RE: Transfer to Change Point of Diversion Needed for 29-00446C

Dear Mr. Hurly,

The Idaho Dept. of Water Resources has been in the process of reviewing the Snake River Basin Adjudication (SRBA) claims in your area. During my review of your water right I have determined that a transfer to change you point of diversion needs to be filed.

The SRBA court requires us to make our water right recommendations based on how the water right existed on November 19, 1987. My research indicates that your property was irrigated from a ditch that carried water along the south side of Pocatello creek. In 1988, Tom Skoog bought the property and changed the point of diversion to its current location on the SE corner of your property.

Since this change occurred after November 19, 1987, I must recommend the point of diversion for your right as being in the historical location (map enclosed).

In order to change your point of diversion from the historical location to it's current location, a transfer needs to be filed.

For your convenience, I am enclosing an application for Transfer of a Water Right. You might wish to wait until the recommendations for basin 29 are sent to Directors report so the other elements of the water right can be accurately described on the transfer.

Please feel free to contact this office if you have any questions.

Respectfully submitted,

Craig L. Saxton
Water Resource Agent
Adjudication Bureau
