1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

QUANTITY, EXPLANATORY MATERIAL: Delivered through Stensens + Central Ditch

2. Describe the changes you wish to make in the proposed recommendation:

BASED ON RESEARCHED HISTORY OF DEEDS FOR THIS PROPERTY THE QUANTITY SHOULD BE ~~0.96~~ CFS.

0.9531

3. Give a brief explanation as to why you disagree with these portions:

WHEN THE DECREE (7/6/189) WAS ISSUED THE STEVEN PROPERTY INCLUDED 139 ACRES FOR WHICH 138" OF WATER WAS DECREED. 48 ACRES WERE TRANSFER TO ABBIE OSBINE OF THE ORIGINAL 139 ACRES WITH WATER RIGHTS, THEREFORE THE RIGHT QUANTITY SHOULD BE 47.65" OR 0.9531 CFS.

I AGREE with this proposed recommendation: no changes need to be made.

RE: Notice of Error Reply for 27-11997 and 27-12A

Dear Harvey,

Enclosed for your review is a new Preliminary Director's Report for both 27-11997 and 27-12A along with an aerial photo illustrating the field boundary.

In response to the Notice of Error Reply you submitted on 27-11997 the place of use was modified to correspond with 27-12A. Since the water rights now have an overlapping place of use we also added new remarks to both rights limiting the combined irrigation to 35.9 acres. The recommended point of diversion for water right 27-11997 is the Central Ditch.

In response to the Notice of Error Reply you submitted on 27-12A the Stevens Ditch has been added as a second point of diversion along with the Central Ditch. After much effort to research the distribution of this water right it was decided to recommend .80 cubic feet per second as your entitlement. This is more than the 1 miners inch per acre for the number of acres being recommended. We are certainly open to reviewing with you the chain of title for the original place of use. Of course you will have the opportunity to object to the Department's finding once the Director's Report has been filed with the SRBA Court.

Respectfully yours,

Ernest Carlsen
Water Rights Supervisor
