Renumbered Notice of Claim to a Water Right No. 65-22553

Dear Claimant(s):

We have received and processed a Change of Ownership for a portion of the original Claim to a Water Right Number as referenced above. This Change of Ownership required a split of the original claim resulting in renumbering this claim by issuing a new water right number to represent each split. The new Notice of Claim to a Water Right number for your portion is referenced above and a copy is enclosed.

Your portion of this claim has a specified point of diversion, nature of use and place of use. If you plan on changing the nature of use, place of use, or point of diversion under this right, including adding a new point of diversion, then an Application for Transfer on your portion of this right is required. Please contact this office for further information on the Application for Transfer form. If you do not plan on changing any items on your claim, then no further action is required at this time. You will be notified of any future action taken on this claim. Also enclosed is a copy of the original claim for your reference.

Please feel free to contact this office if you have any questions concerning your claim or this letter.

Dear Sue,

Thank you for sending the aerial photo of the property. I can see why you were confused. How do you find anything?

The enclosed survey and copy of the aerial photo should help.

Information:

I'm certain of the lower property line as drawn in magenta, however, the Northern boundary of our lot is hard to pin point. The people to the North of us are named Billingsley, and have built a barn and home on their land. The photo shows no buildings so determining the actual area is difficult.

On the aerial photo copy, there is a magenta line from the start of our property description and heads what would be West. It's hard to see. Also, the magenta line heading North should follow the road in a curve.

Questions:

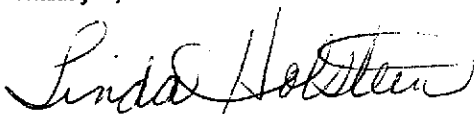

Is the Billingsley property also included as part of the Shobel's water right? There looks to be a portion in the Northwest corner of the Shobel's section that could be an overlap on any other water right the Billingsley may have. If so, could the section in question be applied to the Northwest section of our property?

How is the area where the highway passes through divided? Would the rights actually go to the center of the road?

These may sound like silly questions, but since our land follows the high water line of the river on the West side, it would make sense to have the water rights do the same. If this is possible, I'd appreciate any information on how to go about doing it.

We really appreciate your efforts in helping with the water right transfer. If you have any other questions for us, please contact me at 888-4237.

Thank you,

Linda Holstein
