DIRK KEMPTHORNE
GOVERNOR

KARL J. DREHER
DIRECTOR

September 29, 1999

Dear Water Right Claimant(s):

The Idaho Department of Water Resources (IDWR) has completed its initial investigation of your water right claim(s) in the Snake River Basin Adjudication (SRBA). We have enclosed a print-out showing our preliminary recommendation regarding how your water right should be reported to the SRBA District Court.

Please review the preliminary recommendation carefully. If there is any information on the print-out you believe is inaccurate, please fill out the enclosed reply indicating what changes you believe should be made. Further instructions to assist you with the review are enclosed. For water rights with an irrigation water use, a Geographic Information System (GIS) computerized image of the place of use for your water right is also enclosed.

You may return this reply in person to us at a public meeting IDWR will be conducting in your area. **The meeting will be held on Wednesday, October 13, 1999, at 7:00 p.m. in the Senior Citizen Center, 409 School Road, Cascade.** Please come to the public meeting, where you will have an opportunity to find out more about the SRBA process and speak with a department staff member should you have questions regarding your water right. Please bring any and all information you have which will help the Department understand your water rights and describe them accurately.

This process is intended to ensure IDWR recommends your water right accurately to the SRBA District Court. This is the easiest and least costly means for you to identify corrections you believe should be made to our recommendation. Completion of this process is an important step toward the overall success of the adjudication in Idaho. Your participation is necessary so that accurate information is provided to the SRBA District Court.

We look forward to hearing from you.

Sincerely,

Karl J. Dreher
Director

Dear Water Right Claimant:

To help you with your water right claim(s) in the Snake River Basin Adjudication, this letter of explanation is being sent to you along with information sent by the Idaho Department of Water Resources (IDWR). Included are the following important documents which I ask you to please read carefully because they give you the opportunity to save a great deal of time and money:

1. **Preliminary Recommendation.** This is IDWR's *initial* finding and conclusion about your water right and how it should be reported to the SRBA Court. This preliminary recommendation is not filed with the court, but is provided to you to help correct errors or resolve any disagreement you may have over its content. This document has been prepared following IDWR's investigation and may be different than the claim(s) you actually filed.

Therefore, please review this preliminary recommendation carefully to find any errors or disagreements you have with IDWR's findings.

2. **Error Correction/Settlement Process.** This preliminary recommendation is a special service provided to you by IDWR to help you correct errors and resolve any other disagreement you have before the actual recommendations are ultimately filed with the court.

A description of how to work with IDWR is included. Our experience in the SRBA shows that by working in cooperation with IDWR most errors and differences can be addressed before coming into court. It's well worth your time to take full advantage of IDWR's helpful service. If your disagreement cannot be resolved, you will be able to file an objection to IDWR's actual recommendation when it is filed in court and have the final decision made by the Presiding Judge.

This error correction service is an important opportunity for you to work together with IDWR to make sure your water right claim(s) are decreed accurately. There is no cost to you other than your time reviewing the preliminary recommendation and talking to IDWR about any problem you see. Of course, you may always employ the services of an attorney if you wish.

The goal of the SRBA is to see that your water right(s) are decreed by the court as accurately and fairly as possible. It is important to me that this is done efficiently in order to reduce your costs and present you with your decree.

I strongly encourage you to take full advantage of this opportunity to use the fine and courteous service provided by IDWR.

Sincerely yours,

Barry Wood

Presiding Judge of the

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 3.0 afa per acre for the lands above.

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 5 \times 3 \text{ AF/Acre/Season} = 15 \text{ AF}$
 $V_{DR} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = \frac{.04 \times 183 \text{ day} \times 1.9835}{.04} = 362 \text{ AF}$
 $V = \text{Smaller of } V_{IR} \text{ and } V_{DR} = 15 \text{ AF}$

2. Volume Calculations for Other Uses:

* SL 1/18/90:
 no well log found for this well but found:

YEAR	1981	'85	'79	'71	AVERAGE
DEPTH	145'	210'	115'	220'	≈ 173'
STATIC H ₂ O LEVEL	113'	140'	50'	95'	≈ 100'

Reasonable to assume $z \geq 100'$ in hp. equation.

If $h_p = 4.5$, eff. = .8, psi = 60 (typical irrigation), $z = 100 \rightarrow Q = .04 \text{ cfs}$

If " " " 45 (minimum, psi at sprinklers was 45) $\rightarrow Q = .05 \text{ cfs}$

without additional info, could not recommend more than .05 cfs; .04 cfs is better estimate based on pressure at wellhead

H. REMARKS AND OVERLAP REVIEW ANALYSIS

~~No Overlap~~ See pg 1, item B. - *92*

* NOTE - Examiner commented in D2 that "system is not at capacity".
If owner objected to flow rate .04 cfs, owner could
pay a second exam fee & request reexamination to
obtain a measurement of system's normal operation (unless 2
heads represent normal use!)

This is a detailed topographic map of the Lake Fork area in Nevada. The map features a grid system with coordinates ranging from 127° 30' W to 127° 00' W and 39° 30' N to 39° 00' N. Key geographical features include Lake Fork, Lake, and various creeks such as Cold Creek, Wilhelm Creek, and Barker Creek. The map also shows several ditches, roads, and farms. Notable locations include Lake Fork, Lake, and various creeks. The map includes a scale bar indicating distances in miles and feet. The map is labeled with various geographical features and coordinates.
