WATER RESOURCES
WESTERN REGION

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

- place of use
- point of diversion

2. Describe the changes you wish to make in the proposed recommendation:

- place of use to include homesite landscaping (lawn, etc.)¹
- add an additional point of diversion directly behind home²

3. Give a brief explanation as to why you disagree with these portions:

- 1) water from the creek is used to water yard and landscaping
- 2) see below

☐ I AGREE with this proposed recommendation: no changes need to be made.

DATE: Feb 21, 2003 SIGNATURE: Leo D. Lewis Bonnie J. Lewis

2) Shortly after my father's death (Willis Lewis) my mother (Arvilla Lewis) leased the lower part of the creek bottom property to Sam Wanner of Inkoma. This was in the early 1950's (my father died in 1952). In those years the home was located near the original point of diversion and water was used to irrigate strawberry and raspberry patches and a large garden at the south end of the creek bottom property. Mr. Wanner had use of the land from the new homesite on down the canyon and built a concrete diversion dam on the creek immediately behind the new homesite in order to flood irrigate the pasture on the creek bottom below that point. In ensuing disputes a Mr. Armond Hall dynamited the dam and Mr. Wanner resorted to canvas dams thereafter, not replacing the concrete dam. The diversion I am currently using to water my yard is built around the remnants of the concrete dam built by Mr. Wanner in the 1950's. Because of the placement of the new homesite, whose yard and landscaping block any flow from the upper diversion point from reaching the lower portion of the property, the only practical place to divert the stream for watering the lower creek bottom property is from the replacement diversion point requested as a second point.
