

MEMO

RE: JOE LEWIS SUBDIVISION AND ASSOCIATED RIGHTS RELATING TO FENCE CREEK

This memo is the preliminary findings determined during a related field examination conducted on 08-20-1990 by Kelly K. Christensen. Not all diversions or rights were examined. The information is to be considered preliminary and further verification should be done prior to any final reports.

WATER RIGHTS WITH FENCE CREEK AS A SOURCE

65-02431A	see analysis, should be recombined with part X
65-02431X	(system includes 2431A, 7504, and possibly 7781.
65-07504	see analysis, lapse permit recommendation probable
65-06625	system not analyzed at this time
65-10373	system not analyzed at this time
65-10477	different system than 65-2431 and 7504
65-10559	system not analyzed at this time
65-07781	system not analyzed at this time, adjudication claim notes discussed

65-02431A & X and 65-07504

The original right from Fence Creek is 65-02431. This right was apparently split into 65-02431A and 65-02431X during the first Payette Decree.

I believe that this split was done prematurely. Part A refers to Lots 18 and 19 of Block 1 which was and is currently owned by Dr. Coughlin. Dr. Coughlin had intended to establish a new P/D from Fence Creek and supply his lots from that P/D. Dr. Coughlin related to me that all the alternatives he investigated would have been too expensive, therefore he never established the new P/D relating to Part A.

A note found in File 65-07504 (on a yellow sheet) references the facts relating to the split and the new P/D. Also this memo refers to the domestic portion of the right as coming from the spring source rather than from Fence Creek.

This note also mentions permit 65-07504. The note states that this system will have to be verified in the spring of 1982.

The author of this note is not recorded but I believe it to be John Noyes.

I found diversion works on Fence Creek and a buried line running to lot 1 Block 3. The line that surfaces there is an eight inch steel line. There are two mainlines leaving this line one running southwest serving Lots within Block 2 (the extent of this line was not verified), and the other line initially runs southeast along the eastern boarder of Lots 1, 2, and 3 of Block 3. From Lot 3 it runs to Lot 19 Block 1 and then runs southeast following the road known as Lewis Drive. The property north of lot 19 is owned by Dr. Coughlin and receives water from this system. The other two lots owned by Dr. Coughlin are lots 18 and 19. They were receiving water from this system.

MICROFILMED

SEP 23 1992

Mr. Carr accompanied me for a portion of the field exam. At the mainline split he indicated that the eight inch line had to be left partly open to allow sand to be discharged from the system. If this water was not "wasted" sand would plug the line and render the system inoperable. I did not measure the discharge from the end of the line but there was a substantial flow leaving the line. Mr. Carr had 31 sprinklers operating on Lot 3 Block 1. I measured the pressure with a pressure gauge and pitot tube and found it to be 4 psi. I did not determine the gpm at that time. Mr. Carr indicated that the system performs poorly and that not everyone uses the system. He felt that no one used the water inhouse but he was not positive. Permit 65-07504 was to increase the flow rate from this same source using the same diversion works. The intent was to increase the irrigation portion of the right to 1.5 inches per acre. This permit also included domestic use. The Proof of Beneficial Use indicated 8 homes served and 4 acres irrigated. Preliminary indications are that the system was not upgraded and that permit 65-07504 should be lapsed. Further field work is required to verify the actual capacity of the system.

65-10477, A Second P/D from Fence Creek

65-10477 supplies water to four homes bordering the northeast side of the Joe Lewis subdivision. These homes are south of the highway and west of Fence Creek. The P/D for these homes is said to be upstream from the P/D for 65-02431A-X. A separate pipeline supplies these homes. I did not verify the system, but the system description on the adjudication claim agrees with the information supplied by Myrtle Carey. A field exam should verify the claim.

65-07781

This right was briefly discussed with Mr. Carr during the field exam and indications are that the license does not represent the actual system.

I have not verified the system with Scott Frisbie (current owner per adjudication claim), but I believe that the actual source is Fence Creek and the use is aesthetic. Mr. Carr said that he thought that the water comes from Fence Creek and that they continuously run water down the ditch or drainage. The pump mentioned in the original field report probably was available to pump water in case of fire. In the remarks on the original permit the source is identified as "unnamed stream fed by Fence Creek, the stream a tributary of So. Frk Payette River." This also indicates that the actual source is Fence Creek. The method of conveyance from Fence Creek to the unnamed stream was not determined.

MICROFILMED

SEP 23 1992

On this 19th day of February, 1977, personally appeared before me the signers of the above instrument who duly acknowledged to me that he (she) (they) executed the same.

County of Alameda

FIELD
EXAMINER
Y() N()

CLAIM REMARKS: GEN LOTS 9, 10, 11 & 12, BLOCK 4, JOE LEWIS SUBDIVISION.
ADDRESS CHANGED PER CLAIMANT REQUEST. 6/24/97 LH

CONTACT PERSON: _____

PHONE NUMBER: (____) ____-____

DATE OF FIELD EXAM: __/__/__

APPOINTMENT MADE: Y(____) N(____)

TIME: ____:____ A(____) P(____)

ACCOMPANIED BY: _____

PHONE NUMBER: (____) ____-____

RELATIONSHIP TO CLAIMANT: _____

DIRECTIONS TO PROPERTY / NOTES:

A. AJ CLAIM: # A65-07781 PRIORITY DATE: 12-07-1976 STAGE: D

B. WR RECORD: # 65-07781 PRIORITY DATE: 12-07-1976 STAGE: D

C. CAN THE PRIORITY DATE CLAIMED BE CONFIRMED BY A DECREE OR LICENSE? Y(☒) N(☐)

D. HAS THERE BEEN A LATER COURT DECREE OF THE WATER RIGHT(S) FROM THIS WATER SOURCE? Y(☐) N(☒)

E. IS THERE ANY INDICATION THAT THERE HAS BEEN A FIVE YEAR PERIOD OF CONTINUOUS NONUSE?
(IF YES, DESCRIBE BELOW) Y(☐) N(☒)

F. IF THIS CLAIM IS BASED ON A PERMIT, WHERE IS THE PERMIT IN THE LICENSING PROCESS?

PROOF OF BENEFICIAL USE SUBMITTED N/A(☒) Y(☐) N(☐)

FIELD EXAM COMPLETED N/A(☐) Y(☐) N(☐)

FIELD EXAM SENT TO STATE OFFICE N/A(☐) Y(☐) N(☐)

LICENSE ISSUED N/A(☐) Y(☐) N(☐)

* IF THE PERMIT WILL NOT BE LICENSED PRIOR TO THE DIRECTOR'S REPORT,
USE CONDITION CODE A01 AND RECOMMEND AS PERMITTED.

G. IF THIS CLAIM IS BASED ON BENEFICIAL USE, IS ADDITIONAL EVIDENCE
OF THE PRIORITY DATE REQUIRED? N/A(☒) Y(☐) N(☐)

* FOR CLAIMS BASED ON BENEFICIAL USE, DESCRIBE THE EVIDENCE OF PRIORITY SUBMITTED,
INCLUDING THE ANALYSIS OF THE EVIDENCE.

H. IS THE STAGE OF THE CLAIM CODED CORRECTLY? Y(☒) N(☐)

NOTES: _____
