INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Section 42-1409(7), Idaho Code. This statute provides that new property owners notify the Department of Water Resources (IDWR) of any change in ownership of a water right during an adjudication of water rights, and if a claim for the water right has not been filed to file the needed claim(s).

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. If you would like any of these brochures or if you have questions about completing this form please contact your nearest office of IDWR or you may call 1-800-451-4129 (toll-free).

The first line of the form asks for the date of closing so IDWR will have a record of the effective date of the property transfer.

The second line of information requires the legal description of the property being transferred. This information is **ESSENTIAL** and should be available from the documents that will be present at the time of closing. The first two lines of the legal description **MUST** be completed. IDWR's records are based upon legal descriptions using township, range, section and fractions of a section descriptions, and this information must be included on the form. If you also have available a legal description based upon a townsite or subdivision and lot and block number, please also include this additional information. A lot and block legal description is **NOT** a substitute for the township, range, section and fraction of a section description.

After completing the legal description, if all water is supplied by a public service water supply you may check the first box; complete the name, address and telephone information for yourself, the new owner; sign the form in the space provided and return the form to the IDWR office nearest you.

If there are water rights associated with the property, the seller should be able to provide you with the water right number(s). The water right number(s) for the property are to be put in the space provided at the second box on the form. If you or the seller believe there are water rights for the property but the numbers are unknown, then you may wish to call or come into an office of IDWR for assistance in identifying the water rights for the property involved. If claims for the property have not been filed you will be so advised by IDWR.

After the water right number(s) for the property has been entered on the form, complete the name and address information for **BOTH** the former owner/seller and for yourself, the new owner, in the spaces provided. Please also include your telephone number. If the property you have purchased is only part of the property owned by the former owner/seller, you may be purchasing only part of the total water right held by the seller. This means the water right held by the seller must be split so you get your proportionate share of the water right. Be sure to include a description of the portion of the water right you have purchased. The seller should be able to help you describe the portion of the water right for the property you have purchased.

If the former owner/seller will sign the form and the seller is shown as the claimant of the water right in IDWR's records, then you do not need to attach proof of ownership of the land or the water right. The seller should know if the original claim was filed by him, or if the seller has filed a change in ownership so the seller is shown as the claimant of the water right in IDWR's records. If the seller is not going to sign the form then you must attach some proof of ownership of the property described at the top of the form or proof of ownership referencing the specific water right(s) for the property.

The new owner must sign the form in the space provided. If the former owner/seller is available to sign the form please do so in the space provided.

When complete, the new owner and the former owner/seller should each retain one of the copies and return the original of the form to IDWR. You may return the form to the IDWR office nearest you or to: Idaho Department of Water Resources, Statehouse Mail, Boise, ID 83720-9000, Attention: Adjudication Bureau.

RE: Water Right No. 65-12721 & 65-1131A

Dear Mrs. Vogel:

I have received a request to review your water rights, as referenced above. It is to my understanding that you were concerned about your late husband, Ellis, being taken off these water rights, and that the rights were decreed incorrectly. After reviewing these rights and the partial decrees, records indicate that both rights were decreed in *both* your name and Ellis' name. I have enclosed a copy of the decrees for your review.

I did not find any information in the file referencing a request to remove Ellis' from the water rights. In order to correct these water rights, please sign the enclosed form, and return with a copy of the deed showing the transfer into your name only; or a copy of the death certificate for Ellis.

Thank you for your patience and cooperation. I apologize for any inconvenience this may have caused. If you have any questions regarding this letter, feel free to contact this office at (208) 334-2190.

Sincerely,

Katherine recalled asking someone to correct both
records some time ago ~~since~~ since her husband,
Ellis, is deceased.

Appears GS-1131A was corrected
GS-12721 was incorrectly changed ... dropped her

POU County: GEM

Non-Irrigation Uses: WS/GAMEBIRD, WATERFOWL & FISH HABITAT

Other Rights: DELIVERY VIA SMITH DITCH, WHICH ALSO DELIVERS OTHER IRR. RTS.

Conditions of Approval:

- 09D - Water used under this right if discharged into a natural channel shall meet Idaho Water Quality Standards.
- 18A - The right holder shall install/maintain permanent measuring devices in such a manner that the amount of water entering the reservoir and the amount of water released from the reservoir can be measured.
- 005 - Use of water under this right is subject to control by the watermaster of State Water District No. 65.

Remarks: GEN This claim corrects the point of diversion that was described in error on the licensed water right. It also adds in the wildlife and recreation rate of flow of 0.6 cfs that clearly was intended in the original filing of the Application for Permit, and was found in the field examination, but was not included in the license.

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Use of water under this water right will be regulated by the watermaster of State Water District No. 65.
