RE: East Weiser Irrigation District 67-0007

Dear Danielle:

Enclosed is a revised map showing the boundary of the District within the deliver area of the Weiser City Ditch and Irrigation Co. . As per earlier correspondence, the water was delivered through the Weiser City Ditch and Irrigation Co.'s MILL DITCH to the East Weiser head gate. The District furnishes water to 526 separate city lots as well as various small acreages within the District. I sampled several lots and determined that each lot had about 6000 sq. ft. of irrigated lawn, garden and trees. With each lot there is a strip between the side walk and curb that is also irrigated. I examined each small acreage for their watering uses. To the best of my knowledge there is 91.57 acres of irrigated land and lots that lie within the East Weiser Irrigation District boundary. With transportation loss at about 20% the East Weiser Irrigation District should have about 110 inches of the 450 inches as decreed in Muir vs Allison as right No. 67-0007. If you have any questions, please give me a call.

Sincerely yours,

Jay Edwards
Sec.
