STATE OF IDAHO

Decree Plaintiff

A & C CORP., ET AL.

vs Decree Defendant

This claim was apparently filed
in response to the development
of Ice Lewis subdivision. The
subdivision does not include this
property and PR claimant
wanted to file his own claim.

Delivery is via 65-02431A
system - this claim might
be more properly recommended
as a split of that license.
Split 65-02431X was never
completed - new PCO was never
INSTALLED.

See file 65-02504 for pictures
+ maps.

Good luck.

TN

08/26/1998

Stan Estline, representative of
Conway, stated during field
exam 08/12/1998 that this log
can also be investigated via
65-10477. This does not appear
to be a valid use of that log.
However, 65-02431 covers
entire pos - both suba + other
logs. Conway could file an
Appl. for transfer to add
discussion for 65-10477 to
65-02431 (new split into A & X),

OR I suppose they could stick
with the jr priority of 65-10559
if they prefer.

NOTICE OF CHANGE OF WATER RIGHT OWNERSHIP

Please print or type. Attach pages with additional information. Instructions are on the back of this page.
Incomplete forms will be returned.

1. Water Right No(s): 65-02431
 Adjudication Claim No(s): A65-02431A, 65-17807, 65-07533
A65-10559
2. The following REQUIRED information must be submitted with this form:
 - A. A copy of the most recent DEED, TITLE POLICY, CONTRACT OF SALE or other legal document indicating your ownership of the property and water rights or claims in question, WITH ATTACHED LEGAL DESCRIPTION.
AND
 - B. PLAT OF PROPERTY or SURVEY MAP for parcel of ten acres or less. (These are usually attached to your deed or on file with the county.)
 - OR
 - C. For water rights or adjudication claims involving ten or more irrigated acres, a USDA Farm Service Agency AERIAL PHOTO with irrigated acres outlined and point(s) of diversion clearly marked.
3. Name and Address of Former Owner/Claimant MARTHA + JAMES COUGHLIN
3120 CRESCENT RIM DR NO 301
4. New Owner/Claimant(s) BOISE ID 83706
 Name Connector (Check one): ☐ and, ☐ or, ☐ and/or
 New Mailing Address Geraldine CONWAY
 City, State and ZIP Code 2021 Blaine Way BOI, ID - 83702
 New Telephone Number (208) 336-4278
5. Date you acquired the property 1994
6. If you have acquired only a portion of the former owner's property, IDWR may need to split the water right(s) or adjudication claim(s). If this applies, describe in detail your portion of each water right or adjudication claim in the spaces below. If necessary, attach additional pages.
 Number of acres you irrigate 2.3 Number and type of stock _____
 Diversion rate in CFS _____ Number of homes _____ Other uses _____

If a water right or adjudication claim is being split and you are not sure how to identify your portion of the original right or claim, please contact the nearest IDWR office for assistance.
7. Signature of New Owner or Claimant(s) Geraldine Conway
 (Corporations or other organizations must submit a list of directors and/or officers demonstrating authority to sign form.)
8. For Snake River Basin Adjudication Claims: Please attach a Notice of Appearance completed by your attorney, if you wish IDWR to correspond with him or her for all matters related to your claims..

Re: Fence Creek Water Rights

Dear Water User:

The Idaho Department of Water Resources (IDWR) received a complaint on June 27, 2001 regarding the distribution of Fence Creek water in and near the Joe Lewis Subdivision east of Lowman. I visited the site and investigated the situation on July 11, 2001. This letter summarizes the results of the investigation and the related water rights in addition to suggesting some alternatives to help resolve the problem.

The complaint alleged that insufficient water is available for some of the subdivision property owners due to excessive water use in part of the subdivision. The enclosed diagram depicts the situation I encountered during the field visit. Two Fence Creek diversions were observed in my visit. Note that all of the water rights serving property within the subdivision plus one water right serving an adjacent cabin are diverted from Fence Creek via a common pipeline system. The other Fence Creek diversion involves a pipeline for the Fence Creek Water Users Association. The association system serves four cabins immediately east of the subdivision. The Snake River Basin Adjudication Court recently decreed the Fence Creek water rights. The enclosed table defines these rights.

Flooding destroyed some or all of the Fence Creek diversions (more than two diversions before the flood?) some years ago. Additional information obtained after the field visit suggests the rebuilt subdivision pipeline has adequately served the water users for many years. Recent modification of the subdivision pipeline system might be the source of water distribution problems within the subdivision. Inadequate maintenance at the point of diversion could compound the problem.

