=====

Transfer 5033 adds points of diversion to Rights 65-10344, 65-10345 and 65-12607. The three existing pump sites were developed under the separate rights over a period of time and by combining the system will maximize efficiency and water management options for the municipal system.

Recommended conditions include watermaster control, multiple points of diversion measuring devices & lockable controlling works, right-of-way, place of use, availability under Right 65-12607 and standard transfer conditions.

ATTACHMENT A
City of McCall Application for Transfer
of Water Right Nos. 65-12607, 65-10344, 65-10345

PART 1, SECTION B, ITEM 6A

Description of Diversion System:

Water Right Nos. 65-12607 (Shore Lodge Pump Station), 65-10345 (Davis Beach Pump Station), and 65-10344 (Lake Street Pump Station) authorize a cumulative diversion rate from Big Payette Lake of 12.79 cubic feet per second ("cfs") or 5,735 gallon per minute ("gpm"). Water currently is pumped from three individual points of diversion into two pipelines to the City's Water Treatment Plant. Each pipeline is approximately 9,600 feet in length and has a 16-inch diameter. *

The Shore Lodge Pump Station uses a 40 horsepower, 4-stage turbine pump, a 50 horsepower, 2-stage turbine pump, and a 15 horsepower jockey pump with an 18-inch intake diameter. The Davis Beach Pump Station uses a 60 horsepower turbine pump, a 75 horsepower turbine pump, a 40 horsepower turbine pump and a 15 horsepower jockey pump with a 16-inch intake diameter. The Lake Street Pump Station uses two 50 horsepower turbine pumps and a 75 horsepower turbine pump with a 16-inch intake diameter. The locations of the existing pump stations and the proposed alternate points of diversion are shown on Figure 1.

PART 1, SECTION B, ITEM 6D (Remarks)

Proposed Diversion Rates.

The City's transfer application seeks to add the existing Shore Lodge, Davis Beach and Lake Street points of diversion as alternate points of diversion for Water Right Nos. 65-12607, 65-10345 and 65-10344, allowing the City to divert any or all of the water rights from any or all of the points of diversion. The transfer's purpose is to enhance the City's water management options, and to provide diversion and distribution efficiencies and redundancy. No change in the cumulative diversion rate under the City's three water rights of 12.79 cfs or 5,735 gpm is intended or would result from adding the alternate points of diversion. *

The City proposes to install a booster pump in the existing Shore Lodge Pumping Station to boost treated water to the City's western service area. Although the Shore Lodge pump will remain in place, the City proposes to divert the majority of its water from the Davis Beach and Lake Street points of diversion which would be upgraded to permit diversion rates at each station of up to 6.02 cfs or 2,700 gpm (12.04 cfs or 5,400 gpm total). The balance of the City's cumulative diversion rate *

* 11.32 cfs (5080 gpm) as license is decreed.

-JL 3/26/97

would be obtained from the Shore Lodge Pumping Station when and as needed to meet the City's peak and emergency demands, and for reasonably anticipated future needs.

The proposed additions of alternate points of diversion to the three City water rights will also improve the City's ability to provide for growth within its existing service area or extensions in its service area.

PART 2, SECTION A, ITEM 10

The City has continuously diverted and beneficially used water under its water rights for municipal purposes as needed, and subject to fluctuations in daily and seasonal water demand.
