I presume a quick answer is preferable to a delayed response. I hope you find the attached material useful and on point. Today this method is the quickest for me. In a week I could be specific for Basin 65. The licenses did not FAX too well.

Foremost, Norm wants the water use code to equal 87 (Minimum Stream Flow) and changed from 34 (Minimum Instream Flow).

Otherwise, I have attached the recommendations for Basin 41 along with the licenses and the remarks/cond. Codes from recommendations in Basin 36 as examples. You'll see between these two basins the remark description for the point of diversion is in some cases in the POD and others EXP. Exercise your professional judgement on which one to use in any given situation. With these materials I think you can work your way through the Board's Basin 65 claims.

Thanks for catching these. Those in Basin 41 were an embarrassment for me when the rights slipped out in the Preliminary changed little from the permits.