Issues related to design, maintenance or ownership of a shared water system generally are not within IDWR jurisdiction. Assuming proper design and maintenance of a diversion system, disputes about distribution of water from a common system might involve water right issues within IDWR jurisdiction. What alternatives exist if legitimate water right disputes occur? Possible solutions to water right disputes are discussed below.

ALTERNATIVES

Real scenarios often do not readily fit solutions suggested by Idaho law when it comes to water distribution problems. Idaho statutes suggest three alternatives for Fence Creek water rights. None may appeal to you. Of course the best solution comes from a consensus of the water users solving the problem short of a formal regulatory scheme.

One alternative involves the Payette River Watermaster. Fence Creek is tributary to the South Fork Payette River and remains subject to Watermaster regulation based on the availability of water to satisfy water rights according to the priority (seniority) system. The Watermaster can regulate diversions at the water source. The Fence Creek situation is not one of competing calls for water at the two points of diversion on the creek. Instead the problem involves distribution of water beyond the point of diversion in a common delivery system.

Watermaster control is neither suitable nor required for this situation. Even if Watermaster control were suitable, the likely result would be to shut off *all* diversions of water from the creek to satisfy senior downstream water rights in this difficult drought year.

The second alternative is the "lateral ditch association." Sections 42-1301 through 42-1309, *Idaho Code*, define a regulatory scheme for three or more water users sharing the same distribution system. The users elect a "ditch manager" to regulate the distribution of water from the common conveyance system. The association can implement controls necessary to properly distribute water rights through the shared system. The lateral association normally involves a ditch system. Perhaps this alternative can be applied to a pipeline system.

An option in the lateral ditch association alternative occurs under Section 42-1308, *Idaho Code*. This statute allows a water user to petition the IDWR Director to appoint a ditch manager if the water users have not activated an association through their own efforts and elected a manager. The Director can grant or deny the petition based on his findings. A manager appointed by the Director can only serve for the remainder of the year in which the appointment occurs. The water users would be expected to hold annual meetings after that to continue the regulatory system.

Due process requires considerable time to activate a lateral ditch association in either option of the second alternative. Based on the timing factors, it is probably not practical to use the lateral association alternative for a timely solution before the end of this irrigation season (October 15).

The third alternative considers regulation of water right no. 65-7781. This right allows .10 cubic feet per second (cfs) or about 45 gpm from an unnamed stream for fire protection at the Frisbie property in the subdivision. The unnamed stream receives water from the subdivision pipeline and delivers water to a small pond on Frisbie's land. Water right 65-7781 is the most junior right in this picture and should not be used if senior Fence Creek rights remain unfilled under this alternative.

Natural flow was not found in the unnamed stream during my visit nor is it likely most of the year. About .10 cfs was delivered from Fence Creek to Frisbie's pond on July 11. It appeared Frisbie could also receive water from the buried distribution network for the subdivision (valve for above ground sprinklers at east end of the Frisbie lots).

Frisbie is entitled to a prorated share of the senior irrigation right serving the subdivision (65-2431X). It could be argued that water from the pipeline to the unnamed stream and then to Frisbie's land is part of 65-2431X. Frisbie would remain within proper water right limits provided the prorated share of the senior irrigation right was honored, regardless of how Fence Creek water was delivered to the site. Water right 65-7781 would not be in use under those circumstances.

Fence Creek Water Rights
August 14, 2001
Page 3

Boise County Assessor records show the Frisbie land as 2.06 acres (Lots 9-12, Block 1). Frisbie's share of 65-2431X is about .04 cfs (18 gpm). Use in excess of this amount would fall under junior right 65-7781 but should only occur under the assumptions of the third alternative if remaining Fence Creek water rights delivered through the subdivision pipeline were fully satisfied.

The third alternative to resolving the distribution problem in the subdivision would be to regulate the use of water right 65-7781 to provide available water to senior water rights using the same pipeline system. The authority for such a step is based on Section 42-351, *Idaho Code*, which discusses use of water not in conformance with a valid water right. IDWR does not have sufficient information to invoke this step at this time. Questions of design, maintenance and ownership of the subdivision pipeline might mitigate against the third alternative.

SUMMARY

Water distribution problems at the Joe Lewis Subdivision might or might not reflect legitimate water right issues. If legitimate water right issues are involved, none of the above alternatives can quickly solve the water distribution problems. IDWR involvement in any solution most likely cannot resolve design, maintenance or ownership problems regarding the shared conveyance system. The best and quickest solution is one mutually agreed upon by the water users without including IDWR oversight or regulation.

