1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

Quantity of useable water, total acres involved, source of water and location of ground irrigated.

2. Describe the changes you wish to make in the proposed recommendation:

Please refer to original water right, copy enclosed,

3. Give a brief explanation as to why you disagree with these portions:

This water right along with water right 21-151 are for irrigating grazing ground next to swamp that duck creek flows into and out of. The ground shown on this map is irrigated by 60 acre feet of storage water that we already have with Fremont-Madison irrigation. We would like to keep both original water rights but change name to current name of ranch. Thanks for your help and consideration.
