

A29-2311A
ROXIE R. HOLSTEN
Narrative by Cindy E. Bird
June 5, 2002

Photo 1. 100 hp pump

June 4, 2002 I met with Mike Holsten, Roxie's husband, to determine actual points of diversion on her SRBA claims. The points of diversions were listed in the incorrect sections from the original license.

Photo 1 was taken at 2:56 pm looking west at the pump. Site tag A0012006 was applied to the power pole. The serial number of the motor is PM9480. The manufacture tag on the pump was unreadable.

Photo 2. 60 hp pump

Photo 2 was taken at 3:11 pm looking west at the second point of diversion under this license. USGA applied a site tag A0012799 on the exit pipe. This well borders Elizabeth Call's property. The property in the background belongs to Elizabeth Call and is operated by David Modersitzki.

The pump is a 60 hp Fairbanks-Moore pump. The manufactures tag was unreadable for a serial number or model number. The serial number of the Fairbanks-Moore motor is PM3496.

No change has occurred in the place of use. Buried mainline and riser run east and west in the center of the property.
