

Memo to File
From Roger Warner

To: File No 29-2255C

Date: May 12, 19 2003

PMC provided a "notice-of-error" reply for the above referenced water right. In it they expressed disagreement for season of use. They felt a "typo" mistake caused the season of use to turn out 5/1 to 11/1 rather than 4/1 to 11/1. I reviewed the file and found that in two (2) locations on their application, they actually put down "5/1 to 11/1." (See reply dated 5/12/03).

In an effort to minimize the work required, I conferred w/ Deputy Attorney General, Candace McHugh via telephone. Candace indicated that since it was noted twice in the application, that she was reluctant to call it a "typo." She felt that by changing the season of use from 5/1 to 4/1 may have an effect on ~~the impacts of~~ adjacent ground water users that may merit evaluation. She also stated that if they wish to rectify they may do so through the SRBA court or may file a transfer.

WRW.
