Comment: This permit was superseded by Right 01-213, which was decreed in Twin Falls Canal Co. v. Charles N. Foster, et. al. There is no need to conduct a field examination or to issue a license.

April 5, 1922

Re: Permits 3752, 4489, 5665.

Twin Falls North Side Land and Water Company,
Jerome, Idaho

Gentlemen:

In connection with the examination for proof of beneficial use under permits Numbers 3752, 4489 and 5665, the following information is desirable.

Permit No. 3752 as originally filed and approved June 17, 1908 covered 44,555.95 acres. The land list appended to this permit was amended February 23, 1914 to include 28,474.02 acres, as shown on map and list of same ~~to~~ date. This permit was again amended April 6, 1914 to include 49,989.90 acres. Certificate of completion of works was issued April 10, 1914. Proof of beneficial use was made during November, 1921.

Before a license can be issued under the terms of this permit it will be necessary to have a map upon which there should be shown the 40-acre subdivisions to which you wish the water to be dedicated under the terms of the license.

Permit No. 4489 as originally filed and approved March 31, 1909 covered approximately 48,000 acres. The land list attached to this permit was amended February 23, 1914 to include 37,051.04 acres definitely described plus 3,000 acres on Clover Creek not described by legal subdivisions. Proof of completion of works was made February 20, 1921, with apparently the same land list as the amended list mentioned above. I would like to have a map such as requested under permit No. 3752 giving the same information for this permit.

Permit No. 5665 was filed November 29, 1909 and approved January 13, 1910. The land list as originally filed with this permit covered 57,339.01 acres. Certificate of completion of works was given March 17, 1919 for 450 second feet including the same land list as original permit. Could we also be furnished with a map for this permit giving the same information as requested in the others.

Very truly yours,

W. G. SWENDSEN
Commissioner of Reclamation

Form 16

PERMIT NO. 3752

Proof of Application of Water to Beneficial Use

Deposition of Holder

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. R E Shepherd, age 60, Residence Jerome Idaho-
Occupation General Manager of Twin Falls North Side Land and Water Company and associated Companies, Residence, Jerome, Idaho

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. Twin Falls North Side Land and Water Company, Jerome Idaho
General Manager, in charge of interests of above company in Idaho

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. Permit 3752, Dated June 16, 1908, Priority to be established June 16, 1908

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. Snake River. Point of Diversion, Sec 28-10-21, from which M.C. on N. side of River between Sec 28 and 29 bears S. 58° 42' W 530'

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use.

Ans. Diversion made from Snake River at Milner Dam into main canal, concrete lined for a distance of 1½ miles, and with a capacity at the head of approximately 3300 second feet. Water is diverted from main canal to lateral system which conveys the water to places of use

Ques. 6. State for what purpost water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivate or natural meadow land and the nature of all improvement which have been made as a direct result of said use.

Ans. Irrigation and domestic on lands within the Twin Falls North Side Land & Water Company's irrigation project situated in Jerome, Gooding and Elmore Counties, as shown by maps on file in the Department of Reclamation of Idaho, and as set out in Exhibit A of decree of the District Court of the Fourth Judicial District of the State of Idaho in and for the County of Twin Falls, in the cause entitled Twin Falls Canal Company vs Charles N. Foster, et al together with the amendments thereto, the lands in said project have been cultivated and approximately 65% of the total acreage is actually in crop at present. The acreage covered by this filing is 47,250 acres.

Ques. 7. If for other than for irrigation purposes, state how applied, amount of horse power generated, etc.

Ans. ✓

Ques. 8. What is the minimum amount of water required for the specified above?

Ans. Not yet determined but use has been made up to full capacity of canal, or 535 second feet under this permit.

Ques 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. ✓

3752

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. The total amount claimed herein has been diverted and used for irrigation (to wit: 535 second feet under the permit) during practically every year beginning with 1911 and continuing down to the present time

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and right claimed thereunder.

Ans. Additional waters out of the normal flow of Snake River, Big Lost Wood Rivers, and Jackson Lake Storage. Same have been used upon said lands at different times since 1909 in varying amounts. Other permits under which we are claiming are as follows:

Water permit 7603 — 2250 S.F.
4489 — 115 S.F.
5665 — 450 S.F.

Interest in Jackson Lake Stor. Appx. 375000 A.F.

(Sign) W E Shepherd

I hereby certify that the foregoing testimony was read to the above subscribed before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me, at my office in Jerome County of Jerome State of Idaho, on this 12th day of November A. D. 1921

Edward D Reynolds

Notary Public, residing in Jerome, Idaho

My Commission expires January 21, 1922

Form 23

REPORT OF ENGINEER

1. State name of applicant and number of permit: The Twin Falls North Side Land & Water Co. #3752

2. State source of water supply: Snake River

3. Location of point of diversion: At ¼ cor. between Sec. 28 & 29, T. 10 S. R. 21 E.

4. State whether or not the works of diversion are *fully* completed and in accordance with terms of permit:

Yes.

5. Describe works as they exist, giving dimensions of same as follows:

(a) Width of conduit at bottom: See table of elements attached.

(b) Width at water line:

(c) Depth of water:

(d) Grade per mile:

(e) Capacity of ditch: 3000 cusec Main Canal. Main Lt. 626 down to 535 where it empties into Big Wood River. second feet.

6. State whether or not water has been turned into works of diversion and if so, to what extent: Yes

Up to 3000 cusec in Main Canal.

7. Give exact location of lands to be irrigated. Give exact number of acres under cultivation in each forty acre tract: See last amended list recorded under Permit 3752.

8. Submit map on enclosed plat, source of supply, point of diversion, route of ditch or ditches and cross hatch lands to be irrigated.

Remarks: Snake River Decree, entitled "Twin Falls Canal Co. Vs. Chas. N. Foster et al Defendants" grants 400 cusec, designated as Right #2 B. Also 2250 cusec designated Right #4, also that portion of Permit #3752, designated as Right #5, necessary to make up a given capacity of canal of 3000 cusec. 400 cusec + 2250, leaves an available capacity for this permit of 350 cusec.

I find the main canal diverting from the Snake River as described above, capable of conveying approximately 3000 cusec as named in the decree; also that the main lateral diverting from this main canal known as B5 and conducting water to the third segregation the place of use and further described in the land list referred to, capable of diverting 626 cusec from main canal and delivering 535 cusec into Big Wood River.

J. M. Burkett

June 24, 1914.
