Candice, it turns out that this license is used in conjunction with 29-2284 (also GW) and I think I will invite a new beneficial use claim which will also be used in conjunction.

What do you think of leaving 29-2301 without a volume to be consistent with the xfer, calculating a reasonable volume for the three rights in combination, and adding that combined limitation to all three rights?

Priority of 2284 is 1949, priority of 2301 is 1951, priority of ben use claim will be 1953.

Thanks.
