

3-11-03 : Dwain Williams Called:

29-00448E

He is concerned about acreage recommended. He feels that more acreage and thus more diversion rate should be recommended. I told him to send in a Black + White copy of the map with the NOE stating that he disagreed with the recommendation and I would re-look at it. He agreed.

5-27-03 : spoke with Chairman and he stated that it is true Mr Casper couldn't push water from his POD to Williams Place, But there was another POD upstream Past Crandall's place that diverted water to the South side of the creek. He will object and gather evidence for the Court.

10-3-01: Purchased land 18 yrs ago From Williams -
(F.E.) When they Purchased the land No Irrigation

: Main Irrigation for ~~that~~ Field From Pond. Creek dumps
East
into pond then outlets back into Creek
Pond is 40' x 45' x 4'

: Pumps Marathon
HP = 3
50 = 3
Yellow Pump

: GPS Tag # A0009004

: Mr Williams showed me Historical Ditch on the South
Hill that was used to Flood Irrigate High Points
- last time^E Field was Irrigated was last year.

11-13-02: Found 3 acres

: Deed sent to WR.

11-20-02: Two Points of Diversion

2 or 3 years