Perhaps a more informal arrangement would be better than the alternatives presented here. I will be glad to discuss this by meeting with the property owners upon a request by three or more property owners. A request should include a suggested time and place to meet and information to verify that all the owners identified in the attached distribution list have been contacted about a meeting and are available to attend if interested. The IDWR office is available if you want to meet in Boise. Meeting in the Lowman area is acceptable if you prefer. I prefer normal business hours but could meet on a weekday evening if necessary.

Please contact me at 208-334-2190 if you need more information.

Sincerely,

Steve Lester
Water Rights Supervisor

***FENCE CREEK WATER RIGHTS -- Recently decreed by the
Snake River Basin Adjudication Court***

NUMBER	NAME	PRIORITY	CFS	COMMENTS
65-2431A	Conway	1939	0.04	Irrigate 2 acres, Lot 18-19 Bl. 1
65-2431X	Balance of J. Lewis Subdivision	1939	0.51	Irrigate 23 acres & minor domestic use in balance of subdivision
65-6625	Arkoosh, Bieker & Brown	1945	0.04	Domestic 1 cabin next to subdivision
65-10477	Fence Creek Water Users Assn.	1950	0.16	Domestic 4 cabins next to subdivision. <i>Separate pipeline</i> from all others.
65-10559	Conway	1962	0.06	Irrigate 1 acre & domestic 1 cabin next to subdivision
65-7781	Frisbie	1976	0.10	Fire protection, Lots 9-12 Bl. 1. Source is <i>unnamed stream fed by Fence Creek.</i>

Notes:

All rights are diverted or delivered through the subdivision pipeline except 65-10477 for the association's separate pipeline. Association cabins include Carey (2 cabins), Hawkins and Arkoosh et al. The latter is same cabin also served by 65-6625 from subdivision pipeline.

One cfs equals about 450 gpm or 50 miner's inches.

0.02 cfs equals about 9 gpm or 1 miner's inch.

DIRK KEMPTHORNE
Governor

KARL J. DREHER
Director

Dear Basin 65 water user:

This letter is to inform you that you may be eligible to file a stockwater claim with the Idaho Department of Water Resources (IDWR) in connection with the Snake River Basin Adjudication (SRBA). IDWR is sending this letter to water users in Basin 65 who might have relied upon the non-irrigation season stockwater provision in the Payette Adjudication. This provision states:

"When stockwater is not a specifically mentioned use for a right that includes irrigation, a reasonable flow is implied and included for the watering of livestock during the non-irrigation season."

In another basin, the Idaho Supreme Court struck down general provisions that contained similar language. The non-irrigation season stockwater language quoted above was not included in the General Provisions for Basin 65 because of the Idaho Supreme Court's ruling.

IDWR recognizes that in reliance on the non-irrigation season stockwater language in the Payette Adjudication, water users might not have filed stockwater claims in the SRBA to cover the non-irrigation season period. Individuals who historically watered livestock during the non-irrigation season without a separate stockwater claim might desire to file a new stockwater claim with IDWR.

To be eligible for a new non-irrigation season stockwater claim:

1. You must have actually and historically watered livestock during the non-irrigation season without a separate stockwater right.
2. You must have filed a surface water irrigation claim in both the Payette Adjudication and the SRBA.
3. You must not have filed a stockwater claim with the surface water irrigation claim.

If you meet these three requirements, you may file a Notice of Claim form for stockwater with IDWR. **To have a timely filing you must file this claim with IDWR by May 25, 2001.** IDWR will waive filing fees for these stockwater claims if filed before this deadline. Failure to file your claim in a timely manner may prevent you from claiming it in the future. Notice of Claim forms are available on IDWR's website at www.idwr.state.id.us/info/water/srba/forms.htm or from any IDWR office. Claimants can call IDWR, Western Region at (208) 334-2190 to make an appointment if they need assistance filling out a Notice of Claim form.

Sincerely,

David R. Tuthill, Jr., P.E.
Adjudication Bureau Chief

POU COUNTY: BOISE

MEMORANDUM

RE: Joe Lewis Subdivision and associated rights from Fence Creek (or unnamed stream trib. to Payette River, S.F.)

DATE: August 27, 1998

FROM: Maria Minicuci, Sr. Water Agent 77

Joe Lewis Subdivision has one water delivery system. The system consists of a headgate on Fence Creek to a buried pipeline which is stubbed to all lots. Use is external only (irrigation).

There is a second diversion from Fence Creek for 65-10477, for lots not included within Joe Lewis.

License 65-02431 covers the land of the subdivision plus adjoining lots between Highway 21 on the north, Fence Creek on the East, and the Payette River on the south. See b/u field exam for exact boundaries.

