The claim and recommendation for 22-281 have been renumbered to 22-218. This should keep all of the work intact that has been done. Please check it over carefully.

Dave

Dave, we have a miss numbered claim and wonder if you can help with correcting the problem. The issue is 22-281 should have been 22-218. As you can see from the attached spreadsheet there are a couple of water right claims for a portion of 22-281. These claims are good. There is no claim in the data base for 22-218. Can you some how generate a new claim and recommendation for 22-218 based on the data entry that has been done for the claim and recommendation under number 22-281? There is nothing in the pedigree table for 22-281 so it will not be effected by this change. Not sure if it matters but there is a large POU shape for the recommendation on 22-281. This shape should be linked to 22-218.

Let me know what you decide.
Ernie
