Memo to File

I met with Alma Hubbard this morning. He had a copy of a drawing from the ASCS office. We reviewed that drawing compared to our preliminary drawing. He finally agreed that he only irrigated 146.7 acres according to the ASCS map. I indicated that our drawing, based on what Skip found, included 221 acres.

He further agreed that he did not irrigate the land below the "creek" bed that runs east of Meadow Creek to towards the road. He said the pond locations he mentioned yesterday are only present when the upper portion is irrigated. When he is not irrigating, the ponds dry up. When the ponds are present animals do drink out of them.

He further stated that he hasn't had a house and/or trailer house on the property for 5 or 6 years.

I made an appointment for him to come in on Thursday, July 1 to sign an amended claim.
