

Memorandum

Date: July 3, 2001

From: Craig Saxton

Subject: 29-02182

29-02182 is an historical license from a spring.

29-02182 was licensed for irrigation in June of 1925. Sometime in the Early 1950's the system changed and the claimant started dumping the spring water into a pond that is currently in use and thus ceased using the spring water for Domestic purposes. Up until 1974, the irrigated area from this pond was in a radial area around the pond. In 1974 when the well associated with 29-07243 was installed, the spring water was then used to just irrigate the gully where it is currently in use.

Results

POU - C05 – recommend current place of use as PPU with 29-04364. No amendment needed based on Claims Investigation Handbook Chapter 8, section IIB paragraph 3.

POD – C03: Two of the 5 original points of diversion are still in use. Highlighted on field examiners report.

Purpose of Use – C02 – Do not recommend Domestic use. Licensed purpose of use was domestic and irrigation for use in “townsite”. Used on private land.

Partial Forfeiture – Right licensed at max acres of 280. 7 different 40 acre tracts. CFS licensed at 1CFS and needed to be reduced to 1 inch per acre.

SOU – Set at IDWR standard. Season of use not on original license.

Overlap – Right 29-04264 is a groundwater right and fills the pond and irrigates the same place of use as the spring.
