- (1) Total acres in the Sand Creek Management Unit 30,370.56
- (2) The acres owned by us. ~~29,560.56~~ 16,808.64
- (3) The acres owned by State Land board 1,557.92
- (4) The acres owned by the Bureau of Land Management 8,804
- (5) The acres owned by the Forrest Service 3,200
- (6) Total acres of cropland, including hay, grass 587
- (7) Acres of hay; All meadow type hay 25
- (8) Acres that are irrigated 87
- (9) Acres of standing water within the Management area 54 - Pond 4 + BCR
This could be increased to a total of 184 acres

Blue Creek Resv.

- (10) Livestock grazing: This will be the last year for livestock grazing leases on this area. At the present time we have 50 head of cattle grazing on approximately 1,000 acres of land for four months.

We have 5 sections of land North of St. Anthony that is not suitable habitat for Big Game. We have a use agreement with Bill Siddoway allowing him to graze sheep on these five sections and in return retiring five sections of ground in the Juniper area from livestock grazing and burning.

We have 1,000 acres North of the Sand Dunes that we have a use agreement with Robertson Land and Livestock Co. allowing them to graze cattle on this 1,000 acres and retiring 1,000 acres of land that they control from livestock grazing. The land that they control is in the same area, but is a lot better Big Game habitat. Both of these agreements were signed by the B.L.M. as some of their land was involved.

- (11) Human use 1962 project year
- a. Number of hunters. 1,850
 - b. Number of Fisherman 1,478
 - c. Number of trappers 2
 - d. Number of others 162
