

A29-2311B

2/28/02. Under this license the portion of irrigate land for this right is 635 acres.

$$\frac{635}{1155} = .5498.$$

$$17.72 \text{ cfs } (.5498) = 9.74 \text{ cfs}$$

The property in the SENE is no longer irrigated. This is also when pivots were installed and they have dried up corners in the S $\frac{1}{2}$ NE. The pivot was installed in 1990. Irrigated acres were moved prior to Karen & David Modersityki leasing the property by the previous lessors.

2/8/02 I explained to David & Karen in a previous 1pm. meeting that because this was done prior to 1987 it comes under what is referred to as an accomplished transfer and they can claim it as a permissible POU but they are limited to 635 acres under this license.

CONVERSATION MEMORANDUM

RE: CHANGE IN PLACE OF USE

DATE: February 28, 2002

NAME OF PARTY

KAREN MODERSITZKI

Office visit

Karen Modersitzki came into the office in Soda Springs and brought me a map of the irrigated acres on the Haystack Mountain claim. David and Karen have leased this property from Elizabeth Call since 1984. The property in the SENE AND NESE of section 34, township 7 south, range 38 east was being irrigated by the previous leasers and the Modersitzki's have continued to irrigate this land since they have been on the farm. They have installed pivots and dried up corners in sections 26 and 35 to more effectively use the water. Karen is going to bring back a copy of the lease and a signed affidavit to document the change was made prior to 1987.
