

## **A29-2390 & A29-2414**

Narrative by Cindy Bird

July 25, 2002

Photo 1. Looking west.

July 22, 2002 Craig Crandall accompanied me on the Crandall Farms adjudication field exam. Both water right licenses 29-2390 and 29-2414 are diverted from this well. The point of diversion and place of use under both licenses haven't changed from the original licensing exam. Photo 1 was taken at 3:55 pm looking west at the 150 hp pump. The serial number 1239901 is the same as the original U.S. Motor noted in the licensing examination in July of 1968.

This well operates two pivots and some hand lines. The hand lines are used to pick up the corners.

The GPS location of the well is N42 degrees, 51.482 minutes and W111 degrees, 55.523 minutes.
