Case No. 39576	)	FACT AND CONCLUSIONS OF LAW
	)	
	)	WATER RIGHT NO.: 29-51
	)	(Digital Boundary-Portneuf Irrigating Co.)
_____	)	

I. FINDINGS OF FACT

A notice of claim was filed for this water right pursuant to I.C. § 42-1409. The Director of the State of Idaho Department of Water Resources examined the water system for this reporting area. The *Director's Report* contained a recommendation for the elements of this water right.

An *Objection* was filed by Portneuf Irrigating Company on November 6, 2003. The *Objection* was resolved on May 25, 2004 with the filing of a *Standard Form 5*. All parties to the subcase and IDWR are signatories to the *Standard Form 5*.

II. ANALYSIS

A. Place of Use/Digital Boundary

The place of use element for this water right is described by a digital boundary rather than by legal description with legal subdivisions such as Township, Range, Section, and Quarter-Quarter designations. The place of use element was changed during the litigation process and differs from the digital boundary on file with IDWR at the time the *Director's Report* was filed.

B. Recommendation for Place of Use Description Using Digital Boundary.

On July 1, 2002, the Idaho Legislature approved the use of digital boundaries for describing the place of use for water rights meeting certain criteria. I.C. § 42-219(2) (licenses)

and I.C. § 42-1411 (2) (h) (*Director's Reports*) Digital boundary descriptions of the place of use rely on Geographic Information System (GIS) mapping technology. This technology provides a description of the place of use for a water right to be identified and visually displayed in a map overlay format through the aid of computer technology.

Digital boundary descriptions of the place of use are permitted for water rights that are for irrigation purposes of use and meet one of the following criteria: (1) used in conjunction with an irrigation project where the canals constructed cover an area of twenty-five thousand (25,000) acres or more; (2) the place of use for the water rights is located within an irrigation district organized pursuant to the laws of the State of Idaho; or (3) the water rights are for an irrigation project developed by an association, company, corporation or the United States to divert and deliver or distribute surface water under any annual charge or rental for beneficial use by more than five (5) water users in an area less than twenty-five thousand (25,000) acres. I.C. § 42-219(2)(5)(6); I.C. § 42-1411 (2) (h)

This water right meets the statutory criteria and may be described by a digital boundary.¹ Therefore, this water right is recommended using a digital boundary and with the following additional language as set forth in the attached *Recommendation for Partial Decree*:

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. § 42-202B(2) and authorized pursuant to I.C. § 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

¹ In incorporating a digital boundary into a partial decree, the electronic or digital data is what is actually decreed as opposed to the map generated from the data. The map generated from the data is for illustrative purposes. The digital data is stored on a CD-ROM and is incorporated by reference into the *Special Master's Report and Recommendation* and recommendation for partial decree. Duplicate originals of the CD-ROM will be issued. The SRBA District Court retains one original together with the original partial decree, and the Idaho Department of Water Resources (IDWR) retains the other original. Upon request, the claimant can obtain a copy of the CD-ROM from IDWR at no cost, although GIS software will still be required to access the data. Subsequent administrative changes, if any, to the place of use will also be stored in a digital format and kept on file and maintained by IDWR. IDWR will maintain all computer software and/or hardware necessary for reducing the data to a usable format that is accessible to the general public, including access through the IDWR Internet website (www.idwr.state.id.us) or its successor Uniform Resource Locator (URL).

C. Digital Boundary on CD-Rom Filed July 9, 2004

The place of use agreed on by the parties and IDWR is illustrated by the map overlay attached to the *Recommendation for Partial Decree*. The digital boundary for the place of use is described on the CD-Rom filed July 9, 2004.

III. CONCLUSIONS OF LAW

Therefore, based on the file and record herein, IT IS RECOMMENDED that this water right be decreed with the elements set forth in the attached *Special Master's Recommendation for Partial Decree*.

DATED: November 29, 2005.