65-02431 was licensed for 25 total acres: S26 SWNW 8 NWSW 8
S27 NESE 9

For some reason the acres were "amended" in the Payette Adjudication to:

S26 SWNW 16
S27 NESE 9

This action eliminated the southeast portion of the current subdivision from the water right. This may have been done because the original (date unknown) subdivision plat included lots only in S26 SWNW and S27 NESE. The subdivision now covers PA amended QQs plus S26 NESE.

OVERLAPPING RIGHTS

65-02431A + 65-02431X

These rights should be recombined in the SRBA, since the transfer was never completed (add'l POD). The right could be recommended on the originally licensed acres, since the original license accurately reflects the current reality (resumption of use in SRBA). The SRBA could split the license based on claims/other decreed rights owned by various property owners (see below).

These rights appear to cover all of the irrigation currently occurring at both Joe Lewis Subdivision and adjacent lots. Not all lots are irrigated, although they are all stubbed into the main system. All lots represented in 65-10477 (see below) are irrigated).

65-10477

This right is for four cabins not in Joe Lewis Subd., and served by a separate diversion from Fence Creek. The upper Coughlin (now Conway, previously Spencer/Hawkins/Jenkins, located north of lot 19 block 1) does not appear to be included in this decreed right. Stan Erskine, current occupant of Conway property, indicated that his information was that the upper Coughlin lot had always been supplied by 65-10477. This information has not been verified and is contradictory to IDWR records. Contact person is Dan Hawkins 345-7872.

This right may more properly be described as a split of 65-02431, with add'l POD previous to commencement of SRBA.

65-06625

Filed in the Payette Adjudication for a cabin not included in Joe Lewis, but served by the Joe Lewis system (65-02431). If 65-02431 is split up among the current owners of licensed acres (including subd.), 65-06625 is unnecessary and can be recommended as a portion of 65-02431.

65-10559

Filed in the Payette Adjudication for a cabin not included in Joe Lewis, but served by the Joe Lewis system (65-02431). Cabin is located on lot north of lot 19 block 1. If 65-02431 is split up among the current owners of licensed acres (including subd.), then 65-10559 is unnecessary and can be recommended as a portion of 65-02431.

A note to the PA file indicates that this lot was originally served by a separate system, but that system destroyed when Joe Lewis Sub. put in its system. This may have been the same time the system changed from the original ditch system to buried pipe. The change occurred some time before June 17, 1977, the date the PA claim was filed.

PA owners listed as Jenkins/Spencer. During field exam 06/12/1998, S. Erskine indicated the owners previous to Coughlin (as noted on older plats) were Jenkins/Hawkins. Lot is now owned by Conway (bought from Coughlin). Mr. Erskine lives on the Conway property year-round but does not live in the Spencer/Hawkins/Jenkins cabin.

This lot is not included in PA decreed right 65-10477. Duplicate delivery systems to this lot could be solved by recommending all irrigation under 65-02431, with accomplished transfer which added POD.

65-07781

This right is for a small pond located on lot 10, block 1, property now owned by Frisbie. The source appears to be Fence Creek, which is piped via the Joe Lewis system to lot 19, block 2, where an overflow valve releases water to a natural drainage which runs through the middle of the subdivision. This natural drainage is the source of the Frisbie pond. It is unknown if there is water in the drainage without the contribution from Fence Creek.

65-10373

Irrigation from same unnamed stream via Joe Lewis as described in 65-07781. This right lists Fence Creek as the source and may more properly be described as a split of 65-02431.

It may be in the best interest of accurate and clear record keeping to hold off licensing of 65-07504 until the SRBA has determined the recommendations for the Court for the SRBA claims on the above rights. It appears that all irrigation is covered by license 65-02431 and no additional capacity was developed under 65-07504.

I could have misinterpreted information along
the way, but for the reviewer's sake, I
hope not.

RE: Water Right No. 65-17807 & 65-07533

Geraldine Conway
2021 Blaine Way
Boise ID 83702

Dear Ms. Conway:

Enclosed is a copy of the above referenced water right which reflects the change in ownership of the land and appurtenant water rights covered under the original filing. Also enclosed is a copy of the Notice of Completed Administrative Proceedings which has been sent to the Snake River Basin Court as notification of the change.

The ownership has also been changed on claim numbers A65-10559 and A65-02431A, and copies are enclosed.

If you have any questions concerning the enclosed water right, please feel free to contact this office.

Sincerely,

Denise Buffington
Records Clerk
