REMARKS AND OVERLAP REVIEW ANALYSIS

Reid amendment to include div. to storage & recreation storage for the
 11 ponds. The creek's limited season of available water calls for
 thorough and accurate description of all water used (initially, this will
 avoid future problems if disputes arise). Storage use is nonconsumptive and
 duration is limited as creek flow recedes. A minimal diversion rate will be effective.

Overlap:

Except for 65-12276, all others use other divisions (uses on 1st and
 property. 65-12276 describes a ~~well~~ well on Morgan's property that is used
 for domestic water and irrigation and for recreation. Generally, the well
 is used for nonconsumptive use when the surface water is low or unavailable.
 Lic condition: R29 except use .03 cfs/sec. instead of .02.

is an amendment to include div. to storage & power for the
 Sr. II. The creek's limited amount of available water calls for
 the storage and accurate description of all water used, not only for
 present future use but also for the future. Storage use is non-consumptive and
 duration is limited as creek flow recedes. A minimal flow rate will be effective
 during the winter.

Except for 65-12216, all other uses other divisions as can be seen
 in the 65-12216 description which is used on Morgan's property that is used
 for domestic water and is a well and is a well. Generally, the well
 is used for domestic use with the flow rate is low as is the
 condition: R29 cfs/sec. instead of 1.0 cfs.
