

POU MAP 65-22404
T10N, R01E

36

An aerial photograph of a landscape, likely a wetland or marsh, with a grid overlay. The grid consists of black lines forming squares. A yellow outline highlights a specific area in the center-left of the image. The number 36 is printed in blue in the center-right of the image. The landscape is characterized by various shades of blue, green, and brown, indicating different vegetation or water levels.

BUREAU OF LAND MANAGEMENT

Lower Snake River District
3948 Development Avenue
Boise, Idaho 83705

In Reply Refer To:
4130 (095)

FEB 27 2003

Dear Grazing Permittee:

Recently, we have received some much-needed moisture over the past several weeks, however, the drought situation and outlook for much of Idaho still remains severe to extreme. Long-range forecast indicates that the chances of recovering from drought in this coming year are very poor. Much of the snow pack will likely be adsorbed by the soil and will not make it to the ground water. Run-off affecting reservoirs, springs, and stream flows are expected to be at lower levels than previous years. There has been little snow pack at the mid to lower elevations which may reduce the number of water sources available for livestock, wild horse and wildlife use. According to the US Seasonal Drought Outlook, the outlook through April 2003 is for continued drought conditions except some possible improvement in the south central part of Idaho.

The Bureau of Land Management (BLM), Lower Snake River District (LSRD) is concerned about the possible effects of a drought year, given that we have only recently begun to recover from the effects of the prolonged drought of the late 1980's and early 1990's. It has been recognized that severe drought reduces plant vigor and food reserves in perennial plants, reducing root growth, plant production, and soil cover. Continuation of current conditions with the limited amounts of snowfall this year could limit the distribution and longevity of stock water, directly affecting scheduled grazing use for the 2003-grazing season. Without the average winter snowfall and spring precipitation, stock water may be limited and rangeland conditions might not promote adequate forage growth to sustain livestock grazing on public lands within your allotment(s).

It has been stated in Dr. John F. Valentine's book *Grazing Management* that "continued stocking at normal levels during moderate or severe drought is probably the greatest cause of range deterioration." Without proper management adjustments, drought could undermine the long-term health and productivity of the rangelands.

Depending on the timing and amount of future moisture (received prior to spring turnout), grazing management changes may possibly be necessary for the 2003 grazing season to address concerns with water shortages and reduced plant productivity. I would like to suggest that you begin to consider the possibility that continuation of current drought conditions may necessitate possible changes for the 2003 grazing season such as delayed turnouts, changes in season of use, temporary livestock reductions, or even rest of pastures or allotments.

SCANNED

APR 24 2003

We understand the hardships drought conditions create, and would like to help you find solutions to insure the long-term productivity of the public lands is protected. It is important that we begin now in planning for the 2003 grazing season and work together to find ways to lessen the hardships created by drought. I would recommend that permittees, who are planning to graze livestock this spring, begin to consider drought preparations and planning now. I suggest that you contact the BLM Rangeland Management Specialist who administers the allotment(s) you graze livestock on and make plans for an allotment visit prior to spring turnout. These field visits would allow you and your BLM Rangeland Management Specialist to assess impacts of drought and, if needed, start to prepare drought plans on the allotment(s) you graze livestock in for the 2003 grazing season.

I appreciate the effort many of you have made in previous drought years, and more recently, when many of you recognized the drought severity in your fall and winter range and took the initiative to make adjustments in your stocking rates, remove livestock before the end of your grazing periods, or taking non-use this past fall and winter within the allotment(s) you graze your livestock in.

I look forward to your continued cooperation involving drought management and the long-term health and productivity of your grazing allotment(s).

Sincerely,

Howard Hedrick

Howard Hedrick
Acting District Manager

Case No. 39576

A. Subcase 65-22404
(Insert water right number)

**STANDARD FORM 1
OBJECTION**

Please fill in the following information:

B. NAME AND ADDRESS OF PERSON OBJECTING

Name: United States of America acting through the Department of Interior,
Bureau of Reclamation, Regional Director PN Code-3100
Address: 1150 N. Curtis Rd. Suite 100
Boise, Idaho 83706-1234
Daytime Phone: (208) 678-0461 (Dala Walton)

Name & Address of Attorney, if any:
David W. Gehlert (303 312-7352)
Trial Attorney, General Litigation Section
Environment and Natural Resource Division
U.S. Department of Justice
999 18th Street, Suite N 945
Denver, CO 80202

C. CLAIMANT OF WATER RIGHT AS LISTED IN DIRECTOR'S REPORT

Name: Joseph Jennaro & Jerald Jennaro c/o Rhonda Jennaro
Address: 4712 Amanda Pl.
Pleasanton, CA 94566

D. I object to the following elements as recommended in the Director's Report. (Please check the appropriate box(es)).

- ☒ **General Provision Basin 65 Irrigation & Other Part III (3) Separate Streams**
1. ☐ **Name and Address**
Should be:
 2. ☐ **Source**
Should be:
 3. ☐ **Quantity**
Should be:
 4. ☐ **Priority Date**
Should be:
 5. ☐ **Point(s) of Diversion**
Should be:
 6. ☐ **Instream Flow Description**
Should be:
 7. ☐ **Purpose(s) of Use**
Should be:
 8. ☐ **Period of Year**
Should be:
 9. ☐ **Place of Use**
Should be:
11. **I object because:**
- ☐ This water right should not exist.
 - ☐ This water right was not recommended, but should be recommended with the elements described.

E. REASONS SUPPORTING EACH OBJECTION(S):

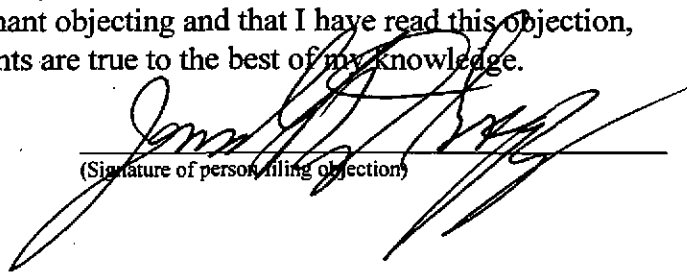

The Bureau of Reclamation objects to the separate stream provision of the Director's Report for Basin 65, Part III. These streams should be administered as part of the Payette River System in order to adequately protect water rights in the Payette River subbasin.

F. VERIFICATION (Must be Completed)
