CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right limited to the amount that can actually be beneficially use used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Use of water under this water right will be regulated by the watermaster of State Water District No. 65.
6. The Director retains jurisdiction of this right to require purchase or lease of storage water to compensate for diversion of the streamflow authorized by this right.

E. NARRATIVE/REMARKS/COMMENTS

OVERLAPS - P/R & F/V - same in same 20' diff. P/R & V/S

Water from unnamed stream is diverted initially by 20' of 3" PVC. An approximate 400' length of 1 1/2" PVC is connected to the end of the 3" PVC and terminates at southern property line. There is a check for special couplings on 1 1/2" PVC and stretched across property for sprinkler irrigation. Approximately 1 acre is irrigated. The measured flow was 0.02 CFS. Since a maximum of 1 acre is irrigated, not 1.5 acres as indicated on permit, recommend increasing flow to 0.02 CFS and the amount of irrigated land changed to 10 acres.

Approximately 50' of pipe is used from P/R to F/V using the PC flow program and assuming full pipe flow a flow of 0.022 CFS was determined. This checks closely to the in site measurement.

Have conditions of permit approval been met? ☒ yes ☐ no

Dear Claimant:

I am writing in regards to the approved Application for Permit No. 65-13282, to appropriate water in VALLEY County, which was sent to you recently.

On November 19, 1987, the Fifth Judicial District Court issued a Commencement Order, which began a general adjudication of water rights from the Snake River Basin water system in Idaho. A general adjudication is a court case which will result in a decree determining all rights to water from the water system. Idaho Code §42-1409 requires all persons owning water rights within the Snake River Basin water system to file a Notice of Claim to a water right with the Idaho Department of Water Resources for each water right, with certain exceptions. Your Permit No. 65-13282 is for the appropriation of water within the Snake River Basin water system, but applications for permits approved after entry of the Commencement Order is one of the exceptions to the requirement to file a Notice of Claim in the adjudication. You therefore may but are not required to file a Notice of Claim for your Permit No. 65-13282 in the adjudication. The validity of the permit will not be affected if you choose not to file a Notice of Claim at this time.

The adjudication statute does authorize the director of IDWR to issue an order at a later date requiring persons with permits who file proof of beneficial use after entry of the Commencement Order to file a Notice of Claim in the adjudication. An order requiring you to file a Notice of Claim has not been issued, and you will be notified by mail if such an order is issued. For further information about the Snake River Basin Adjudication, you may call the Adjudication Hotline toll-free at 1-800-451-4129 (for callers in Idaho) or any of the offices of IDWR.

Sincerely,

David B. Shaw
