

MEMORANDUM

TO: 29-480

Fr: Bryce Contor

Date: 8/10/2001

Re: Acreage limitation

Two quarter-quarters are described by the decree as authorized place of use, but the decree is incomplete in that it does not describe acres per Q.Q.

At a nominal rate of 0.02 cfs/acre, the decreed Q of 0.60 cfs implies 30 acres of irrigation.

Current practice indicates that the lowlands irrigable by gravity means are about 18 acres (see map "Determination of Original" attachment #1 to 8/3/2001 memo under "general" flap in file 29-480).

The more liberal acreage (30 acres) is used as a description for this right. This does not impact current use of the right but helps define it for possible future transfers. Bryce A. Contor 8/10/2001
