

Memorandum

Date: May 19, 2003

From: Craig L. Saxton

Subject: Accomplished change in POU from Spring (29-00449A)

Per questions that arose during the NOE process, Ernie Carlsen and I conducted a field exam and met with Eugene Crandall on 5/8/03

While speaking with Mr. Crandall it was determined that he doesn't irrigate from the creek (29-00448B) so must disallow that claim.

Mr. Crandall showed us the historic path of how the spring flood irrigated his ground on the East and West side of his driveway. Now Mr. Crandall doesn't irrigate on the west side of the driveway, but added a sprinkler system and irrigates ground on the East side of the driveway that could not have been flood irrigated historically.

0.90 acres were found that was historically flood irrigated ^{by creek} but is not now. 0.90 acres is now sprinkler irrigated from the spring which was not historically flood irrigated. ^{from creek}
Recommend the current 0.90 acres now irrigated with sprinklers as an accomplished change in POU.
